

COLOUR NAMES AND THEIR SUFFIXES*

A STUDY ON THE HISTORY OF MONGOLIAN WORD FORMATION

BAIARMA KHABTAGAEVA**
(Szeged)

Mongolian word formation and Mongolian colour names are considered a neglected field of study in Mongolic literature. The aim of this paper is to find out if there is an affinity between certain lexical groups and specific word-forming suffixes. In order to answer this question, the author collected material on Mongolian word formation connected with colour names. Of the 108 suffixes examined, 49 are used with colour names and other lexical groups, and 59 are restricted to colour names, that is, they show special affinity to a specific lexical group, namely, to colour names.

Key words: Mongolian word formation, classification, basic colour names, object colour names, suffixes, semantics.

1. Introduction

1.1. Ways of Mongolian word formation

There are several ways of forming words in the Mongolian languages. Among these, suffixation is the most productive. But before we are discussing it, let us briefly review the others.

- Word formation with strengthening prefix.¹ The first syllable is duplicated and a -b is added to it, as e.g. *gab galagin* ‘extremely hot’, *sib sineken* ‘entirely new’, *ab adali* ‘very alike’. In another type of prefixation the first syllable is duplicated and the -rA, -ro, -ri syllable is added to it. This kind of partial re-

* I would like to express my thanks to Professor András Róna-Tas for his guidance of my work, and to Professors György Kara and Árpád Berta for their helpful advice. Thanks to my colleagues who helped me in the first steps of my work. I am also indebted to the Open Society Institute for its financial support, while I was on OSI scholarship in 1999–2001, which made this work possible.

** Baiarma Khabtagaeva, University of Szeged, H-6726 Szeged, Egyetem u. 2. Hungary,
e-mail: bkempf@freemail.hu.

¹ For more details see Bese (1960).

duplication may be used only if the word is the derivative of the -GAr suffix. E.g. Bur: *ara arbagar* ‘očen’ kosmatyj’, *boro borxigor* ‘očen’ nevzračnyj (*starý dom*)’, *tere tesxeger* ‘tolstyj-pretolstyj’. A third type is when a -d(o) syllable is added to the reduplicated first syllable, e.g. Bur. *bad balai* ‘temnymtemno, ničego ne vidno’, *bod boro* ‘soveršenno seryj’, *godo godogor* ‘čeresčur torčaščij, pripodnjatij (*o hvoste*)’, *mad malan* ‘sovsem lysyj’, *mad mayā* ‘očen’ krivoj (*o nogah*)’, *šodo šodogor* ‘očen’ tonkij’.

- Reduplication.
 - Simple reduplication: Khal: *öndör-öndör* ‘very high’, *üye-üye* ‘from time to time’, *yamar-yamar* ‘what-all kinds of?’, *xen-xen* ‘who-all?’, *urt-urt* ‘very long’.
 - Reduplication with additional word initial: Khal: *arix-marix* ‘all kinds of alcoholic beverages’, *ajil-majil* ‘work’, *apparat-mapparat* ‘camera’.
 - Reduplication with change of the original initial:² Khal: *ger-mer* ‘the yurt and everything around’, *max-cax* ‘meat’, *cás más* ‘paper’, *jolig-molig* ‘good-for-nothing’ Bur. *borxi-torxi* ‘nevzračnyj’; *pirō-miro* ‘zap. pero (< Russian)’.
 - Reduplication with change in vocalism: Bur. *meliger-müliger* ‘gladkij-pre-gladkij’, *pilxagar-pülxeger* ‘puhlyj’, Kalm: *salvr-sulvr* ‘in Unordnung’.
- Compounds. The two stems are complementary or denote extremes: Bur. *exe-esäge* ‘parents (*lit.* mother–father)’, *axa-díi* ‘brothers’, *xolo-oíro* ‘*lit.* far–near: environs’, *ama-xamar* ‘*lit.* mouth–nose: face, physiognomy’, *gar-xül* ‘*lit.* hands–feet: extremity’.
- Suffixation. The word formative is added to primary stems and stems which already have suffix(es).
Suffixes may be divided into suffixes with unrestricted use and suffixes with restricted use, both of which may be divided further into simple and compound suffixes.

According to function, we distinguish between suffixes which form nouns from nouns (denominal nominals NN) and from verbs (deverbal nominals VN), and suffixes which form verbs from nouns (denominal verbs NV) and from verbs (deverbal verbs VV). In many cases, the suffix initial depends on the final of the stem. According to the vowel-harmony that characterises Mongolian languages, the vocalism of the suffix follows the vocalism of the stem.

The aim of our investigation is to find out whether or not all suffixes with unrestricted use may be added to stems of all lexical classes, or is there a restriction according to which some suffixes cannot be added to some word classes, while other suffixes have an “affinity” to certain word classes.

We have selected the names of colours as the subject of our research and shall investigate (1) which suffixes may be added to colour names only and (2) which suffixes may be added to colour names as well as to other word classes.

² For more details see Sanžeev (1941, pp. 119–121).

1.2. Earlier researches on Mongolian word formation

Before we present our material and to draw some conclusions, we shall briefly review the earlier literature on Mongolian word formation.

The beginnings of Mongolian studies are linked to the name of I. J. Schmidt (1779–1847), a Dutch scholar and a member of the Imperial Russian Academy of Sciences, who came to Russia from Holland as a merchant at the age of nineteen. He devoted his life to Mongolian studies after he had lived for three years among the Kalmucks, learning their language and customs.

It was an important event in the history of Mongolian studies when he published his grammar of the Mongolian language (Schmidt 1831) and a Mongolian–German–Russian dictionary (Schmidt 1835). He was the first to apply a scientific method in studying the Written Mongolian language.

Real research on the Mongolian language started when the Department of the Mongolian language was established at the University of Kazan in 1833, with J. Kowalewski³ as its head. During the 22 years of its existence, such fundamental works were carried out as Kowalewski's grammar of Written Mongolian (Kowalewski 1835), his Mongolian dictionary (Kowalewski), which is still in use, and A. V. Popov's grammar of the Kalmuck language (Popov 1848).

A. A. Bobrovnikov's⁴ grammar comparing two written Mongolian languages, namely, the Written Mongolian and the Written Oirat, was published in 1849 (Bobrovnikov 1849). It was the first grammar which cited examples from the spoken language.

In 1855, the department was moved to St. Petersburg, and Professor A. V. Popov (1808–1865)⁵ became its head.

A. M. Castrén, a scholar of the spoken Buriat language and its dialects, was the next to exert a decisive influence on the course of Mongolian studies. His grammar of the Buriat language (Castrén 1857) was in use for more than fifty years.

G. J. Ramstedt's (1873–1950) seminal studies, dealing with the phonetics and morphology of the Mongolian and Turkic languages (Ramstedt 1952), influenced the work of scholars even today. He was the first to draw attention to the ancient glossaries of Mongolian spoken in the 13th century, comparing them with Written Mongolian and Khalkha forms. His Kalmuck dictionary (Ramstedt 1935), which is a treasury of useful information on Kalmuck phonology and Mongolian etymology, shows the scrupulous exactness of his work.

When Ramstedt arrived in St. Petersburg to lecture on Mongolian and Altaic subjects he met W. Kotwicz (1872–1944), a Polish scholar who belonged to the Radloff circle. From the point of view of Mongolian morphology, his grammar of Written Mongolian (Kotwicz 1902) for university students and his grammar of spoken Kalmuck (Kotwicz 1929) must be mentioned. The results of his research are summarised in the book published by his student M. Lewicki (Kotwicz 1953).

³ For more details see Ulymžiev (1994, pp. 26–44).

⁴ For more details see Ulymžiev (1994, pp. 86–95).

⁵ For more details see Ulymžiev (1994, pp. 45–52).

A. D. Rudnev (1878–1958), who belonged to Ramstedt's circle, applied the latter's methods in researching the living Mongolian languages and such dialects as Ujumchin, Gorlos, Durbut-Beise and other Inner-Mongolian dialects (Rudnev 1911).

His knowledge of his special field of study and thoroughness raises N. N. Poppe above the others. His works on Middle Mongolian (Poppe 1924, 1938, 1957), Written Mongolian (Poppe 1927, 1954), living Mongolian languages (Poppe 1930, 1951, 1960) and comparative Mongolian studies (Poppe 1955) opened a new era in the study of Mongolian languages.

In 1943 Teréz M. Szabó, a Hungarian scholar and a member of the Ligeti school, published her book on Kalmuck word formation (Szabó 1943), a little known work which would merit more attention.

G. D. Sanžeev's comparative grammar of Mongolian languages is another important work that must be mentioned. The first volume, which deals with phonology (Sanžeev 1953), was published in 1953, while the second volume on morphology and syntax (Sanžeev 1963) appeared only ten years later, in 1963. He also wrote grammars of modern Mongolian languages (Sanžeev 1940, 1941, 1959).

Sanžeev's contemporary, B. H. Todaeva published materials on several dialects that she collected on her expeditions in Inner Mongolia (Todaeva 1960, 1961, 1963, 1964, 1986). She also included glossaries and grammatical explanations of the linguistic phenomena of these languages.

The long overdue grammar of the language of the Secret History was compiled by J. Street (Street 1957). Another of his works that deserves mention deals with Khalkha structure (Street 1963). This book contains a detailed discussion of Khalkha morphology.

M. N. Orlovskaya's book on the formation of Khalkha nouns (Orlovskaya 1961) listing the most productive suffixes, was published in 1961.

M. Weiers, in his valuable work on preclassical Mongolian (Weiers 1969), examines in detail the phonetics and morphology of the monuments in Uighur-Mongolian script known up to that time.

Among the modern Buriat scholars U. Š. Dondukov should be mentioned for his detailed study of Buriat productive and non-productive suffixes (Dondukov 1964). His sources include dictionaries, as well as newspapers, literary works and living dialects. Other Buriat scholars who wrote grammars of the language are D. D. Amogolov (Amogolov 1958), G. D. Sanžeev (Sanžeev 1962), and C. C. Cydypov (Cydypov 1988).

Khalkha Mongolians, for instance, C. Mömöö (Mömöö 1997), and C. Önörbayan (Önörbayan 1998), usually wrote grammars of their own language. The Khalkha grammar by Rita Kullmann and D. Tserenpil (Kullmann – Tserenpil 1996), which was recently published in English, presents the colloquial language in tables together with parallel examples of Written Mongolian forms.

A. Š. Kičikov (Kičikov 1963) and B. Badmaev (Badmaev 1966) are contemporary Kalmuck scholars.

Unfortunately, some valuable works on the subject, for instance, Činggeltei's *Odo üye-yin monggol kele jüü* (Činggeltei 1980) and L. Bold's *Orcin cagin mongol xelnii dagawar* (Bold 1986), were not available to the author.

1.3. Studies on Mongolian colour names

Colour-name systems were investigated mostly from the semantic point of view, usually by comparing the colour-name system of one language to that of another. This method of listing the colour names and the differences between the systems, and explaining the reasons for the differences, is known as the relativistic research method. In subsequent research the universal character of colour names and their semantic fields were also examined.

The most important grammatical works on Mongolian languages are listed above, while the following is a list of the works on colour names.

Influenced by the Altaic theory, W. Kotwicz employed the comparative method to investigate the Tungus, Mongolian and Turkic colour names (Kotwicz 1930). In some cases, he tried to find the stems of the colour names and to relate them.

Ilse Laude-Cirtautas' book on Turkic colour names (Laude-Cirtautas 1961) was published in 1961. She divided the colour names into two groups: the summarising colour names⁶ and the object colour names⁷. She also collected some of the historical and modern occurrences of these words, as well as the words formed from them. Then she investigated the shades of meaning of the colour names, also dividing them into two groups: one designating primary shades and the other designating abstract meanings.

Although H. Okada's paper is titled "Color-names in Manchu" (Okada 1962), it is in fact a brief comparative study of Manchu and Mongolian.

A. Gabain (Gabain 1962) investigated the symbolic meaning of colour names in the Turkic and Mongolian languages.

N. N. Poppe's paper (Poppe 1977) shows the influence of Laude-Cirtautas' work. He identified the same semantic categories in the case of Mongolian colour names as Laude-Cirtautas did in the case of Turkic colour names.

In her book, N. L. Žukovskaya devoted a chapter to colour names, dealing mostly with the role of colour names in Mongolian culture (Žukovskaya 1988).

⁶ This means that their use is not limited, that they can be applied to anything in everyday's life.

⁷ This means that their use is limited.

2. Mongolian colour names

2.1. The semantics of the basic colour names

2.1.1. The role of colour names in Mongolian cultural life

All nations have their special and characteristic system of colour names. As in other languages, colour names play a special role in the Mongolian languages too. The rich word groups and living expressions formed from colour names proves this. The use of colour names as geo-symbols also exemplifies their special role. The five most important colour names denote the four cardinal points and the central point. The colour of North is black, South is red, East is blue, West is white, and the centre is yellow.⁸ For example, the two independent parts of the Golden Horde are the White Horde, that is, the territory to the West, and the Blue Horde, the territory to the East. The same five colours are used in the sexagenary cycle calendar.⁹ In addition, each of the five colours denotes one of the basic elements. Thus, white denotes metal, red denotes fire, yellow denotes earth, black denotes water, and blue (green) denotes tree. This system is probably of Chinese origin, and was known not only by the Mongols, but also by the Turkic people (Gabain 1962, p. 111). The system of the elements was used in official documents, while the system of colour names was used, and is still used, in everyday conversation.

A nation's culture and history determine the system of colour names which shows those circumstances that are important in the life of that nation.

White and black play the biggest role in Mongolian culture. There is a semantic opposition between them, denoting good and bad. The colour white has a sacral role, because this is the colour of milk and felt. Milk is used for offerings, it is the most important foodstuff beside meat,¹⁰ and when a guest enters a Mongolian home, he is offered milky food. The most important feast of the Mongols is the *Čagan sara* 'the White month'.¹¹ If white denotes good, than black denotes what is bad and strong.

⁸ We find the same system, but with different colours, in the Tibetan art of painting (which is almost exclusively Buddhist painting). According to the main system, the colour of North is green (water), South is yellow (earth), East is blue (air), West is red (fire), and the centre is white (ether) (Aschoff 1999, p. 5.) There are some differences in the various systems. For example, in the Bon religion South is dark blue, because the land of the dead is in the South, in unreformed Buddhism South is white, because light emanates from the South, and in the teachings of the Rnying ma pa sect the central colour is blue. On the mandala of the Medicine Buddha we find the same system as used by the Mongols (the North is black, the West is white, and the South is red).

⁹ E.g. 1975 is the year of the tree blue hare, and 2000 is the year of the iron white dragon.

¹⁰ *Čagan idegen* 'milky food' i.e., 'white food', *qara idegen* 'meat food' i.e., 'black food'.

¹¹ Originally this feast was held in September, when there is plenty of milky food. In 1276 Qubilai, under Chinese influence, ordered that the *Čagan sara* be held around February, at a time when there is no milky food. This notwithstanding, the feast preserved its name.

In the Ordos language the colour name blue is under taboo. It can be used only as the epithet of the sky and the god embodied by the sky. In every other case the colour name grey is used.

The semantic field of colour names is not always limited to their basic meaning. For example, the colour name blue means blue and green, and the colour name grey can mean grey as well as brown.

Colour names also occur in the names of religions: *qara šašin* 'shamanism', *sira šašin* 'Lamaism',¹² *čaġan šašin* 'Christianity'¹³ (Žukovskaya 1988, pp. 153–169; Coloo 1994, p. 28).

In the present paper colour names were divided into groups. If the monolexeme colour name could be used freely in everyday life in connection with anything, then this name was included in the basic colour name group. The basic colour name is a linguistic reflection rather than a physical reality.

Poppe gives the following semantic groups (for the sake of simplicity I shall mention only a few Khalkha and Buriat examples):

2.1.2. The basic meaning and the semantic field of colour names

boro: Bur. *boro töhön* 'seraja pyl'

čaġan: Khal. *cagān ar'stan* 'belaja rasa' (Luw. 600b); Bur. *sagān šāžan tabag* 'belaja farforovaja tarelna'

köke: Khal. *xōx utā* 'sinij dyn' (Luw. 556b); Bur. *xüxe tengeri* 'goluboe nebo'; *xüxe nūr* 'goluboe ozero' (BurRS 635b);

noğogan: Bur. *nogōn težel* 'zelenyj korm'; *nogōn üilse* 'zelenaja ulica' (BurRS 329a);

qara: Khal. *xar niid* 'černye glaza' (Luw. 512b); Bur. *xara šoroi* 'černozem' (BurRS 548a);

sira: Bur. *šara nabša* 'želtye list'ja, listopad' (BurRS 720b);

ulağan: Bur. *ulān bexe* 'krasnye černila'; *ulān šuhan* 'krasnaja krov' (BurRS 466a).

2.1.3. Special use of basic colour names

2.1.3.1. Names of food

čaġan: Khal. *cagān idē* 'moločnyj produkt' (Luw. 600b); *cagān arxi* 'mongol'skaja vodka, polučennaja putem peregonki moloka' (Žukovskaya 1988, p. 160); *cagān tos* 'pennoe maslo' (Rassadin – Budaev 1994, p. 6); Bur. *sagān talxan* 'belaja muka, krupčatka' (BurRS 381a);

noğogan: Bur. *nogōn sai* 'zelenyj čaj' (BurRS 329a);

qara: Khal. *xar cai* 'černyj, ne zapravlyennyj molokom čaj' (Žukovskaya 1988, p. 160); Bur. *xara xilēmen* 'černyj ili ržanoj hleb' (BurRS 548a);

¹² Because the headgear of the lamas is yellow.

¹³ Because Christianity came to the Mongols from the west; cf. *čaġan qaġan* 'the Russian tsar'.

sira: Khal. *šar airag* 'pivo' (Luw. 645b); *šar us* 'svyrotka' (Rassadin – Budaev 1994, p. 13); Bur. *šara tohon* 'toplennoe maslo' (BurRS 720b);

ulağan: Bur. *ulān arxi* 'vino' (BurRS 466a); *ulān ündegelei hainer* 'pasha' (Cydenžápor 1992, p. 82).

2.1.3.2. Names of animals

boro: Khal. *bor bürged* 'seryj berkut, orel'; *bor šuwū* 'vorobej' (Luw. 77b); Bur. *boro hoir* 'kopaluhu (samka gluharja)'; *boro sändagan* 'zajac-rusak letom'; *boro xura* 'teterka' (BurRS 106a);

čaġan: Khal. *cagān yamā* 'omul' (ryba); *cagān xorxoi* 'lentočnyj glist'; *cagān üneg* 'pesec' (Luw. 601b); Bur. *sagān šubūn* 'lebed'; *sagān zagahan* 'sig'; *sagān xermen* 'belka-al'binos' (BurRS 381a);

köke: Khal. *xōx boljinor* 'žavoronok'; *xōx cecgī* 'sinica' (Luw. 557a); Bur. *xüxe buxa* 'lit. sinica'; *Borzin golub'*; *xüxe sázgai* 'soroka golubaja'; *dūša xüxe* 'penočka zelenaja'; *xüxe degli* 'capljina seraja' (BurRS 635b);

noğogan: Khal. *nogōn xüreljene* 'polevoj sverčok'; *nogōn tolgoit sono* 'ovod' (Luw. 269b); Bur. *nogōn tonsūl* 'zelenyj dijatel' (BurRS 329a);

qara: Bur. *xara xüre* 'černyj voron'; *xara ünegen* 'černo-burajca lisica'; *xara güröhen* 'burij medved'; *xara xura* 'teterev, kosač'; *xara hoir* 'gluhar' samec' (BurRS 548a);

sira: Khal. *šar jögi* 'osa'; *šar xömrög* 'ovsjanka (ptica)' (Luw. 646a); Bur. *šara šubūn* 'filin'; *šara aräta* 'stepnaja lisica'; *goloi šara šono* 'stepnoj ryžij volk' (BurRS 720b);

ulağan: Khal. *ulān sül* 'krasnoper (ryba)' (Luw. 451a); Bur. *ulān zalāta* 'zap. čečetka'; *ulān xorxoi* 'doždevoj červjak' (Bur. 466b).

2.1.3.3. Names of plants

boro: Khal. *bor budargana* 'soljanka počeškonosnaja, kuraj'; *bor šawag* 'polyn' kserofitnaja'; *bor boroljoi* 'pižma trehdol'naja'; *bor tair* 'kačim pustynnyj' (Luw. 77b);

čaġan: Khal. *cagān terelj* 'bagul'nik bolotnyj'; *cagān ceceg* 'kermek dvucvetnyj'; *cagān šarlıf* 'polyn' belolistnaja'; *cagān yargui* 'anemona, vetrenica narcissoidnaja'; *cagān sul'* 'volosnec gigantskij' (Luw. 601a); Bur. *sagān xulhan* 'trostnik'; *sagān ürmedil* 'belaja'; *sagān harxyág* 'belyj grib' (BurRS 381b);

köke: Khal. *xōx taria* 'roz' (Luw. 557a); Bur. *xüxe seseg* 'razg. nezabudka' (BurRS 635b);

nil 'indigo, ruby' (Lessing 583a); Khal. *nil ceceg* 'ibolya' /Lat. Viola/ (Kara 1998, p. 288a);

noğogan: Khal. *nogōn yerköög* 'žitnjak sibirskij' (Luw. 269b);

qara: Khal. *xar mod* 'listvennica sibirskaja' (Luw. 512b); Bur. *xara nerhen* 'černaja černika' (BurRS 548a);

sira: Khal. šar *budargana* ‘potashnik oblistvennyj’; šar *sarāna* ‘lilija kudrevataja, saranka’; šar *śawag* ‘polyn’ pesčanaja’; šar *xoič* ‘podmarannik želtyj’ (Luw. 646a); Bur. šara *dere* ‘šalfej’; šara *modon* ‘barbaris sibirskij’ (BurRS 721a); *ulağan*: Bur. ulān *tolgoi* ‘polevica Triniusa’ (BurRS 466b); *yağan* ‘pink, rosy, ruddy, roseate, violet, lilac’; y. čene ‘peony’ (Lessing 423b).

2.1.3.4. Names of diseases

boro: Khal. bor šar ~ borin gem ‘kataral’noe zabolevanie tolstoj kiški’ (Luw. 77b); *čağan*: Khal. cagān burxan ‘ust. ospa’; cagān xaniad ‘legkij gripp’ (Luw. 601a); Bur. sagān seseg ‘ospa; vetrjanaja ospa, vetrjanka’ (BurRS 381b); *köke*: Bur. xüxe xanyādan ‘cil’nyj kašel’ (BurRS 636a); *qara*: Khal. xar deleň ‘the name of a cattle disease which manifests itself in goats ceasing to give milk and the udder gradually withering’ (Poppe 1977, p. 122); *sira*: Bur. šara xumxā ‘maljarija, želtaja lihoradka’; šara übşen ‘želtuha’ (BurRS 721a); *ulağan*: Bur. ulān ešergene(en) ‘kor’ (BurRS 466a).

2.1.3.5. Human characteristics

boro: Khal. bor xirin xün ‘neprehotlivyj čelovek’; bor caraitai ‘smuglyj’ (Luw. 77a); Bur. boro myaxatai ‘krepkij, vynoslivyj’; boro tolgoitoi ‘s sedejušcej golovoj’ (BurRS 106a); *čağan*: Khal. cagān xün ‘dobrodrušnyj čelovek; čelovek, vospriimčivyyj k infekcionnym zabolevanjim’ (Luw. 601a); Bur. xüxe sagān bolo- ‘poblednet’ (*o lice*); sagān sed’xeltai ‘bezobidnyj ili dobrodusnyj čelovek’; sagān ühetei ‘sedoj, s sedinoj’ (BurRS 381b); *köke*: Bur. xüxe xün ‘skučnyj, nudnyj čelovek’; xüxe sagān ‘blednyj, pomertvelyj’ (BurRS 635b); *qara*: Khal. xar elegtei ‘čužoj, nerodnoj; vraždebno nastroennyj; holodno otnosjaščij-sja’ (Luw. 513a); Bur. xara bargu xün ‘nevezhestvennyj ili otstalyj čelovek’; xara hanitai ‘zlovednyj, kovarnyj’; xara beye xün ‘sovsem odinokij čelovek’ (BurRS 548a); *ulağan*: Khal. ulān ‘alčenjyj, korystoljubivyyj, žadnyj, bessovestnyj’ (Luw. 451a); Bur. ulān zérde ‘očen’ p’janyj’; ulān xelete ‘jazykastyj, očen’ gorlivyyj’; ulān nyudarga ‘dračun’ (BurRS 466a).

2.1.3.6. Names of metals

čağan: Khal. cagān alt ‘platina’; cagān möngö ‘serebrjannye den’gi’; cagān tömör ‘zest’; cagān tugalga ‘olovo’; xöngön cagān ‘alljuminij’ (Luw. 600a); Bur. sagān altan ‘platina’; sagān nūrhen ‘belyj ugol’ (*o gidroenergii*); xüingen sagān ‘alljuminij’; arba sagān ‘grivennik, serebrjanaja moneta, kopejka’ (BurRS 381a); *nil*: n. erdeni ‘Corundum, sapphire’ (Lessing 583a); *qara*: Khal. xar tugalga ‘svinec’ (Luw. 512b);

sira: Bur. šara altan ‘razg. červonnoe zoloto’ (BurRS 721a); *ulağan*: Khal. ulān möngö ‘mednaja moneta, medjak’ (Luw. 451a); Bur. ulān altan ‘krasnoe zoloto 56 proby’ (BurRS 466a).

2.1.4. Figurative use of basic colour names

2.1.4.1. Easy, simple, safe

boro: Khal. bor xöl ‘mjasnaja pišča’; xar bor ajil ‘prostaja fizičeskaja rabota’ (Luw. 77a); Bur. boro edyén ‘prostoy kušanie’; boro arga ‘domašnee lečenie’ (BurRS 106a); boro xirin xün ‘zaurjadnyj čelovek’ (Cydenžapov 1992, p. 25); *čağan*: Khal. cagān bićig ‘tekst’ napisannyj prostym alfavitom bez transkripcionnyh znakov (*legkoe, netrudnoe*); cagān zam ‘horosaja gladkaja doroga’; cagān tolgoi ‘azbuka, alfavit (*legkoe načalo*)’ (Luw. 601a); *qara*: Khal. xar xel ‘prostorečie, razgovornyyj jazyk’; xar max ‘postnoe mijaso’ (Luw. 513a); xar šöl ‘mjasnjoj, no bez zapravki bul’on’; xar us ‘černaja, prostaja voda, podavaemaja čeloveku v otvet na pros’bu napit’sja, esli u jutre net nikakogo molocnogo napitka’; xar arxi ‘černaja vodka, polučennaja metodom pergonki zernovoj bardy (*tak nazывали kitajskuju vodku iz risa i prosa*)’ (Žukovskaya 1988, p. 160); Bur. xara xün ‘prostoljudin, mirjanin’ (BurRS 548a); *ulağan*: Bur. ulān tamxin ‘razg. legkij tabak’ (BurRS 466a).

2.1.4.2. Good natured

čağan: Khal. cagān iilis ‘dobrye dela’ (Luw. 601a); cagān tel ‘rovnaja bezopasnaja step’ (Žukovskaya 1988, p. 160); Bur. sagān zöri ‘čestno nažitoe imuščestvo’; sagān dari ‘bezdymyj poroh’ (BurRS 381a).

2.1.4.3. Bare, naked, uncovered

ulağan: Khal. ulān garär ‘golymi rukami’; ulān nyarai ‘novoroždennyj’ (Luw. 451a); Bur. ulān xüllör yabasa ‘hodit’ bosikom, hodit’ peškom’ (BurRS 466b); ulān myaxárá ‘potom i krov’ju’; ulān nyürará ülza- ‘vstretit’sja licom k licu’ (Cydenžapov 1992, p. 82).

2.1.4.4. Very, strong, strongly

čağan: Bur. sagān žabar ‘žgučij moroz’ (Cydenžapov 1992, p. 68); *köke*: Bur. xüxe xabar ‘tjaželaja vesna’; xüxe xereg ‘nikčemnos ili bespoleznoe delo; razg. nezadacha’ (BurRS 636a); *qara*: Khal. xar tamxi ‘opium’; xar xöls ‘obil’nyj pot’; xar šürga ‘užasnaja metel’ (Luw. 512b); Bur. xara arxi ‘krepkaja vodka’; xara xüiten ‘sil’nyj holod’; xara halxin ‘sil’nyj veter; bessmeňnyj veter, pyl’nyj suhovej vesnoj’; xara boró ‘sil’nyj dožđ; samyj razgar dožđja’; xara xüdelmeri ‘černaja rabota, fizičeskij trud’ (BurRS 548a); xara üglo ‘rano utrom’ (Cydenžapov 1992, p. 103);

ulağan: Khal. *ulān salxi* 'pyl'naja burja' (Luw. 451a); Bur. *ulān zun* 'samoe leto, razgar leta' (BurRS 466b).

2.1.4.5. Epithet of harmful things

sira: Bur. *šara mogoi* 'jadovitaja zmeja'; Šara *Erlig* 'zelyj d'javol (o zolote)' (BurRS 721a).

2.1.4.6. Swear words and curses

gara: Bur. *xara noxoi* 'černaja sobaka (rugatel'stvo)'; *xara zolig* 'ot'javlennyj negodaj' (Cydenžapov 1992, pp. 102–103).

2.1.4.7. Expressions for pure, undiluted, uncontaminated, alone, bare

gara: Bur. *xara uhan* 'čistaja voda': cf. *münxān xara uhan* 'fol'klor. živaja voda (kristal'naja voda večnosti)' (BurRS 548a).

2.1.5. Metonymic use of basic colour names

čágán 'white' → a) 'the white of an egg or of the eye'; b) 'walleye, leucoma of the cornea'; c) 'mourning, white mourning clothing' (Lessing 158a); d) Bur. *sagān* 'ostojavšaja prostakvaša'; e) Bur. *sagān* 'Ehirit jagnenok letnego potmeta' (BurRS 381b);
nogógan 'green' → 'grass, vegetable; dish (food)' (Lessing 588a);
qara 'black' → Khal. 'féltekenység, irigység' [jealousy, envy] (Kara 1998, p. 557b);
sira 'yellow' → a) 'yolk of an egg'; b) 'bile, heartburn, acidity of the stomach; hang-over' (Lessing 714b); c) Khal. 'epe, düh, harag' [fury, rage, anger] (Kara 1998, p. 702b).

2.1.6. Compound colour names

Basic colour names may form compounds, but they cannot be put side by side arbitrarily. Usually this compound formation is possible when the two colours are located next to each other on the spectrum.

boro ulágan 'violet' (Lessing 121b); *čágán boro* 'light grey' (Lessing 158a); Bur. *segēn xüxe* 'svetlo-goluboj' (BurRS 401a); *čengkir köke* 'bluish, dove-coloured' (Lessing 172b); *nogógarbur sir-a* 'greenish-yellow' (Lessing 588b); *ulabur sir-a* 'orange coloured'; *ulabur qara* 'dark red' (Lessing 869a); *ulabur sira* 'reddish yellow, orange' (Lessing 868b); *qara boro* 'dark brown, dark grey; dirty' (Lessing 931a); Bur. *xara ulān* 'temno-krasnyj'; *xara xüxe* 'temno-sinij' (BurRS 548a); Bur. *xirin* 'buryj' (GTS 95); *qarabutur nogógan* 'dark green' (Lessing 932a); *köke boro* 'darkish or ash' (Lessing 482a); *kökebutur ulágan* 'violet, bluish red' (Lessing 482b); *küreng ulágan* 'brownish red; dark red, dark brown; purple, blood red' (Lessing 505a); *sir-a ulágan* 'yellowish-red'; *sirabutur nogúgan* 'yellowish-green' (Lessing

714b); Bur. *šargal ulān* 'ryžij' (GTS 95); *yágan köke* 'violet' (Lessing 423b); Bur. *yagá ulān* 'alyj' (GTS 95).

2.1.7. Colour names with strengthening prefix

čab čágán 'quite white, entirely white, snow white' (Lessing 154a); *čeb čegen* 'entirely white or light'; *čeb čengker* 'very light blue' (Lessing 167b); *qab qara* 'entirely black' (Lessing 895a); *köb köke* 'entirely blue or green' (Lessing 475b); *nob nogógan* 'completely green, pure green' (Lessing 587b); *sib sira* 'completely yellow' (Lessing 693a); *ub ulágan* 'completely red, quite red' (Lessing 858a); *yab yağan* 'very pink' (Lessing 420a).

2.1.8. Colourfulness

Mongolian has several words and compounds for expressing the colourfulness of living beings and things. Originally, these expressions were used only to denote the colour of our animals, but today their use is general.

alág; *alág eriyen* 'multicoloured, parti-coloured' (Lessing 26b); *čouqur* ~ *čoqur* 'variegated, spotted' (Lessing 199a); *eriyen* 'motley, variegated' (Lessing 327b); *eriyen čouqur* 'motley, variegated' (Lessing 199a).

2.2. The semantics of secondary or object colour names

The use of object colour names is restricted, for instance, to denoting the colour of fur or hair.

2.2.1. Denoting simple colours of fur/hair

buğural 'grey, grey-haired, greyish', cf. *buğural mori* 'partly grey horse, roan horse' (Lessing 131b); *oló* 'gris' (Mostaert 1941, p. 531a); *jegerde* 'red, chestnut' (Lessing 1043b); *keger* 'bay of chestnut' (Lessing 443a); *gongğur* 'fallow, yellow-bay, chestnut (of a horse)'; *quwa ~ quwa* 'light yellow, chestnut, bay; sallow, pale' (Lessing 993a); *sağalar* 'ashen, dun colored' (Lessing 657b); *sırğa* 'light bay' (Lessing 716b).

2.2.2. Denoting mixed colours of fur/hair

čabidár 'reddish yellow with white mane and tail' (Lessing 155b); *jaǵál* 'having dark spots on the neck and shoulders (of a stallion or gelding)' (Lessing 1022b); *qalıǵun* 'brown, colour of horses which may vary from yellowish white to yellow mixed with black, with black mane and tail and a black band on the spine' (Lessing 920a); *qaltar mori* 'bay horse with white breast and whitish muzzle', cf. *qara q. mori* 'black horse with white muzzle', *q. noqai* 'dog with yellow spots on his mouth', *q. ünege* 'silver fox' (Lessing 921a); *qula* 'fawn coloured, tawny, bay, having a black stripe along the spine; with black tail and mane' (Lessing 983b).

2.3. The origin of secondary colour names

Originally, the following colour names were names of metals, precious stones, plants, animals, etc. and the meaning of the colour name was secondary.

2.3.1. Colour names formed from names of metals and precious stones

- alton* ‘gold, golden’ (Lessing 33a); Bur. *a. naran* ‘solnce krasnoe’; *a. taryālan* ‘zolotaja niva’ (BurRS 44b); Khal. *a. xundaga* ‘bot. želtaja lilija’ (Luw. 32b); ← Turkic *alton*;
dung ‘big sea shell’: *d. čaǵan* ‘snow-white’ (Lessing 274a); Khal. *dun cagān šüd* ‘hófehér, egézséges fogak’ [snow-white healthy teeth] (Kara 1998, p. 154a); ← Tib. *dung*;
gauli ‘brass, copper’ (Lessing 355a); Bur. *gūlin mete üngetei* ‘želtyj kak med’ (KTS 34);
jebe ‘rozda’ [rust, corrosion] (Kara 1998, p. 219a); Bur. *žebin üngetei* ‘ržavogo cveta’; *žebe šara namag* ‘ržavoe boloto’ (BurRS 234b); Khal. *jewxī ‘fakó’* [pale, faded, dun] (Kara 1998, p. 220a)
mönggii ‘silver’ (Lessing 547b); Bur. *müngén müshed* ‘serebristye zvezdy’; *harin* ‘münge saxarig’ [serebrjannij disk luny] (BurRS 306b);
nomin ‘azure-stone, laxulite’ (Lessing 590b); Bur. *nomin (xiče) dalai* ‘more s zelenovatym otivom’; *nomin xiče nyüdetei* ‘goluboglazý’ (BurRS 330b); ← Tib. *mu men*;
ogiu ‘turquoise’ (Lessing 603b); Bur. *oyin (xiče) ogtorgoi* ‘birjuzovoe sinee nebo’ (BurRS 367b); ← Tib. *g-yu*;
sirū ‘coral’ (Lessing 719b); Bur. *šüre ulān* ‘krasnyj kak korall’; *šüre ulān xasar* ‘alye kak korall ščeki’; *šüre ulān šenise* ‘spelaja pšenica’ (BurRS 739a); ← Tib. *byi-ru*;
tuǵulg-a(n) ‘tin, lead’ (Lessing 838b); Bur. *tülgan xara ülen* ‘svincovye, temnye tuči’ (BurRS 234b).

2.3.2. Colour names formed from names of natural phenomena

- časun* ‘snow’: č. *sikir* ‘granulated sugar’ (Lessing 166b); Bur. *sagān sahan [samsa]* ‘belosnežnaja [rubaška]’ (BurRS 387b);
ǵal ‘fire, conflagration’: *ǵal sir-a* ‘reddish yellow’; *ǵal ulaǵan önggetei* ‘fire-red, red-hot’ (Lessing 346a); Bur. *gal ulān oi* ‘bagrjannij les osen’ju’; *gal ulān nyüden* ‘ognenno-krasnye glaza ot jarosti’; *gal xiče üngetei übhen* ‘zelenoeprizelenoe seno’; *galta xara ünegen* ‘černo-buraja lisica’ (BurRS 143a);
manang ‘mist, steam, fog’ (Lessing 525b); Bur. *manan ünge* ‘matovoj, dymatuj cvet’ (BurRS 292a);
ünesün ‘ash, ashes’: ü. *önge* ‘colour of ashes, grey[ish]’ (Lessing 1009b); Bur. *ünehen xiče pepel* ‘no-sinij (cvet)’ (Cydenžapov 1992, p. 95); *ünehen boro* ‘blednyj kak pepel (o lice)’ (BurRS 509b).

2.3.3. Colour names formed from names of animals and plants

- anggir* ‘a kind of yellow duck’: *a. sir-a* ‘yellow, reddish-yellow’ (Lessing 44b);
buǵura ‘male camel’: *buǵural* ‘grey’ (Lessing 131b);
bulag-a(n) ‘sable’ (Lessing 133a); Bur. *bulgan nıdxə* ‘sobolinnye brovi temno-korınevogo cveta’ (BurRS 111a);
jegeren ‘antelope’: *jegerde* ‘red, chestnut’ (Lessing 1043b);
kerry-e(n) ‘crow’ (Lessing 458a); Bur. *xirē xara ühetei* ‘černye kak vorona volosy’ (BurRS 574a);
moııl ‘bird-cherry’ (Lessing 542a); Bur. *moıhon xara nyüdetei* ‘s černymi kak u čeremuhi glazami’ (BurRS 298b);
qaligu(n) ‘otter’ (Lessing 919a); Bur. *xalyūn xara ühetei* ‘s černymi kak vydra volosami’ (BurRS 541a);
qung ‘swan’: *q. čaǵan* ‘white as a swan, snow-white’ (Lessing 986a); Bur. *xun sagān xonin* ‘belosnežnaja ovca’ (BurRS 601a);
temege(n) ‘camel’ (Lessing 800a); Houa-yi yi-yu rāmā’ān öñgō ‘jaune-brun, brunâtre (couleur de chameau)’ (Lewicki 78)
üyeng ‘ermine, stoat’ (Lessing 1002b); Bur. *üyen sagān sahan* ‘belosnežnyj’ (BurRS 496a);
üker ‘bovine animal, ox, cow’: ü.-*ün nidiü* ‘black currant, Ribes nigrum’ (Lessing 1003a); Bur. *üker sabga* ‘černostiv’ (BurRS 518b);
ünege(n) ‘fox’ (Lessing 1008a); Bur. *ünegenei xaranxi* ‘samaja temnaja pora pered rassvetom’ (BurRS 508a).

2.3.4. Colour names formed from names of fluids and mass nouns

- čisun* ‘blood’: č. *ulaǵan* ‘blood-red, crimson’ (Lessing 192b); Bur. *śuhan zérde* ‘ognenno-ryžij’; cf. *tengerin xayā ulān śuhan üngetei* ‘gorizont bagrjanogo cveta’ (BurRS 736a);
dabırqai ‘pitch, tar; resin of a coniferous tree’ (Lessing 212b); Bur. *dabirxai xara* ‘soveršeno černyj’ (BurRS 179a);
kileŋ ‘velvet, plush’ (Lessing 466a); Bur. *xilen xara nyüden* ‘černye kak barhat glaza’; *xilen xaran xühen* ‘černye volosy kak barhat’ (BurRS 571b);
köbiung ‘cotton, cotton yarn’ (Lessing 477a); Bur. *xüben sagān manan* ‘belyj kak tuman’; *xüben sagān ülen* ‘belye, točno kak vata oblaka’ (BurRS 611a);
köge ‘soot’ (Lessing 478b); Bur. *xō xara* ‘černyj kak ugol’; *xō xara nıdxenid* ‘ugol’no-černyj brovi’ (BurRS 593b);
öndege(n) ‘egg’ (Lessing 636b); Bur. *ündegen sagān* ‘belosnežnyj’ (BurRS 505b); cf. *ündegen sagān şaruitai* ‘belolicyj’ (Cydenžapov 1992, p. 93);
sün ‘milk’ (Lessing 744a); Bur. *hiün sagān* ‘belyj kak moloko’ (BurRS 696b).

2.3.5. Assimilated compounds

In these cases one element of the compound is a colour name. Sometimes it is very difficult to identify the second element of the compound.

Khal. *borbut* 'sebforrasztófú /Lat. Descuriania sophia/' (Kara 1998, p. 66a) < *boro* 'grey' + *buta* 'bush, brushwood, thicket; lump, clump; bunch' (Lessing 141a) *čaḡbar* 'snežnyj bars'; Khal. *cagwar* (Luw. 602a; NT 96–97, p. 212) < *čaḡan* 'white' + *bar* 'tiger' (Lessing 88b); *ulaqib* (čeečeg) 'krasnaja kist' (nazvanie streluščegosja rastenija, u kotorogo cvety v vide krasnoj kisti); Khal. *uläxiw ceceg* (NT 89–90, p. 181) < *uläğan* 'red' + *kib* ~ *kib* 'silken scarf or kerchief; silk tissue, silk; gauze, crepe' (Lessing 465a); *garbar* 'černyj tigr'; Khal. *xarwar* (NT 96–97, p. 213) < *qara* 'black' + *bar* 'tiger' (Lessing 88b); *kökedi* 'sinevataja kalavinka'; Khal. *xöxdı* (NT 96–97, p. 160) < *köke* 'blue' + *garudi* 'Garuda, the king of the birds in Indian mythology' (Lessing 394a); Khal. *xarwi* 'černyj aist' /Lat. Ciconia nigra/ (NT 96–97, p. 162) < *qara* 'black' + *örbi* 'stork, heron' (Lessing 640a); Ord. *šargā* 'nom qu'on donne à un chien fauve' (Mostaert 1941, p. 610a) < *sira* 'yellow' + *noqai* 'dog' (Lessing 592a).

2.4. The etymology of basic colour names

From the etymological point of view, Mongolian colour names show a mixed picture. Some of them are very early Turkic loanwords for instance, *boro* (Old-Turkic *bōz* 'grey' ED 388b), *köke* (Old-Turkic *kōk* 'sky-coloured, blue, blue-grey' ED 708b), *küreng* (Old-Turkic *küzen* 'polecat' ED 761b), *qara* (Old-Turkic *qara* 'black' ED 643b), *sira* (Old-Turkic **sira* < *sāriq* 'yellow' ED 848a). In part of the Altaistic literature they are considered as ancestral Altaic words.

The colour name *nil* 'violet' is of Sanskrit origin: ← Sskr. *nīla*.

Colour names which include the Mongolian suffix +*GAn* are considered to be of Mongolian origin. The proof of this origin is that they can be morphologically etymologised from Mongolian.

čaḡan 'white' < **ča* cf. časun 'snow', or *čaga* cf. MNT *čaga'an*, *čaḡān* 'white'; *nogō-ghan* 'green' < **nogō* cf. Zhiyuan Yiyu *nu'o* 'blue, indigo'; *ula-ghan* 'red' < **ula* cf. *ulayi-* 'to get red-hot, to become red, reddens' (Lessing 870a); *ya-ghan* 'pink' < **ya*.

2.5. The morphological structure of the basic colour names

In Mongolian there are 5 word-stem types. These are: (*C)V-; (*C)VC-*; (*C)VCV-*; (*C)VCVC-*; (*C)VCCV-. Every suffix added to colour names has an initial consonant. All Mongolian basic colour names end in a vowel or in -*n*, *y* (=ng).**

According to the development of the final *-*n* of noun stems, Mongolian languages may be divided into two groups. In the first group the final -*n* disappears, in the second it is preserved.

In Mongolian comparative studies it is accepted as a general rule that if a derivative suffix is added to a word with final -*n*, then the -*n* disappears (Poppe 1955, p. 166).

So, when a suffix is added to colour names we get the following cases:

stem <i>V</i> +suffix → stem <i>V</i> +suffix:	e.g. <i>borobtur</i> ← <i>boro</i> + <i>btU</i> ; <i>kökemdiğ</i> ← <i>köke</i> + <i>mdUG</i> ;
stem <i>V</i> +suffix → stem+suffix:	e.g. <i>gartu</i> ← <i>gara</i> + <i>tU</i> ; <i>borjin</i> ← <i>boro</i> + <i>jin</i> ;
stem <i>n</i> +suffix → stem+suffix:	e.g. <i>čaḡabir</i> ← <i>čaḡan</i> + <i>bir</i> ; <i>uläğaljai</i> ← <i>uläğan</i> + <i>ljAi</i> ;
stem <i>y</i> +suffix → stem <i>(y)</i> +suffix:	e.g. <i>kürengdū</i> ← <i>küreng</i> + <i>dU</i>

In many cases the last vowel of the colour name disappeared when a suffix was added to the word, which made it difficult to decide whether or not the word was related to the colour name, but such forms as MNT *borqai* and Houa-yi yi-yu *boroxai* are convincing.

On the basis of this work we can reconstruct colour-name stems such as **ča*, **ula*, **nogō*. In some cases we have to take dialectical differences into consideration, as in the case of *boro* and Muq. *bora*¹⁴ (Poppe 1938, p. 121b).

2.6. The typology of the set of Mongolian basic colour names

In 1967–1969 Brent Berlin and Paul Kay collected colour-name data from 98 languages. The aim of their work was to disprove Edward Sapir and B. L. Whorf's hypothesis that "each language is semantically arbitrary relative to every other language" (Berlin – Kay 1969, p. 2). They found that "although different languages encode in their vocabularies different numbers of basic color categories, a total universal inventory of exactly eleven basic color categories exists from which the eleven or fewer basic color terms of any given language are always drawn. The eleven basic color categories are white, black, red, green, yellow, blue, brown, purple, pink, orange, and grey" (Berlin – Kay 1969, p. 2). The results of their work were summarised in a table containing the 22 existing types of basic colour-name systems (Berlin – Kay 1969, p. 3).

According to the criteria defined by Berlin and Kay (Berlin – Kay 1969, pp. 2–3), the following basic colour names are found in the Mongolian language: *čaḡan* 'white', *qara* 'black', *uläğan* 'red', *nogō-ghan* 'green', *sira* 'yellow', *köke* 'blue', *küreng* 'brown', *yagan* 'pink', *boro* 'grey'. This set of colour names classifies the Mongolian language as belonging to the 14th type of colour-name system cited in Berlin – Kay (1969, p. 3).

¹⁴ The case when we find an -*a*- in the place of LM -*o*- is a West-Mongolian phenomenon.

3. Suffixes used with colour names

3.1. Introductory remarks

Suffixation is the most common way of forming words in the Mongolian language. Suffixes may be added to absolute stems or to derivatives.

The aim of this paper was to find out if there are such suffixes in Mongolian languages that show affinity only to colour names. Suffixes were divided into two groups: those used with colour names and other lexical groups, and those restricted to colour names.

3.2. Suffixes used with colour names and other lexical groups

3.2.1. Suffixes forming denominational nouns

3.2.1.1. LM +bči

Function: To form nouns designating covers of objects (GWM §108), e.g.: čikibči 'cover for ears' < čikin 'ear'; dalubči 'wing' < dalu 'scapula'; quruğubči 'thimble' < qurığın 'finger'; niđubči 'cover for eyes, eye flap' < niđin 'eye'

with colour names it forms names of animals:

LM +bči

kokebči 'kapskij golubok' /Lat. Daption capensis/; sirabči 'černyj al'batros' /Lat. Diomedea nigripes/ (NT 96–97, p. 168)

Khal. +wč

xoxöwč 'kapskij golubok'; šarawč 'černyj al'batros' (id.)

3.2.1.2. LM +či(n)

Function: To form nouns designating names of vocations (GWM §114). In Ramstedt's opinion, the original meaning of this suffix was Nomen Actoris, but later its use was extended to form names of animals (Ramstedt 1952, §116), e.g.: qončiči 'shepherd' < qonin 'sheep'; malčiči 'herdsman' < mal 'cattle'; qotaci 'watchdog' < qota(n) 'city, town, village; enclosure; fortress, city wall'; qatarčiči 'Traber' < qatar 'Trab'

with colour names it denotes human characteristics:

LM +či(n)

boračin 'nom de clan' (Mostaert 1941, p. 81b); *čaǵagačin 'one who likes to eat milky foods' (B.Kh.); noǵoči(n) 'kitchen gardener; seller of vegetables' (Lessing 588b); *ulayčičin 'bloody, blood-thirsty' (B.Kh.); sirgačin 'nom de clan' (Mostaert 1941, p. 610a); qaligucin 'id.' (Mostaert 1941, p. 329a)

Khal. +čin

nogōči(n) 'ogorodnik, ovoščevod' (Luw. 269b); xarālč 'skvernoslov' (Luw. 513b)

Bur. +šA(n)

altaša 'Zakamna hozjajstvennyj' (Rassadin 1996, p. 173); sagāša 'ljubitel' moločnyh kušanij' (BurRS 382a); ulaiša 'krovavyj, krovožadnyj' (BurRS 467b); xaršan 'žestokij, svirepj' (BurRS 558a); xarālšan 'ljubiletel' rugat'sja, svarlivyj, vrednyj' (BurRS 549b)

Ord. +tš'i(n)

boro'tš'in 'nom de clan' (Mostaert 1941, p. 81b); džere'tš'in 'id.' (Mostaert 1941, p. 192b); šarga'tš'in 'id.' (Mostaert 1941, p. 610a); xara'tš'in 'id.' (Mostaert 1941, p. 339a); cf. Gartš'in 'Kharatchin (nom d'une tribu mongole)' (Mostaert 1941, p. 295b); xal'ū'tš'in 'nom de clan' (Mostaert 1941, p. 329a)

with colour names it forms names of animals:

LM +či

časuci čegčedei 'snežnyj v'jurok; želtospinnaja trjasoguzka' /Lat. Montufringilla nivalis/ (NT 96–97, p. 205) < časun 'snow'; qaraci 'der Wasserrabe' (KWb 170b)

Khal. +č

casč cegčedei 'snežnyj v'jurok; želtospinnaja trjasoguzka' /Lat. Montufringilla nivalis/ (NT 96–97, p. 205); xarč 'krasnolicyj baklan' /Lat. Phalacrocorax urile/ (NT 96–97, p. 173)

Kalm. +tši

xartši 'der Wasserrabe' ~ xar'a galan (KWb 170b)

3.2.1.3. LM+dA

Function: NN (Szabó 1943, §153). E.g.: Kalm. az^d ~az^da 'frech, unverschämt, wild, unbändig, verdrießlich' < az^a 'böser Geist, Dämon'; gaňga^d 'die trockene, heiße Zeit im Sommer' < gaň 'große Hitze, Dürre (im Sommer)'; xagd^d 'vorjähriges Gras, verwelktes Gras (mitten im Grünen)' < xag 'ganz trocken'

with colour names it forms names of animals:

LM+dA

čaǵda 'junges Antilopenweibchen' (KWb 419b)

Bur. +dA

xulda 'lun' (ptica): boro x.~ tařin x. 'lun' polevoj', ütegei x. 'lun' lugovoj', xulhanai x. 'lun' bolotnyj' (BurRS 600a)

Kalm. +da

tsagda 'junges Antilopenweibchen' (KWb 419b)

with colour names it forms the name of a plant:

LM+dA

borda 'steljuščejea rastenie: mnogolistvennyj žasmin' (Kowalewski 1218b)

3.2.1.4. LM+dAi

Function: Diminutive suffix (Čeremisov 1951, p. 818). In the language of the MNT the role of this suffix is to denote masculine genus, used mostly with clan names.¹⁵ E.g.: *degiidei* ‘younger brother or sister’ < *degū* ‘id.’; *aqadai* ‘bratee’ < *aqa* ‘brat’, *abagadai* ‘djadjuška’ < *abaga* ‘djadja’

LM+dAi

*čagačadai ‘whitish’ < čagačan (B.Kh.); *sirgadai ‘yellowish’ < sirga (B.Kh.); *ulačadai ‘reddish’ < ulačan (B.Kh.); *qaradai ‘blackish’ (B.Kh.)

with colour names it forms names of animals:

Bur. +dAi

sagādai ‘provišče belogo životnogo, Beljanka’ (BurRS 380b); *šargādai* ‘prozvišče želtoživotnogo, Želtinka (*laskovoe obraščenie k losadi solovoj masti*)’ (BurRS 722b); cf. *šargādai* ‘Barguzin id.’ (Castrén 1857, p. 138b); *ulādai* ‘Krasnuška (*o korove*)’ (BurRS 466a); *ulāndai* ‘Khori odnoletnjaja molodaja samka olenja’ (BurRS 467a)

Kalm. +dā

xarādā ‘Schwärzling; als Vogelname: Schwalbe’ (KWB 168b)

Ord. +dā

tš'agāndā ‘nom qu'on donne à des enfants’ (Motaert 1941, p. 692a); *ulādā* ‘nom qu'on donne à un chien roux foncé’ (Motaert 1941, p. 728b); *ulāndā* ‘nom qu'on donne à des enfants’ (Motaert 1941, p. 729b)

with colour names it forms names of plants:

LM+dAi

yagāndai ‘bužér’ /Lat. Rubia/ [madder] (Kara 1998, p. 749a)

Khal. +dAi

yagāndai ‘bužér’ /Lat. Rubia/ [madder] (Kara 1998, p. 749a); *jürxen y.* ‘ser-dečnaja marena’ /Lat. Rubia cordifolia L./ (NT 59–60, p. 34)

3.2.1.5. LM+G

Function: NN (Szabó 1943, §156). E.g.: *gójig* ‘schräg, schief, Schräigkeit, Schieffheit, zurückgebogen’ < *góji* ‘schräg, schräg, falsch, nicht richtig’; *boğonig* ‘kurz, kurzgewachsen’ < *boġoni* ‘kurz, niedrig’; *ölüg* ‘hungry’ < *ölü* ‘hungry’

with colour names it forms names of plants:

LM+G

siraǵ ‘imbir, kurkuma’ (Kowalewski 1522a); *boraǵ* ‘čašča, gustaja rošča, lešok’ (Kowalewski 1212b)

¹⁵ Cf. *borjigidai* [MNT 3] ‘a male who belongs to the Borjin clan’; *urianggadai* [MNT 12] ‘a male who belongs to the Uriangtan clan’. The feminine parallel of this suffix was the suffix *+jin*, cf. *monggoljin* [MNT 3] ‘a female who belongs to the Mongol clan’.

Kalm. +G

bor^oG ‘graues, altes Gras’; *boG bor^oG* ‘schlechtes Heu, welkes Gras’ (KWB 51b)

3.2.1.6. LM+GAI/+KAi

Function: NN: Compound suffix which consists of the NN +KA and NN +yi (Szabó 1943, §172). E.g.: *qorqai* ‘insects and worms in general’ < *qoro* ‘poison’; *danggai* ‘einfach, nicht doppelt, ungebildet’ < *dang* ‘nur, allein, einfach’; *gongqorqai* ‘rundes Loch, runde Vertiefung, Grube (*in der Erde*)’ < *qonqor* ‘runde Vertiefung, rund und tief’; *küttegei* ‘sehr kalt, große Kälte’ < *kütten* ‘kalt, Kälte’

Bur. +xAi

ulāxai ‘petušinnij grebešok’ (Budaev 1992, p. 91)

with colour names it forms names of plants:

LM+GAI

qaraǵai ‘listvennica’: *sira q.* ‘želtaja pihta’, *toson q.* ‘temnokrasnaja pihta’ (Kowalewski 844b)

Khal. +gAI

xargai ‘sibirskaja listvennica’ /Lat. Larix sibirica/ (Luw. 515a)

Kalm. +GA

xargā, *xargā* ‘Tanne od. Lärche; Nadelholz’ (KWB 169a)

with colour names it forms the name of an animal:

LM+GAI

**siraǵai* ‘nom qu'on donne à un chien fauve’¹⁶ (Motaert 1941, p. 610a)

Ord. +gā

šargā ‘id.’

with colour names it denotes human characteristics:

MNT+KAi

borgai ‘Ururgroßvater, Ahn’¹⁷ (Haenisch 19) [MNT 180]

Houa-yi yi-yu +xAi

boroxai ‘trisailev’ (Lewicki 21)

3.2.1.7. LM+GANA/+GUmA

Function: To form “names of plants, animals, and some diseases mostly from primary stems which denote qualities characteristic of the object (*plant, animal, disease*) denoted by the secondary noun” (Poppe 1981, p. 384). “The words ending in +GANa denote mostly such plants (*or animals*) which occur in large numbers in one place and are relatively small and difficult to separate from each other, e.g. bushes forming a thicket, insects swarming all over a place” (Poppe 1981, p. 385). E.g.: *kedegen-e* ‘horsefly, gadfly; wasp, bumblebee’; *budurğan-a* ‘suaeda prostrata’; *bata-*

¹⁶ In Motaert's opinion, this word is a shortening of *sira nogai* (Motaert 610a).

¹⁷ There is a semantic parallel in German *der Greis* ‘alter Mann’ < *gris* ‘gray’.

ğan-a ‘gnat, small fly; mosquito’; *kilağan-a* ‘feather grass’; Bur. *xailgana* ‘zool. čajka’

with colour names it forms names of animals:

Leiden +KUnA

qulquna ‘Maus’ (Poppe 1928, p. 64)

Phags-pa +KAnA

qulqana ‘mouse’ (Ligeti 1973, p. 63; Poppe 1957, p. 129b)

Nuzhatu-^l-kulüb +KUnA

qul^lquna ‘rat’ (Pelliott 1931, p. 563)

Houa-yi-yu +UNa/ +KAnA

hara'una ‘Wasserhuhn’ /Lat. *Fulica atra*/ (Haenisch 1957, nr. 215); *huluqana* ‘Ratte’ (Haenisch 1957, nr. 161)

Muq. +GUñA

qulquna ‘mys’, *krysa*’ (Poppe 1938, p. 309a)

Istanbul +GUñA

qulquna ‘souris’ (Ligeti 1962b, p. 46)

LM +GAnA/+GUñA

alagana ‘nazvanie rybki, iz roda snjatkov’ (Kowalewski 81a); *altağan-a* ‘am’-tan bie cox şar öngötei neg jüil *xarācāt*’ (Cewel 1966, p. 35a); *qarağun-a* (~ *qaragana*) *qaljan* ‘bird resembling the crow with a bald spot on its head, a white beak; coot’ (Lessing 933b); *qulqana* ‘mouse, rat’ (Lessing 984b) ~ *qulqana* (Kara 1998, p. 615a); *mogayıči* q. ‘faraonovaja krysa’ /Lat. *Herpestes ichneumon*/ (NT 96–97, p. 116), *cığçı* q. ‘belobrjuhaja belozubka’ /Lat. *Crocidura leucodon*/ (NT 96–97, p. 115), *jigür-tü* q. ‘letučaja myš’” (NT 96–97, p. 114)

Khal. +gAnA

algana sigos ‘amurskij jaz’ /Lat. *Leuciscus waleckii*/ (NT 96–97, p. 128); *alıgana* ‘zélyti striž, kamenniy striž’ /Lat. *Apus pallidus*/ (NT 96–97, p. 64); *xargana xaljan* ‘lysuba’ /Lat. *Fulica atra*/ (NT 96–97, p. 45); *xulgana* ‘egér /Mus/’, patkány /Rattus/ [mouse, rat] (Kara 1998, p. 615a); *mogoč* x. ‘faraonovaja krysa’ /Lat. *Herpestes ichneumon*/ (NT 96–97, p. 116), *cığç* x. ‘belobrjuhaja belozubka’ /Lat. *Crocidura leucodon*/ (NT 96–97, p. 115), *jigür* x. ‘letučaja myš’” (NT 96–97, p. 114)

Bur. +gAnA~gAnĀn

xulgana-xulgânán ‘myš’” (BurRS 600a); *morin* x. ‘polevaja myš’, *al'ganşa* x. ‘krot’ (BurRS 600a); *algana* ‘okun’” (BurRS 41a); cf. *alagana* ~ *algana* ‘Nižneudin., Tunka, Barguzin un petit poisson de l’espèce des chabots’ (Castrén 1857, p. 88a)

Kalm. +GⁿA

xulgⁿa ‘Maus’ (Kwb 196a)

Ord. +GUñA

xuluguna ‘rat, souris’ (Mostaert 1941, p. 367b)

Mngr. +GlA

xanaGla ‘souris, rat’ (Mostaert – De Smedt 1933, p. 155)

Şera-yögür +glAg
hunaglag ‘souris, rat’ (Mostaert – De Smedt 1933, p. 155)

with colour names it forms names of plants:

MNT +qAnA

qaragana ‘Dickicht, Gestrüpp, Bezeichnung einer Marschordnung’ (Haenisch 1939, p. 60) [MNT 107, 122, 195]

LM +GAnA/+GUñA

ulâgana ‘kislica’ (Kowalewski 397a); *qarağun-a* ‘nazvanie dereva’ (Kowalewski 833a); *qarağan-a* ‘kargana’: *altan* q. ‘zolotarnik, židovnik’, *boro* q. ‘železnik, stepnaja čiliga’, *mönge* q. ‘maeran’ (Kowalewski 844b); *qardağan-a* ‘nizkij kustarnik’ (Kowalewski 849b)

Khal. +gXnX

ulâgana ‘smorodina krasnaja’ (Luw. 450b): *gašūn* u. ‘gor’kaja smorodina’, *xar* u. ‘černaja smorodina’ /Lat. *Ribes atropurpureum* C.A.M./, *gō* u. ‘smorodina krasivaja’ /Lat. *Ribespulchellum* Turcz./, *xad öndör* u. ‘smorodina vysokaja’ /Lat. *Ribes graveolens* Bge./ (NT 59–60, p. 51); *xargana* ‘karagana, borsófa’ /Lat. *Caragana Lanj.* (Kara 1998, p. 560a): *altan* x. ‘belokoraja karagana’ /Lat. C. leucophloë Pojark./, *bor* x. ‘karagana Bunge’ /Lat. C. Bungei Ldb./; *modlig* x. ‘drevovidnaja karagana’ /Lat. C. arborescens Lam./ (NT 59–60, p. 24), *mönx* x. ‘piptant mongol’skij’ /Lat. *Piptanthus mongolicus* Maxim./, *temēn* x. ~ *śiwärk* x. ‘koljučaja karagana’ /Lat. C. spinosa (L)DC/, *ulān* x. ~ *tarwagan* x. ‘karlikovaja karagana’ /Lat. C. pygmaea (L)DC/, *ixer* x. ‘melkolistnaja karagana’ /Lat. Bur. +gXn(X)

ulâgana ‘kislica’: *gazarai* u. ‘kostjanka’, *modonoj* u. ‘zap. krasnaja smorodina’ (BurRS 466a); cf. *Nižneudin.* ‘brusnika’ (Rassadin 1999, p. 136); *xargana* ~ *xarganán* ‘karagana’: *altan* x. ‘zolotarnik, karagana zolotistaja; zap. kusty, kustarnik’ (BurRS 554b); cf. *kargana* ‘Nižneudin., Tunka Spierpflanze’ (Castré 1857, p. 109a), *xargan* ‘Okin.soet. ernik, karlikovaja bereza; Oka venik djla podmetanija pola; Zakamna metla, venik’ (Rassadin 1996, p. 202); *zedegene* ‘klubnika, zemljanika’ (BXTTT 59)

Ord. +gAnA~gAnAk

xargana ~ *xarganak* ‘arbuste, espèce de robinier’: *śara* x. ‘id.’, *alta* x. ‘nom d’un arbuste’ (Mostaert 1941, p. 339b)

Kalm. +GAñA

xarğana ‘Caragana (*eine Baumart aus den Papilionaceae*)’ (KWb 169a);
ul'ğana ‘eine Pflanze mit roten Beeren’ (KWb 448b).

with colour names it forms names of diseases:

LM +GAñA

**qulağana ebüčin* ‘chlorosis, green sickness’ (B.Kh.)

Khal. +gAñA

xulgana öwčin ‘blednaja nemoč’ (ANT 15).

3.2.1.8. LM+GUi

Function: NN. E.g.: (*ulabur*) *argui* ‘petuški, cvetki’ /Lat. iris Sibirica/ (Kowalewski 397b) <*ariğun* ‘čistýj’; *yargui* ‘kókoresín’ /Lat. Pulsatilla/ [pasqueflower, anemone] (Kara 1998, p. 755b) <*yar* ‘knot, nodule’

with colour names it forms the name of a plant:

LM+GUi

alǵui ‘sarsaparilla’ (Lessing 31a)

Kalm. +GU

alǵū ‘Sassaparille (*Pflanze*)’ (KWb 7a)

3.2.1.9. LM+iyAčAi~ +GAčAi¹⁸

Function: To form nouns designating names of plants and animals (Dondukov 1964, p. 25; Rassadin 1999, p. 67). This suffix is productive only in the Buriat language. E.g.: Bur. *mışgei* ‘koška’ (cf. LM *mī*, Khal. *mī* onomatopoetic word); *xyürősgei* ‘pus-tel’ga’ <*xyürő* ‘pila’; cf. *saryüsgei* ‘prekrasnyj, velikolepnyj’ <*saryūn* ‘prekrasnyj, velikolepnyj; bodryj, energičnyj’

with colour names it forms names of animals:

Houa-yi yi-yu +iyAčA

xariyača ‘hirondelle’ (Lewicki 1959, p. 44)

Zhiyuan Yiyu +iyAčA

gariyača ‘swallow’ (Kara 1990, p. 316)

LM+iyAčAi~ +GAčAi

gariyačai ~ *qaraǵačai* ‘swallow, martin’ (Lessing 938b); *elesün q.* ‘pesčanaja lastočka, kamennyj striž’, *erügcí q.* ‘domašnjaja lastočka’, *ičikü q.* ‘striž, okolevajući na zimu v duplah’, *oron q.* ‘rod lastočki’, *üker q.* ‘kasatka’, *goton q.* ‘mongol’skaja lastočka’, *qonin q.* ‘striž’, *morin q.* ‘bol’soj vid lastočki’ (Kowalewski 843)

Khal. +AčAi

xarācái ‘lastočka’: *altan x.* ‘lastočka derevenskaja’, *temēn x.* ‘striž’, *üker x.* ‘kasatka’ (Luw. 513b), *berelesní x.* ‘parti feeske’ /Lat. Riparia riparia/ [bank swallow] (Kara 1998, p. 558a), *ičix x.* ‘pal’movij striž’ /Lat. Cypsiurus par-

vus/, *morin x.* ‘belopojasnyj striž’ /Lat. Apus pacificus/, *örxöč x.* ‘kasatka, de-revenskaja lastočka’ /Lat. Hirundo rustica gutturalis/, *uran x.* ‘ryžepojasnič-naja lastočka’ /Lat. Hirundo daurica/, *xatan x.* ‘gornaja lastočka’ /Lat. Hirundo rupestris/, *xiatrun x.* ‘jurok’ /Lat. Fringilla montifringilla/, *xonin x.* ‘malýj striž’ /Lat. Apus affinis/ (NT 96–97, p. 64)

Bur. +ĀsgAi

xarásmai ‘lastočka’: *morin x.* ‘lastočka-kasatka; lastočka temno-koričnevogo cveta (živuščaja v gol’cah)’, *üker x.* ‘derevenskaja lastočka’, *xonin x.* ‘lastočka beregovaja; Tunka lastočka belogrudaja (v’juščaja gnezda u domov)’, *er’ein x.* ‘lastočka beregovaja’ (BurRS 549b); cf. *Selenga xarācagai* (Castrén 1857, p. 109a); *xüxesgei* ‘Bohan trjasoguzka’ (BurRS 636b) ~ ‘sinica’ (Dondukov 1964, p. 26); cf. *xixsegeldei* ‘Zakamma trjasoguzka’ (Rassadin 1996, p. 206)

Ord. +ts^cĀ ~ +ēGAi

xard’is’ū ‘hirondelle’ (Mostaert 1941, p. 338b); *ađū x.* ‘nom d’endroit (*Otok*)’ (Mostaert 1941, p. 4b), *Ga’tū x.* ‘hirondelle ordinaire qui loge dans les maisons’ (Mostaert 1941, p. 299a), *ü’ker x.* ‘espèce de grande hirondelle’ (Mostaert 1941, p. 754a); cf. *xarācái* (Rudnev 1911, p. 140b)

Kalm. +tsā

xarātsā ‘Schwalbe’ (KWb 168b)

Mngr. +ntś’igA

xaranś’igē ‘hirondelle’ (Mostaert – De Smedt 1933, p. 159)

Širongol +jAGAi

karajagai ‘hirondelle’ (Mostaert – De Smedt 1933, p. 159)

with colour names it forms the name of a plant:

LM+iyAčAi~ +GAčAi

borgocái (cf. *borgúčug*) ‘evergreen tree cone’ (Lessing 121a)

Khal. +gocoí

borgocoi (cf. *borgocog*) ‘šíška’ (Luw. 77b)

Bur. +bōsgoi

borbōsgoi ‘šíška hvojnogo dereva’ (BurRS 105b); cf. *Khori borgōsogoi*, *Se-lenga borgonso* (Castrén 1857, p. 169b)

3.2.1.10. LM +jin

Function: To form words which denote the age of female animals or female animal names from colour names (GWM §125; Hambis 1945, p. 7; Sanžev 1941, p. 71). In ancient texts this suffix forms words from clan names, meaning ‘woman from the ... tribe’. The word for granite is not found in earlier texts, it occurs only in modern languages. E.g.: MNT *mongoljin* ‘Mongolian woman’ <*mongol* ‘Mongol’; *barqu-jin* ‘Bargu woman’ <*barqu* ‘name of a tribe and country in Northwest Manchuria’; LM *ǵunajin* ‘la vache de trois ans’ <*ǵunan* ‘le boeuf de trois ans’ <*ǵurban* ‘trois’; Bur. *dünžen* ‘četyrehletnjaja samka (*krupnyh životnyh*)’ <**diu*: cf. *dünen* ‘četyrehlet-nij (samec)’; *dürben* ‘4’

¹⁸ *iyAčAi* <**iGAčAi* <*GAčAi*.

with colour names it forms the name of an animal:

- LM +jin
borjin nuğusun ‘rod dikoj utki’ (Kowalewski 1223b)
- Khal. +jin
borjin nugas ‘vadkacsa’ [wild duck] (Kara 1998, p. 66b)
- Bur. +žOn
boržon ‘utka (samka)*’ (BurRS 105b)
- Kalm. +džn
bordžn nuğ^usn ‘wilde Ente (das Weibchen)’ (KWb 51b)
- with colour names it forms the name of a metal:*
- Khal. +jin
borjin ‘gránit’ [granite] (Kara 1998, p. 66b)
- Bur. +žon
boržo(n) ‘fol^uk. čekannyj, massivnyj, granitnyj’ (BurRS 105b)

3.2.1.11. LM+I

Function: NN (Szabó 1943, §160). E.g.: *sabal* ‘ein großer Napf od. eine Schale mit Stiel’ <*saba* ‘Gefäß (im allgemeinen), Behälter’; *góbil* ‘niedrige Stelle, Vertiefung’ <*góbi* ‘Steppe, niedrige trockene Ebene’

with colour names it forms the name of a metal:

- LM+I
kürel ‘bronze’ (Lessing 504b)
- Khal. +I
xürel ‘id.’ (Luw. 577b)
- Kalm. +I
kürl ‘Bronze, Legierung’ (KWb 247b)

3.2.1.12. LM+IAi

An infrequent suffix. Ramstedt’s opinion that it may be a compound suffix in *-l-Ai* is probably based on *taulai* and its Turkic parallel (Ramstedt 1952, §105). I cannot agree with him, because there is no *-Ai* NN suffix in Mongolian. E.g.: *Qubilai* ‘Kubilai kan’ <*qubi* ‘dolja, sčast’e’; Khal. *dewēlei* ‘letnjij pomet zajca’ <*dewē* ‘narost’; *kiragulai* ‘pozdnejaja osen’ <*kiragu* ‘zrelost’; *taulai* ‘zajac’

with colour names it forms names of animals:

- LM +IAi
**čagalai* ‘nom qu’on donne à un chien blanc’ (B.Kh.); **nogolai* ‘junge Hasen im Frühjahr’ (B.Kh.)
- Khal. +IAi
nogōlai ‘vesennij pomet zajca’ (Ramstedt 1952, §105)
- Bur. +loi
borloj ‘Oka sivyj (o lošadi)*’ (Rassadin 1996, p. 175)

- Ord. +lä
ts’agälä ‘nom qu’on donne à un chien blanc’ (Mostaert 1941, p. 691a)
- Kalm. +lä
noğälä ‘junge Hasen im Frühjahr’ (KWb 278b)

3.2.1.13. LM+IdAi

Function: Diminutive suffix (Dondukov 1964, p. 23). E.g.: *abaǵaldai* ‘a shamanistic idol; a mask representing a shamanistic god’ <*abag-a* ‘paternal uncle’; cf. Bur. *abgal dai* ‘djadjuška’ <*abga* ‘brat oteca, rodnoj djadja’; *bābgaldai* ‘medved’ <*bābgai* ‘id.’; *abaxaldai* ‘paulk’ <*abāxai* ‘id.’; *bōxoldoi* ‘domovoj, duh, čert’ <*Bōxon* ‘name of a West-Buriat tribe’.

with colour names it forms proper names:

- MNT +IdAi
Boroldai ‘ikiresz vitéz’ [Ikiresz valiant] [MNT 129] (Ligeti 1962a, p. 217); *Boroldai suyalbi* ‘Torokoldzsin-bajan legénye’ [Iad of Toroqoljin-bayan] [MNT 3] (Ligeti 1962a: 217); *Qaraldai* ‘Menen-tudun ötiödik fia’ [the fifth son of Menen-tudun] [MNT 45, 46]; *Qaraldai toqura'un* ‘dzsalair vitéz’ [Jalair valiant] [MNT 120, 124] (Ligeti 1962a, p. 224)

with colour names it forms names of animals:

- LM+IdAi
boroldai ‘nazvanie kakoj-to ptički, podobnoj lastočke’ (Kowalewski 1219a); *boroldai boljmor* ‘zaviruška’ /Lat. Prunella/ (NT 96–97, p. 74); *nogōldai* ‘zelenaja penočka’ /Lat. Phylloscopus trochiloides/ (NT 96–97, p. 75); *qara ldai biljūgai* ‘nestor (ptica, izvestnaja pod imenem ubijcy ovec)’ /Lat. Nestor notabilis/ (NT 96–97, p. 186)

- Khal. +IdXi
boroldoi ‘serjy (o pticah i lošadjah); Serko (klička lošadi seroj masti); lask. žávoronok’ (Luw. 78a); *boroldai boljmor* ‘zaviruška’ /Lat. Prunella/ (NT 96–97, p. 74); *nogoldoi* ‘zelenaja penočka’ /Lat. Phylloscopus trochiloides/ (NT 96–97, p. 75); *xaraldai boljmor* ‘žavoronok černyj’ (NT 78–79–80, p. 257); *xaraldai byaljūgai* ‘nestor (ptica, izvestnaja pod imenem ubijcy ovec)’ /Lat. Nestor notabilis/ (NT 96–97, p. 186)

- Bur. +IdAi
xüixeldei ‘sinica lazorevaja’ (BurRS 636a)
- Kalm. +Idä
borldä ‘der Graue (Name für kleine Vögel od. graue Pferde); Lerche’ (KWb 52a)

with colour names it forms the name of a plant:

- LM+IdAi
**siralda* ‘cole-seed, rape’ (B.Kh.)

Bur. +ldAi

śaraldai (*übhen*) ‘surepica, surepka’ /Lat. Brassica rapa rapifera/ (BurRS 721b)

with colour names it denotes human characteristics:

Ord. +ldō/ +ldā

Boroldō ‘le brun, qui a le visage brun, qui a le teint foncé’ (Mostaert 1941, p. 81a); *śaraldā* ‘n.pr.m.’ (Mostaert 1941, p. 609a)

3.2.1.14. LM +liG

Function: To form nouns designating an abundance of something (GWM §127). E.g.: *bayalig* ‘riches, wealth, prosperity’ < *bayan* ‘rich, wealthy’; *bagaturlig* ‘heroism, virility, courage’ < *baǵatur* ‘hero; knight’; *čećerlig* ~ *čećeglig* ‘flower garden; park’ < *čećeg* ‘flower’

with colour names it denotes human characteristics:

LM +liG

garaliğ ‘rab, poddannyj, nevol’nik’ (Kowalewski 834b)

Khal. +lAg

xarlag ‘ust. čern’, holop, smerd’ (Luw. 517a)

Kalm. +liG

xarlıG ‘Sklave, Unfreier’ (KWb 169b)

3.2.1.15. LM +lAng /+lOng

Function: NN (GWM §126). According to Ramstedt, this suffix occurs mostly in names of animals and it may be derived from the Chinese word *lang* ‘Tier’ (Ramstedt 1952, §109). In my opinion, this is a compound suffix in NV +lA- (GWM §245) and VN -ng (GWM §176). E.g.: *soyuǵlang* ‘a domestic animal at the age of growing new eyeteeth’ < *soyuǵ-a* ‘eyetooth’; *śidileng* ‘a domestic animal at the age of growing new teeth’ < *śidün* ‘tooth’; *tariyalang* ‘field’ < *tariyan* ‘seed’

with colour names it forms the name of an animal:

LM +lOng

borlong ‘másodfű kecskegida’ [goat in the second year] (Kara 1998, p. 66b)

Khal. +lōñ

borloñ ‘id.’ (Luw. 78a; Kara 1998, p. 66b)

Bur. +lōñ

borloñ ‘Bohan godovalyj (o barane, ovce, kozle)’ (BurRS 106a)

3.2.1.16. LM +lji(n)

Function: To form nouns designating birds, insects, and geometric figures (GWM §128). Later, in 1981, Poppe wrote that its function is to “form names of plants and animals the characteristic features of which are denoted by the nominal stem concerned. The suff. +lji is not to be confused with the suff. +ljin of names of geometri-

cal figures, e.g.: *dörbeljin* ‘square’ from *dörben* ‘four’ ” (Poppe 1981, p. 386). E.g.: *temegeljin* ‘dragon-fly’ < *temegen* ‘camel’; *sirguljin* ‘ant’; Bur. *süsagälžan* ‘bekas’; *harälžan* ‘val’dşep’; *bübölžen* ‘udod’

with colour names it forms names of plants:

Houa-yi yi-yu +ljin

siraljin ‘Kraut, Beifuß’ (Haenisch 1957, nr. 100)

LM +lji(n)

borolj(in) ‘a species of birch’ /Lat. Betula frutiosa/ (Lessing 122a); *ulalj* ‘osoka, trava’ (Kowalewski 399a); *siraljin* ‘sage-brush, /Lat. Artemisia vulgaris/’ (Lessing 715a; Kowalewski 1521a)

Khal. +ljin

borolj(in) ‘Gmelin-nyirfa’ /Lat. Betula fusca/ [Gmelin birch] (Kara 1998, p. 66b); cf. *borolj* ‘valy ili holmy s obnažennymi bokami, uvenčannye kustarnikami; pesčannye bugry, porosšie tal’nikom’ (Rudnev 1911, p. 72a); *ulalj* ‘osoka’ /Lat. Carex/ (Luw. 452a); *dag* u. ‘dvucvetnaja osoka’ /Lat. Carex dichroa Freyn., *baga* u. ‘malaja osoka’ /Lat. Carex parva Ness./, *şargal* u. ‘osoka mortukovidnaja’ /Lat. Carex eremopyroides Krecz./, *xar cecegt* u. ‘osoka černocvetkovaja’ /Lat. Carex melanantha C.A.M./, *xar tolgoit* u. ‘černogolovaja osoka’ /Lat. melanthaeformis Litv./, *xürendiñ* u. ‘osoka burovataja’ /Lat. Carex brunescens/, *xyalgasan* u. ‘osoka volosovidnaja’ /Lat. Carex capillaris L./ (NT 59–60, p. 38); *şarılıj* ‘burjan’ /Lat. Artemisia L./: *xamba* š. ‘romaška lekarstvennaja’ (Luw. 647a), *büdeg* š. ‘polyn’ nejasnaja’ /Lat. Artemisia obscura Pamp./, *cagāñ* š. ‘polyn’ belolistnaja’ /Lat. Artemisia leucophylla Turcz./, *möngön* š. ‘polyn’ cerebristolistnaja’ /Lat. Artemisia argyrophylla Ldb./, *nogōñ* š. ‘polyn’ zelenaja’ /Lat. Artemisia viridis Willd./, *şar* š. ‘polyn’ žel’tovataja’ /Lat. Artemisia xanthochroa KRach./, *torgon* š. ‘polyn’ šelkovistaja’ /Lat. Artemisia sericea Wed./, *ijsenjít* š. ‘polyn’ krasivaja’ /Lat. Artemisia venusta Pamp./, *morin* š. ‘polyn’ odnoletnjaja’ /Lat. Artemisia annua L./, *xōx nogōñ* š. ‘polyn’ seraja’ /Lat. Artemisia glauca Pall./, *yamāñ* š. ‘metelčataja polyn’ /Lat. Artemisia scoparia W. et K./ (NT 59–60, p. 44)

Bur. +lžX-+lza

borolžo ‘kustarnik, kusty; ernik’ (BurRS 106a; BXTTT 22); cf. *borolži* ‘melkij bereznjak’ (Rudnev 1911, p. 72a), *borolže* ‘Tanne’ (Castrén 1857, p. 169b); *şaralza* ‘burjan’ (BurRS 721b); cf. *şaralži* ‘Khori poželtevšaja ili opavšaja hvoja’ (Rudnev 1911, p. 157b)

Ord. +ldži(n)

Boroldžin ‘sol plus ou moins sablonneux où il n’y a ni grandes dunes, ni herbes épaisse, mais seulement de mauvaises fines herbes’ (Mostaert 1941, p. 81a); *şaralži* ‘espèce d’armoise’: *mori* š. ‘artemisia annua L. (d’après Potainin)’ (Mostaert 1941, p. 609a) ~ *şarilži* (Mostaert 1941, p. 610a)

Kalm. +lđñ

şarldžen ‘Name verschiedener großer Steppenpflanzen’ (KWb 350b)

Mngr. +rDžiñ

şirarDžin ‘armoise’ (Mostaert – De Smedt 1933, p. 398)

Durbut +*lji*

šārljī~ s'ireljī 'poželtevšaja ili opavšaja hvoja'; *š. uptu* 'klopovnik' /Lat. *Lepidium ruderale* L. / (Rudnev 1911, p. 157b), *sagan s.* 'belaja polyn' /Lat. *Artemisia vulgaris* L. v. *lucophylla* Turcz./ (Rudnev 1911, p. 118b)

Údzsūm. +*lji*

šarlī 'polyn' (Rudnev 1911, p. 157b)

with colour names it forms names of animals:

LM +*lji*

čagaljī 'krupnočešujnyj ugaj (ryba)' (NT 96–97, p. 124)

Khal. +*lj*

cagalj 'id.'

with colour names it denotes human characteristics:

LM +*lji(n)*

siraljī(n) 'černobyl'nik' (Kowalewski 1521a)

3.2.1.17. LM +*lji+GANa*

Function: To form the name of "such plants and animals which are small in size and occur in large numbers in the same place as strawberries, dragon-flies, etc. which cannot be counted easily (Poppe 1981, p. 386). Compound suffix in NN +*lji* (see under 3.2.1.16.) and NN +*GANa* (see under 3.2.1.7.). E.g.: *bögereljigene* 'raspberry bush' <*bögere* 'kidney'; *güigeljigene* 'strawberry' <*güjige* 'stomach'; *temegeljigene* 'dragon fly' <*temegen* 'camel'

with colour names it forms names of animals:

LM +*lji+GANa*

boroljigana 'černaja belka s želtovatym brjuškom' (Kowalewski 1219a); *kireljī-gene* 'sverčok' (NT 96–97, p. 147)

Khal. +*lj+gXnX*

boroljigono 'orehovaja belka' (NT 96–97, p. 111); *xüreljene* 'sverčok' (NT 96–97, p. 147)

Kalm. +*ldž+rgAnA*

kürldžergənə 'ein Insekt von dunkler Farbe' (KWb 277b)

with colour names it forms names of plants:

LM +*lji+GANa*

boruljigan-a 'shrubs, shrubbery' (Lessing 122a); *siraljagan-a* 'csorbóka' /Lat. *Sonchus/ [sowthistle]* (Kara 1998, p. 702b); *ulaljigan-a* 'krasnaja smorodina; kostjanka' (Kowalewski 399a)

Khal. +*ljgXnX*

boroljigono 'kuril'skij čaj' /Lat. Dasiphora Rydb: *sôgōn b.* 'kustarničkovyj kurl'skij čaj' /Lat. Dasiphora fruticosa L., *cón nawčít b.* 'kuril'skij čaj mel-kolistnyj' /Lat. Dasiphora parvifolia Fisch Juz. / (NT 59–60, p. 29); *šaraljana* 'osot' /Lat. Sonchus L.: *südlig š.* 'osot zubčatýj' /Lat. Sonchus dentatus Ldb., *xôdôni š.* 'osot polevoj' /Lat. Sonchus arvensis L. / (NT 59–60, p. 40); *ul-*

äljgana ~ ulān ulāgana 'smorodina krasnaja' (NT 59–60, p. 51); *cegēljene* 'kasatilleja' /Lat. Casatilleja Mutis.: *caiwär c.* 'kasatilleja blednaja' /Lat. Casatilleja pallida Kunth./ (NT 59–60, p. 24)

Bur. +*lzAgAnA*

ulâzagana 'Khori krasnaja smorodina, kislica' (BurRS 466a)

Kalm. +*ldžGANa*

šarldžyanā 'irgendeine gelbe Pflanze, viell. = *šarldžen*' (KWb 350b)

3.2.1.18. LM +*mAG*

Function: This suffix occurs in few words and these are diminutives (GWM §130; Hambis 1945, p. 6). E.g.: *nuğurmäg* 'pool' <*nuğur* 'lake' (GWM §130); *ačimäg* 'le mérite, le service, l'utilité' <*ači* 'le bienfait, le mérite' (Hambis 1945, p. 6); Bur. *xužarmag* 'nebol'sh solončaki' <*xužar* 'solončaki' (Sanžeev 1941, p. 65); Khal. *jairmag* 'moroženoe' <*jair* 'šuga'

with colour names it forms names of animals:

LM +*mAG*

siramağ 'ein Vogel: die Meise' (KWb 350b)

Kalm. +*mAG*

šarmag 'id.' (KWb 350b)

with colour names it forms names of plants:

LM +*mAG*

qarmağ 'Nittraria-cserje' (Kara 1998, p. 562b)

Khal. +*mAg*

xarmag 'selitrijanka Šoberova' /Lat. Nittraria L. / (Luw. 517b; NT 59–60, p. 50) ~ 'sondül gedeg butarxag urgamlın ür,moil met xelbertei,xün iddeg' (Cewel 1966, p. 666b): x. *teseg* 'kürčavka koljučaja' (Luw. 517b), *usan* x. 'selitrijanka vzdutoplodnaja' /Lat. Nittraria sphaerocarpa Maxim., *sibirin* x. 'selitrijanka Robrovskogo' /Lat. Nittraria sibirica Pall. / (NT 59–60, p. 50)

3.2.1.19. LM+sUn

Function: To form nouns the meaning of which is usually the same as that of the primary word (GWM §137). Ramstedt writes that this suffix emphasises the meaning of the word (Ramstedt 1952, §107). E.g.: *adugusun* 'animal' <*adugün* 'herd of horses'; *üresün* 'seed, grain' <*ür-e* 'id.'; *nilbusun ~ nilmusun* 'tears, mucus, spittle' <*nilbu* 'spittle'

with colour names it forms names of plants:

LM+sUn

kokesün 'Brennessel' (KWb 237a); *küresün* 'eine Pflanze (giffig); Süßholz' (KWb 248a)

Kalm. +*sn*

köksn 'Brennessel' (KWb 237a); *kürsn* 'eine Pflanze (giffig); Süßholz' (KWb 248a)

with colour names it forms names of natural phenomena:

- MNT +sUn
časun 'Schnee' (Haenisch 1939, p. 26) [MNT 31]; *ča'alsun* 'Papier' (Haenisch 1939, p. 24) [MNT 203]

- Širongol +dzyl /+sy
čaldzy 'papier' (Mostaert – De Smedt 1933, p. 441); *časy* 'niege' (Mostaert – De Smedt 1933, p. 444)

3.2.1.20. LM +tAn

Function: To form collective nouns, the plural of words (GWM §139). We may add to this definition that words formed with this suffix denote only human groups. The only exception is the word *amitan* 'living being, animal'. Originally, this suffix was the plural form of the suffix *+tA*, which later became an independent suffix, therefore, it may also denote singular forms. E.g.: *erdemten* 'learned person(s), scholar(s)' < *erdem* 'knowledge, learning; science'; *oyutan* 'intelligent ones; students'; *intelligents'* < *oyun* 'intellect, mind, intelligence; wisdom'; *amitan* 'animal' < *amin* 'life'; *gemten* 'the guilty or indicted one(s)' < *gem* 'defect; disease, ailment'; Bur. *moriton* 'konnica' < *morin* 'losad'

with colour names it denotes human characteristics:

- LM +tAn
čagantan 'polit. white Russians' (Lessing 158b); *ulagantan* 'tör. a vörösök' [red Russians (political)] (Kara 1998, p. 490a); **qaratan* 'bad, evil people' (B.Kh.)
- Khal. +tAn
cagantan 'belogvardeec, belogardejcy' (Luw. 601b); *ulāntan* 'polit. krasnye' (Luw. 451a)
- Bur. +tAn
sagāntan 'belye, belogardejšina' (BurRS 382a); *ulāntan* 'krasnye' (BurRS 467a); *xaratan* 'zlye, kovarnye' (BurRS 552b)
- 3.2.2. Suffixes forming adjectives
- 3.2.2.1. LM +čAr
- Function: Diminutive suffix (GWM §113; Szabó 1943, §192; Dondukov 1964, p. 95; Čeremisov 1951, p. 831). E.g.: *baǵačar* 'ziemlich klein od. jung, etwas kleiner, jünger' < *baǵa* 'klein, jung'; *torgāncár* 'type of coarse silk' < *torgān* 'silk'; cf. Kalm. *büdülüs* 'ziemlich grob, ganz dick, größer, dicker' < *biđūn* 'grob, dick' (Szabó 1943, §192); Bur. *xüttenser* 'prohladnyj, holodnovatyj' < *xüttien* 'holodnyj'
- LM +čAr
alaǵčar 'etwas bunt, etwas weiß und dunkel' (KWb 7b); *boročar* 'greyish; brownish' (Lessing 121b); **nogōčar* 'greenish' (B.Kh.); *sıračar* 'ziemlich gelb, gelblich' (KWb 351a); *qaračar* 'blackish' (GWM §113); *kürengčer* 'etwas dunkelbraun, mit einer Schattierung von dunkelbraun od. dunkel-violett' (KWb 248a); **ulaǵačar* 'reddish' (B.Kh.)
- Bur. +sXr
nogōsor 'čut' zelenovatyj' (o pole vesnoj B.Kh.) (BurRS 329a); *xarasar* 'černovatyj, temnovatyj' (o brovjah B.Kh.) (BurRS 552b); *šasar* 'želtyj' (BXTT 163)
- Khal. +cXr
borcor 'serovatyj; bolee seryj, čem drugie' (Luw. 78b)

Kalm. +(n)tsr

ař'ktsr 'etwas bunt, etwas weiß und dunkel' (KWb 7b); *tsagātsr ~ tsagāntsrs* 'ziemlich weiß' (KWb 419b); *šarts'r* 'ziemlich gelb, gelblich' (KWb 351a); *xar'tsr* 'ziemlich schwarz schwärzer' (KWb 170b); *bor'tsr* 'ziemlich grau, etwas grau, grauer (*als etwas anderes*)' (KWb 52b); *ulāntsrs* 'stark rotgefärbt, hellrot' (KWb 448a); *kirmtsr* 'etwas dunkelbraun, mit einer Schattierung von dunkelbraun od. dunkel-violet' (von *Tuch, Papier, Wald in der Ferne u.a.*) (KWb 248a)

3.2.2.2. LM +či(n)

Function: NN (Dondukov 1964, p. 85). E.g.: *sijūgči* 'devout, pious, religious' < *sijūg* 'religious worship, faith, belief, piety'; Bur. *xatarşa* 'rysistyj (o kone)' < *xatar* 'tanec'; *tuhāša* 'usužlivyj' < *tuhā* 'pomošč'; *öntegše* 'obidčivyj' < *önteg* 'obidčivost', mmitel'nost' (Sanžeev 1941, p. 114)

MNT +čin

borčin 'greyish': cf. *borčin sono* 'Entenart' (Haenisch 1939, p. 19) [MNT 200]

LM +čin

borčin 'id.'; *borčin sono* 'seryj slepen'; *šeršen'* (Kowalewski 1223a); *čagči* 'whitish': cf. *čagči čečeg* 'čajnaja roza' /Lat. Rosa chinensis/ (NT 89–90, p. 145)

Khal. +č

cagč ceceg 'čajnaja roza' /Lat. Rosa chinensis/ (NT 89–90, p. 145)

3.2.2.3 LM +dA1

Function: Diminutive suffix (Dondukov 1964, p. 89). E.g.: Bur. *halandai* 'neostorožnyj, neakkuratnyj, nebrežnyj' < *halan* 'nerjašlivyj, neoprajatnyj'

LM +dAi

**noğogadai* 'greenish' (B.Kh.); **ulağadai* 'reddish' (B.Kh.)

Bur. +dXi

noğodoi 'zelenen'kij' (BurRS 328b); *ulādai* 'krasnen'kij' (BurRS 466a)

3.2.2.4. LM +KAi

Function: Diminutive suffix (Dondukov 1964, p. 84; Ramstedt 1952, §98; Orlovskaya 1961, p. 86). A compound suffix which consists of the NN +KA and NN +yi (Szabó 1943, §172; Hambis 1945, p. 7). E.g.: *mağquai* 'ugly, nasty' < *mağu* 'bad, evil'; *tusqai* 'special, particular; independent' < *tus* 'afore-mentioned, specified or said'; *dangqai* 'einfach, nicht doppelt, ungebildet' < *dang* 'nur, allein, einfach'

with colour names it forms a proper name:

MNT +KAi

Qaraqai toqura'an 'dzsalair vitéz' [Jalair valiant] (Ligeti 1962a, p. 224; Rzewieltz 1972, p. 3033) [MNT 120]

3.2.2.5. LM +KAn

Function: A very productive suffix which forms nouns designating diminutives, sometimes female beings (GWM §124; Ramstedt 1952, §99). E.g.: *inağqan* 'lubitmen'kij' < *inağ* 'lubitmen'j'; *amtataiqan* 'vkusnen'kij' < *amtatai* 'vkusnyj'; *adalıqan* 'soveršenno pohožij' < *adali* 'pohožij'; *arıguqan* 'ocen' čistij' < *arığın* 'čistyj, svatoj'

LM+KAn

čágagan 'belovatyj, dovol'no belyj, beljavij' (Kowalewski 2084a); *čegeken* 'somewhat white or light' (Lessing 169b); *nogogagan* 'dovol'no zelenyj, zelenovatyj' (Kowalewski 680a); *kökeken* 'sinevatyj, lasurevyj' (Kowalewski 2627a); *qaraqan* 'dovol'no černyj, černovatyj' (Kowalewski 830b); *siraqan* 'želtovatyj, dovol'no želtyj' (Kowalewski 1520a); cf. *siraqan tas* 'želtovatyj aist (*pitica, obitajuščaja v pole, kogda sozrevaet pšenica*)' (NT 96–97, p. 21); *ulağagan* 'dovol'no krasnyj, krasnovatyj, krasnen'kij' (Kowalewski 397a)

Khal. +xXn

cagāxan 'belen'kij' (Luw. 601b); *nogōxon* 'greenish' (B.Kh.); cf. *nogōxon nugas* 'čirok-svistunok' (NT 78–79–80, p. 245); *xarxan* 'černen'kij' (Luw. 517b); *xōxōxān* 'bluish' (B.Kh.); *xürexen* 'brownish' (B.Kh.); *šarxan* 'yellowish' (B.Kh.); cf. *šarxan tas* 'želtovatyj aist' (NT 96–97, p. 21); *ulāxan* 'reddish' (B.Kh.); *yagāxan* 'pinkish' (B.Kh.)

Bur. +xXn

boroxon 'seren'kij, prosten'kij' (BurRS 106b); *sagāxan* 'belen'kij' (BurRS 382a); *nogōxon* 'greenish' (B.Kh.); *xarxan* 'černen'kij' (e.g.: x. *sai* 'ej bez moloka'; x. *ger* 'počernevšij ot vremeni dom') (BurRS 553b); *xürexen* 'si-nen'kij, goluben'kij (o *cvetah*); *blednen'kij* (o *lice*) (BurRS 637a); *xüriyen* 'brownish' (B.Kh.); *šaraxan* 'želten'kij (o *ptencíke*) (BurRS 722a); *ulāxan* 'krasnen'kij (e.g.: u. *solxob* '10 rublej'); *rumjanen'kij* (e.g.: u. *n'ir* 'rumjanoe liško rebenka') (BurRS 467a); *yagāxan* 'rozoven'kij' (e.g.: y. *šarai* 'rumjanoe liško') (BurRS 795a)

Kalm. +Kn / +x'n

tsegekn 'sehr durchsichtig, hell, weiß' (KWb 426a); *burx'an* 'weise? braun? alt?' *burx'an zerd' mörn'* (KWb 62a)

Mngr. +xĀn

tš'ičāxān 'un peu blanc, blanchâtre' (Mostaert – De Smedt 1933, p. 447); *noGōnxān* 'un peu vert, verdâtre' (Mostaert – De Smedt 1933, p. 281); *xaraxān* 'un peu noir, noirâtre' (Mostaert – De Smedt 1933, p. 159); *k'ucuoxān* 'bleu foncé, bleuâtre' (Mostaert – De Smedt 1933, p. 209); *širaxān* 'un peu jaune, jaunâtre' (Mostaert – De Smedt 1933, p. 398)

Aru-horč. +xAn

čágaxan 'belen'kij' (Rudnev 1911, p. 153a)

Gorlos +xAn

xarlāxan 'černen'kij' (Rudnev 1911, p. 140b)

3.2.2.6. LM +kir

Function: To form nouns designating an abundance of something (Dondukov 1964, p. 96; Sanžeev 1941, p. 115). E.g.: Bur. *modoxir* ‘neukljužij, nepovorotlivyj’ <*modon* ‘derevo’; *büdexir* ‘tusklovatyj’ <*büden* ‘vesnuški, temnovatye pjatna’

LM.+kir/-gir

čakir ‘very white, light, snow white; white spots on finger nails or on the feathers of a bird’ (Lessing 162a); cf. *čakir bürgüd* ‘beloplečij orlan’ /Lat. *Hieraetus pelagicus/* (NT 96–97, p. 24); *čakir nuğusu* ‘beloglaziy nyrok’ (NT 96–97, p. 45)

Khal.+xir

caxir ‘id.’; cf. *caxir bürged* ‘id.’; *caxir bujırğa* ‘v’jurok gornij, v’jurok žemčužnyj’ (NT 78–79–80, p. 264); *caxir nugas* ‘beloglaziy nyrok’ (NT 96–97, p. 45)

Bur.+xir

saxir ‘belesyj; blednyj’; *saxir sagān* ‘belyj-pribelyj’ (BurRS 387a); cf. *saxir* ‘Oka kakaja-to vodoplavajuščaja ptica’ (Rassadin 1996, p. 191)

3.2.2.7. LM +liG

Function: To form nouns designating an abundance of something (GWM §127). E.g.: *dabusulığ* ‘salty’ <*dabusun* ‘salt’; *miqalığ* ‘corpulent’ <*miqa* ‘meat’; *bayalığ* ‘rich, riches’ <*bayan* ‘rich’

LM +liG

alağlıq ‘motley, many-coloured’; cf. *alağlıq čeçeg* ‘minuaracija’ /Lat. *Minuartia L.* (NT 59–60, p. 35); *ćagalığ* ‘whitish’; cf. *ćagalığ gürğül* ‘belovatyj fazan’ /Lat. *Lophura whiteheadi/* (NT 96–97, p. 179)

Khal. +IXg

alaglig ‘pestrovatyj’; *alaglig ceceg* ‘id’: *tülin a. ceceg* ‘minuaracija arktičeska-ja’ /Lat. *Minuartia arctica* Stev., *xawrin a. ceceg* ‘minuaracija vesennaja’ /Lat. *Minuartia verna* L.; *borlog* ‘serovatyj’: cf. *borlog dič šuvü* ‘penočka-zar-nička’ (NT 78–79–80, p. 235); *cagalığ* ‘belovatyj’: cf. *cagalığ boljmor* ‘zav-ronok belokrylyj’ (NT 78–79–80, p. 263); *cagalığ gurgül* ‘belovatyj fazan’ /Lat. *Lophura whiteheadi/* (NT 96–97, p. 179); *xarlag* ‘černovatyj’: cf. *xarlag čogčäxoi* ‘kamenka černaja’ (NT 78–79–80, p. 257), *xarlag galū* ‘kazarka černaja’ (NT 78–79–80, p. 256)

3.2.2.8. LM +mAG

Function: Diminutive suffix (Szabó 1943, §176). E.g.: *čelmeg* ‘klar (Himmel, Tag)’ <*čel* ‘hell, hellblau, hellgrün’

LM +mAG

qaramağ ‘blackish’: *qaramağ modun* ‘sibirische Zwergrüster, karagač’ (Kwb 170a)¹⁹

¹⁹ Cf. Turkic *qaramiq* ‘ulme’ (Kwb 170a).

Kalm. +mAG

xarmaG modn ‘id.’

3.2.2.9. LM+ngGUi

Function: To form nouns designating slight shades of colours (GWM §133; Dondukov 1964, p. 93). E.g.: *degerenggűi* ‘supercilious, haughty, arrogant, conceited, presumptuous’ <*deger-e* ‘top, on top of, on, at, above’

MNT +ngKUi

garanggui ‘black, dark’ (Rachewitz 1972, p. 1831) [MNT 83]

Muq. +nGU

garanqı ‘mračnyj’ (Poppe 1938, p. 292b)

LM +ngGUI

boronggűi ‘grey, dark; darkness’ (Lessing 122b); *garanggűi* ‘dark(ness); dusk’ (Lessing 935a); *siranggűi* ‘yünni šarawtarxan öngő’ (Cewel 1966, p. 839a); cf. *siranggűi bilfüqai* ‘dubonos’ (name of animal) /Lat. *Coccothraustes/* (NT 96–97, p. 196)

Khal. +nxUi

xaranxui ‘temnyj, mračnyj; nevezhestvennyj, otstalyj’ (Luw. 514b); *śarangui* ‘yünni šaravtarxan öngő’ (Cewel 1966, p. 839a); cf. *śarangui byalixkai* ‘dubonos’ /Lat. *Coccothraustes/* (NT 96–97, p. 196)

Bur. +nxI

xaranxı ‘temnyj, mračnyj, bezradostnyj (*o dnjah*); temnyj, neblagovidnyj, po-dozritel’nyj (*o delah*); nevezhestvennyj, otstalyj, nekul’turnyj (*o čeloveke, epo-he*) (BurRS 552a)

Dagur +ñGUI

xarañgūi ‘temnota’ (Poppe 1930, p. 97b)

Ord. +ñxUI

śarañx”i ‘jaunâtre (*chèvre*), blond (*cheveux*)’ (Mostaert 1941, p. 609a); *xa-rañg”i* ‘obscur’ (Mostaert 1941, p. 338b)

Kalm. +ñGU

borıgū ‘grau, graudunkel, Finsternis’ (Kwb 52a); *bürñgū* ‘dunkel’ (Kwb 69a); *śarñgū* ‘gelblich; das verblassende Licht, gelbliche Dämmerung’ (Kwb 351a)

Mngr. +ñGU

xarañGu ‘obscurité, obscur, ignorant, stupide’ (Mostaert – De Smedt 1933, p. 159)

3.2.2.10. LM +siG

Function: Diminutive suffix (Szabó 1943, §187; Dondukov 1964, p. 85; Čeremisov 1951, p. 839). E.g.: *bağasığ* ‘little, smallish’ <*bagá* ‘small in size or quantity, little’; Bur. *tomoşog* ‘krupnovatyj’ <*tomo* ‘krupnyj’; *gašunşag* ‘gor’kovatyj’ <*gašin* ‘gor’-kij’

LM +siG

**borosiğ* 'greyish' (B.Kh.); **nogōansiğ* 'greenish' (B.Kh.); **ulağansiğ* 'reddish' (B.Kh.); **sirasıg* 'yellowish' (B.Kh.)

Bur.+sXg

borošog 'serovatýj' (BurRS 106b); *nogōnšog* 'zelenovatýj' (BurRS 329a); *ulānšag* 'dovol'no krasnyj, krasnovatýj' (BurRS 467a); *šarašag* 'želtovatýj' (BurRS 722a)

3.2.2.11. LM +tAi

Function: To form nouns designating possession, connection with, or containment in something (GWM §138). Originally, it denoted the feminine genus. Its masculine parallel is the suffix +tU. E.g. *moritai* 'a woman who rides a horse', *moritu* 'a man who rides a horse' (Hambis 1945, p. 1). Later the suffix changed its function, and today grammars refer to it as a case suffix, that is, the comitative case (Kullmann – Tserenpil 1996, p. 97). A parallel suffix in modern languages is the descendant of the suffix +tU. There is a stylistic difference between their usage. It sounds "better" to say Khal. *erdemü xün* than *erdemten xün* 'talented, gifted'. E.g.: *goruqaitai* 'being enthusiastic about, having a craze for' <*goruqai* 'insects and worms in general; also figuratively for craving or craze'; *omogtaí* 'haughty, arrogant; hot tempered' <*omog* 'arrogance, haughtiness, conceit, pride; anger'; *asigtaí* 'profitable, gainful' <*asig* 'profit, gain'; *düitei* 'dexterous, apt' <*diü* 'skill, dexterity'; *arbatai* 'ten years old' <*arban* 'ten'

MNT +tAi

aħatai 'goldgeschmückt' (Haenisch 1939, p. 6) [MNT 252, 273]; *qara'utai* 'schwarz' (Haenisch 1939, p. 60) [MNT 6, 100, 244]

Muq. +tu

čaǵatú 'imejuščij beloe' (Poppe 1938, p. 130b)

LM +tAi

nogōgantai 'greenish': cf. *águlan-u* *nogógan-tai* *bilfūqai* 'zelenaja ščurka' /Lat. *Merops superciliosus/* (name of animal); *qaratai* ~ *qartu* 'zavistlivyj, nenaivistivyj, nedobroželatel'nyj' (Kowalewski 833b); *śartai* a) 'yellowish': cf. *águlan-u* *sira-tai* *bilfūqai* 'zolotistaja ščurka' /Lat. *Merops apiaster/* (name of animal) (NT 96–97, p. 65); b) 'dühös, epés' [furious, malicious] (Kara 1998, p. 703b)

Khal. +tAi

nogōntoi 'zelenovatýj': cf. *ülni* *nogōntoi* *byaljūxai* 'zelenaja ščurka'; *xartai* 'bizalmatlan, óvatos, gyanakvó; rosszindulatú, sötét szándékú' [distrustful, cautious, suspicious, malicious, malevolent] (Kara 1998, p. 562b); *śartai* a) 'želtovatýj, zolotistyj': cf. *ülni* *śartai* *byaljūxai* 'zolotistaja ščurka' (NT 96–97, p. 65), b) 'serdityj' (Luw. 647a; Kara 1998, p. 703b)

Bur. +tAi

atetē 'Nižneudin, Tunka golden' (Castrén 1857, p. 88b); *xaratai* 'zloj, imejuščij čto-libo černoe; dosadnyj, zavistlivyj; zlobnyj; kovarnyj; so značeniem očen': x. *untaxa* 'spat' v glubokom sne' (BurRS 552b)

Ord. +tā

xara't'a 'ayant du noir, méchant; pernicieux, malintentionné' (Mostaert 1941, p. 338b); *śarga't'a* 'comprenant des chevaux isabelle' (Mostaert 1941, p. 609b); *tš'agatā* 'ayant une tâie sur l'œil' (Mostaert 1941, p. 692a)

Kalm. +tē

śartē 'krank (von Fürsten und Lamas); fett, dick (von Rindvieh)' (KWb 351a)

Gorlos +tē

xartē 'nedobryj, nedobroželatel'nyj' (Rudnev 1911, p. 140b)

3.2.2.3. Suffixes forming verbs from colour names

3.2.3.1. LM +bki-

Function: To form actions with a weak intensity, or repetitive actions, Intrans. (Dondukov 1964, p. 155; Sanzeev 1941, p. 186). E.g.: Bur. *en'ěbxi-* 'posmeivat'sja, ulybat'sja' <*en'ě-* 'smejat' sja'; *zăbxi(l)-* 'prikuśit', prikusyvat' <*ză-* 'vzjat' v zuby; kusat'; kusat' sja'; *horobxi(l)-* 'posasyvat' <*horo-* 'sosat'

LM +bki-

**ulagabki-* 'to blaze, flame; to glow' (B.Kh.); **sirabki-* 'to be yellow, show up yellow' (B.Kh.)

Bur. +bxi-

ulăbxi 'pylat', polyhat': *ulăbxisa tălixe* 'topit' dokrasna' (BurRS 456b); *śarbxi* 'polyhat' želtym cvetom, želtej(sja)' (BurRS 721a)

3.2.3.2. LM +dA-/+tA-

Function: To express the use of the object designated by the primary word (GWM §242; §250). It is a suffix which is present in the Mongolian, Turkic and Tungus languages (Ramstedt 1952, §95). E.g.: *arakida-* 'to drink wine' <*arakin(n)* 'alcoholic liquor made of *airaq* through distillation'; *büda-* 'to shoot with a firearm' <*bü* 'gun, rifle, firearm'; *ćabauđa-* 'to glue' <*ćabau* 'glue'; *kirte-* 'to become dirty' <*kir* 'dirt'; *očita-* 'to sparkle' <*oči* 'spark'; *tegermede-* 'to grind in a mill' <*tegerm-e* 'mill'; *urğada-* 'to catch a horse with an *urğ-a*' <*urğ-a* 'a long wooden pole with a loop on the end used to catch horses'

MNT+dA-

hulada- 'krasnet' (Kozin 1941, p. 592) [MNT 214]

*Phags-pa +tA-

garta- (Ligeti 1973, p. 186)

LM +tA-/+dA-

ćagada- 'to be too white; to be cleared up or exposed (as a crime)' (Lessing 157a); *ćayirda-* 'to coat or plate with zinc' <*ćayir* 'zinc' (Lessing 161b); *ćengkire-* 'to become bluish' (Lessing 172b); *kürente-* 'to become brown, dark brown, or dark red' (Lessing 505a); *garada-* 'zavidovat', nenavidet', ne dobroželatel'stvovat' (Kowalewski 834a); *qaradu-* 'černet', počernet' (*o kolos'jah ot solnica*) (Kowalewski 828a); *qarangguyida-* 'to be too dark' (Les-

sing 935a) ~ 'lišit'sja čuvstv, pamjati; obezpmijatet'; upast' v obmorok' (Kowalewski 830b) < *qaranggúi* 'dark'; *ulagada-* 'to paint red' (Lessing 869b)

Khal. +dX-/+tA-

cagāda- 'okazyvat'sja beleee čem nužno, byt' črezmerno belym; namazyvat' kipačenym tarakom' (Luw. 600b); *cairda-* 'ocíinkovyat', pokryvat' cinkom' < *cair* 'cink' (Luw. 603a); *nogōdo-* 'okrašivat' v zeleny cvet, delat' zelenym' (Luw. 269a); *ulāda-* 'delat' krasnym, okazyvat'sja krasneee čem nužno, byt' črezmerno krasnym' (Luw. 450b); *xarda-* 'revnovat', podozrevat', umet' podozrenue' (Luw. 515b); *xaranxida-* 'stanovit' sja slikom temnym, mračnym' (Luw. 514b); *xürende-* 'byt' slikom koričnevym, delat' koričnevym' (Luw. 577b); *xürente-* 'stanovit'sja koričnevym; vygljadit' koričnevym (*izdali*)' (Luw. 577b)

Bur. +dX-/+tX-

bordi- 'byt' nevráčnym' (BurRS 105b); *sagāda-* 'belit', byt' črezmerno belym, okazyvat'sja beleee čem nužno (*o materii odezdy*)' (BurRS 380b); *xarda-* 'klevetat', ogovarivat', zlostno obvinjat', nezasluženno černit', pozorit' (BurRS 555a); *xaranxida-* 'temnet' (*o nebe*), mračnet', omračnjat'sja (*o duše*), okazyvat'sja čeresčur temnym' (BurRS 552a); *xulganata-* 'Zakamma bolet' vospaleniem sejnyh želez' < *xulgana* 'mys' (Rassadin 1996, p. 205); *xüxede-* 'okrašivat' v sinj cvet' (BurRS 636a); *ulabar-* 'krasnet'sja (*o cvetah na pole*)' < *ulabar* 'krasnotyj' (BurRS 467a); *saibarta-* 'serebrít'sja (*o vodopade*)' < *saibar* 'svetlyj' (BurRS 383a)

Ord. +d(X)-/+t-a-

tš'agāDa- 'être maculé de blanc' (Mostaert 1941, p. 690b); *tš'agāD-* 'être éclairci, être tiré au clair; être éclairci' (Mostaert 1941, p. 690b); *ulāDa-* 'être teint de rouge' (Mostaert 1941, p. 728b); *ulawurt'a-* ~ *ulawurt'u-* 'être teint d'un reflet rougeâtre' (Mostaert 1941, p. 730a); *xaraba-* 'causer un tort à quelqu'un par des manœuvres cachées' (Mostaert 1941, p. 337b)

Kalm. +d^A/-+t^A-

xar^d'- 'zu schwarz sein; schwarze Gedanken haben, beneiden, geizig sein' (KWb 168b); *xariūd'* - 'zu finster sein, düstern, dämmern' (KWb 170a); *tsād'*- 'weiß sein od. erscheinen' (KWb 425a); *ulāwr'*- 'gelbrot sein od. werden' (KWb 448b); *tsānkr'*- ~ *tsānkr'*- 'weißlich werden, verbleichen; bleich aussehen' (KWb 425a); *kürñt'*- 'dunkelbraun werden od. sein' (KWb 248a)

Mngr. +di-

alaGdi- 'être ou devenir bigarré, se pommeier (*cheval*)' (Mostaert – De Smedt 1933, p. 4); *BoroDi-* 'être ou devenir gris' (Mostaert – De Smedt 1933, p. 28); *tč'iGāndi-* 'être ou devenir blanc' (Mostaert – De Smedt 1933, p. 448); *fulānDi-* 'être ou devenir rouge, rougir' (Mostaert – De Smedt 1933, p. 105); *xaraDi-* 'être ou devenir noir, obscur' (Mostaert – De Smedt 1933, p. 159); *k'^luGuodí-* 'être ou devenir bleu, vert, noirâtre' (Mostaert – De Smedt 1933, p. 209); *nogōnDi-* 'être ou devenir vert' (Mostaert – De Smedt 1933, p. 281); *širaDi-* 'être ou devenir jaune' (Mostaert – De Smedt 1933, p. 398)

3.2.3.3. LM +IA-

Function: NV: To denote acquirement of a quality (GWM §245). E.g.: *ayagala-* 'to put or pour into a cup or bowl' < *ayag-a/n* 'cup, bowl, eating-bowl'; *idegele-* 'to eat' < *idege(n)* 'food, nourishment, provisions'; *qajāgarla-* 'to bridle a horse' < *qajāgar* 'bridle'; *tamakila-* 'to smoke tobacco' < *tamaki(n)* ~ *tamaki* 'tobacco' MNT +IA-

halul- 'pokrasnet'' (Kozin 1941, p. 592) [MNT 204]

LM +IA-

borola- 'to become grey or tanned; to look grey, yellowish-grey, brown; to insist' (Lessing 122a); *čágala-* 'to bleach, whiten, whitewash; to peel, take off the skin, clean; to clear up; to write neatly; to make a neat copy; to celebrate, feast; to wish someone a Happy New Year' (Lessing 157b); *qarangguyila-* 'to darken' (Lessing 935a) < *qaranggúi* 'dark'; *garala-* 'černet', počernet', zapačkat'sja' (Kowalewski 834a); *sirala-* 'to be(come) yellow' (Lessing 715a)

Khal. +IX-

borlo- 'seret', stanovit'sja serym, sizym' (Luw. 78a); *cagāla-* 'byt' v traure, provodit' vstreču Novogo goda' (Luw. 600b); *nogōlo-* 'vpervye vesnoj pasti skot noz trave' (Luw. 269a); *šarla-* 'željet' (*o trave*), bolet' želtuhoj' (Luw. 647a); *xaranxila-* 'zagoraživat' svet, zatemnjat' (*o soznanij*) (Luw. 514b); *xarla-* 'černet', stanovit'sja černym, terpet' neudaču' (Luw. 517a); *xarla-* 'ne zamerzat' (*o vode zimoj*)' < *xarj* 'ne zamerzajućaja zimoj voda' (Luw. 516a)

Bur. +I+

borol- 'stanovit'sja serym, sjeret' (*o zemle na kotoroj taet sneg*)' (BurRS 106a); *nogōl-* 'pastis' na zelenom lugu, est' zelen', travu' (BurRS 328b); *sagāl-* 'perepisyat' nabelo ili načisto; očiščat', obtesyat', okorjat' (*o dereve, kartofele*); opravdyvat'; prazdrovat' vstreču Novogo goda; osvijaščat' pri Šamskom objade (*o skote*); pit' moloko, est' moločnye produkty, ugoščat' moločoj piščej; jagnit'sja letom; stradat' bessonicej' (BurRS 381a); *šaral-* ~ *šarla-* 'željet' (*o bumage, list'jah na derev'jah, pole*); iznurjat'sja, stradat' iz-zogoj' (BurRS 723a); *xaral-* ~ *xarla-* 'temnet', černet' (*o nebe, o snege, kogda taet*'); černet'sja, vidnet'sja temnoj massoj (*o tabune losadej, stae ptic*); plaho čuvstvovat' sebjia; omračnjat'sja, prihodit' v umyie' (BurRS 556a); *xüril-* 'seret'; zagoret' (*o kože čeloveka*)' (BurRS 626b)

Ord. +IX-

Borolo- 'présenter un aspect gris, gris jaunâtre, brun, brunâtre, violet, pourpre' (Mostaert 1941, p. 81a); *šarala-* 'devenir jaune, jaunir, avoir un aspect jaune' (Mostaert 1941, p. 608b); *xarala-* 'devenir noir; avoir l'estomac dérangé, p.ex. pour n'avoir plus mangé de la viande depuis longtemps ou à cause d'une indigestion, etc.' (Mostaert 1941, p. 338a); *xaraig'ilā-* 'obscurcir, interceper la lumière' (Mostaert 1941, p. 338b); *xargsila-* 'gronder et montrer les dents (*chien*); se montrer brutal' (Mostaert 1941, p. 339b); *nogōlo-* 'laisser pâturen dans les pâturages verts' (Mostaert 1941, p. 495a); *tš'agāla-* 'rendre blanc, enlever l'écorce, peler, décharner complètement, éclaircir, tirer au clair, passer le nouvel an (*des questions posées par politesse*)' (Mostaert 1941, p. 690b)

Kalm. +l-

nogāl- 'grünen; grün färben' (KWb 278b); *bürk^ügl-* 'dunkel, finster werden (der Tag), sich mit schwarzen Wolken bedecken (der Himmel)' (KWb 68b); *borl-* 'grün werden; nur ein wenig gekocht werden od. sein' (KWb 52a); *xarl-* 'schwarz werden; schwarz machen, schwärzen; argwöhnen' (KWb 169b); *šarl-* 'gelb werden, gelb sein' (KWb 350b); *tsagāl-* 'den ersten Monat des Jahres, das Neujahr feiern; weiß sein od. weiß machen (*selten*)' (KWb 419a)

Mngr. +la-

xarla- 'devenir noir, s'obscurcir, prendre un air furieux, porter le deuil, avoir le vertige, tomber en syncope' (Mostaert – De Smedt 1933, p. 163); *širla-* 'devenir jaune, jaunir, mûrir' (Mostaert – De Smedt 1933, p. 400)

Durbut +l-

xarl- 'černet'(sja)' (Rudnev 1911, p. 140b)

3.2.3.4. LM +rA-

Function: NV: To denote acquirement of a quality; Intrans. (GWM §246). According to Ramstedt, this is a Common-Altaic suffix (Ramstedt 1952, §98). E.g.: *kōgsire-* 'to become old' < *kōgsin* 'old'; *nomuğara-* ~ *nomuğara-* 'to be peaceful' < *nomuğan* 'peaceful, meek, gentle'; *uyara-* 'to thaw; to become soft; to be deeply moved' < *uyan* 'soft, weak'; *ügeyire-* 'to become poor' < *ügel* 'poor'

Muq. +rA-

kükere- 'pozelenet' (Poppe 1938, p. 220b)

LM +rA-

cágara- 'to become white; to be exonerated; declared innocent; to gain experience, become accustomed to doing a thing' (Lessing 158b); *nógogara-* 'to turn green, look green' (Lessing 161a); *kökere-* 'to become blue or green (for vegetation)' (Lessing 482b)

Khal. +rX-

cagāra- 'stanovit'sja belym, belet'; *dokazylvat'* svoju nevinovnost', reabilitovat'sja, opravdyvat'sja' (Luw. 601b); *nogoro-* 'zelenet', priobretat' zelenij cvet; pokryvat'sja zelen'ju, travoj; okryvat'sja plesen'ju; opuhat' ot p'janstva' (Luw. 269b); *xôxrö-* 'sinet' (o gubah); zelenet' (o pole)' (Luw. 557a)

Bur. +r(A)-

nogör- 'pokryvat'sja zelen'ju, probivat'sja o molodyh pobegah, zelenet'; pokryvat'sja plesen'ju' (BurRS 329a); *saira-* 'Tunka stat' kul'turnym, prosvetit'sja' (Rassadin 1996, p. 190); *xíixer-* 'sinet' (o rukah ot holoda, lice ot usta-losti); zelenet' (o poljah); blednet' (o čeloveke)' (BurRS 636b)

Ord. +rX-

tš'agāra- 'devenir manifeste, être éclairci, être tiré au clair (p.ex. une affaire de vol, de meurtre, etc.), par l'exercice acquérir de l'habileté à faire quelque chose, devenir expert en quelque chose, asquérir l'immunité contre une maladie' (Mostaert 1941, p. 692a); *ulâra-* 'avoir une couleur rouge, être rouge' (Mostaert 1941, p. 730b); *nogoro-* 'devenir vert; avoir un aspect vert' (Mos-

taert 1941, p. 495a); *Göx^kxörö-* 'devenir bleu, bleuir, présenter un aspect bleu; devenir vert, verdir, être vert; être gris; être noirâtre; devenir livide' (Mostaert 1941, p. 269b); *xal^ütira-* 'avoir la couleur xal^ün (voir ce mot); être vert jaunâtre (herbes qui commencent à pousser au printemps)' (Mostaert 1941, p. 329a)

Kalm. +r-

xör- 'weiflich werden, blaßgelb werden' (KWb 192b); *kókr-* 'blau, bläulich werden, grün werden' (KWb 237a); *nogár-* 'grün werden, sich mit Gras bedecken (die Erde)' (KWb 278b); *ulär-* 'rot werden, sich röten' (KWb 448a)

Mngr. +ro

k'ugorö- 'devenir bleu, vert, noirâtre, pâle (visage)' (Mostaert – De Smedt 1933, p. 209); *noGorö-* 'devenir vert, verdir, verdoyer' (Mostaert – De Smedt 1933, p. 281)

Tümüt +r-

xixür- 'sinet', zelenet' (pro moloduju travu)' (Rudnev 1911, p. 152a)

3.2.3.5. LM +rKA-

Function: NV: To denote the possession of something in abundance; Intrans. (GWM §247; Hambis 1945, p. 43). E.g.: *bayraqa-* 'to be proud of one's richness' < *bayan* 'rich'; *omorga-* 'to be proud' < *omog* 'pride'; *çilegerke-* 'to be ill' < *çilegen* 'illness, ailment'; *ejerke-* 'to impose one's rule upon someone' < *ejen* 'master'

LM +rKA-

**qararpa-* 'to bear malice' (B.Kh.)

Bur. +rxA-

xararxa- 'zlobstvovat'; *Alari zavidovat*' (BurRS 552a)

3.2.3.6. LM +si-

Function: NV: To express the attainment of a quality or condition; Trans. (GWM §248; Hambis 1945, p. 43). According to Ramstedt, there was a Common-Altaic *+si-* NV suffix which meant 'derartig bzw. so sein, tun', e.g. *miqasi-* 'zum Fleisch werden' < *miqan* 'Fleisch' (Ramstedt 1952, §79). E.g.: *aldarsi-* 'to become illustrious, famous, known' < *aldar* 'fame, renown'; *urmasi-* 'to cheer up; to become encouraged' < *urmas* 'spiritual uplift, enthusiasm'; *sagurisi-* 'to lead a sedentary life' < *saguri* 'seat'

LM +si-

garasi- 'nenavidet', nedobroželatel'stvovat' (Kowalewski 833b)

Khal. +ši-

xarši- 'ne sootvetstvovat', protivorečit', byt' protivnym' (Luw. 518a) ~ *xar-* sanax, sejglex, ül itgx; *xarin* šinjeti bolox' (Cewel 1966, p. 668a)

Bur. +si-; +šA-

xarš- 'byt' žestokim' (BurRS 556b); *ulagaša-* 'mercat' o čem-libo krasnom; to i delo vygladyvat' iz-za čego-libo; *krasnet'* (ot smuščenija), smuščat'sja' (BurRS 467a)

3.2.3.7. LM +yi-

Function: NV; Intrans. (Ramstedt 1952, §70; Dondukov 1964, p. 151) It denotes status. E.g.: *alčayi* ‘for the legs to be spread apart; to spread the legs apart’ < **alčā*: cf. *alčač-a* ‘crotch of legs, scissors’; *gójuyi*- ‘to be tail and thin, long and tight’ < **goju*: cf. *gójugar* ‘tail and thin’; *šobuyi*- ‘to have a pointed top’ < **šobu*: cf. *šobu-gur* ‘pointed, having a pointed top’

Muq. +i-

čai- ‘belet’ (Poppe 1938, p. 130b); *hulai*- ‘pokrasnet’ (Poppe 1938, p. 187a)

Istanbul +i-

(ödür) čai- ‘le jour vient à poindre’ (Ligeti 1962b, p. 23)

Zhiyuan Yiyu +yyi

čayyi- ‘the dawn is broken’ (Kara 1990, p. 288)

LM +yi-

čayi- ‘to become white, turn pale; to turn grey (of hair); to dawn, grow light’ (Lessing 160b); *čeyi*- ‘világlik, fehérlék; káprázik’ [show white, dazzle] (Kara 1998, p. 659b); *ulayi*- ‘to get red-hot, to become red, redder’ (Lessing 870a)

Khal. +i-

ulai- ‘krasnet’, stanovit’sja belym (*ob odežde*; blednet’ (*o cvete lica*); sedet’ (*o volosah*); svetat’, rassvetat’ (*na utrennej zare*)’ (Luw. 451b); *cai*- ‘belet’, stanovit’sja belym (*ob odežde*); blednet’ (*o cvete lica*); sedet’ (*o volosah*); svetat’, rassvetat’ (*na utrennej zare*)’ (BurRS 383b); *saibai*- ‘belet’, belet sja (*o svadebnom plati’ nevesty B.Kh.*)’ (BurRS 383a); *sil*- ‘zap. sinet’ (*o nebe*)’ (BurRS 388b); *ulai*- ‘krasnet’ (*o krasnyh predmetah*), stanovit’sja krasnym, pokryvat’sja rumjancem, vspyhnut’, zardet’sja (*o lice*); zabrezžit’; polyhat’, mercat’ (*o krasnom ogon’ke signala*); pylat’, polyhat’ (*ob ogne*); nakaljat’sja, raskaljat’sja (*o žezele*) (BurRS 467b)

Ord. +ää-

tš-ä- ‘être blanc’ (Mostaert 1941: 697b); *ulä*- ‘devenir rouge, rougir; être rouge; désirer vivement, convoiter; devenir furieux (*boeufs*)’ (Mostaert 1941, p. 730a)

Mngr. +i-/ +ë-

tš-i- ‘commencer à faire eur’ (Mostaert – De Smedt 1933, p. 441); *filië*- ‘devenir rouge, rougir’ (Mostaert – De Smedt 1933, p. 105)

Tümüt +i-

čai- ‘belet’, svetat’ (Rudnev 1911, p. 153a)

3.2.4. Suffixes forming deverbal nouns

3.2.4.1. LM (+yi)-ltA

Function: To form nouns designating process. This is a compound suffix in NV +yi- (see under 3.2.3.7.) and VN -ltA (GWM §163). E.g.: *qasulta* ‘subtraction’ < *qasu*- ‘to delete’; *bučalta* ‘return’ < *buča*- ‘to return’; *nemelte* ‘addition’ < *neme*- ‘to add’; *ergilte* ‘turn’ < *ergi*- ‘to turn’

LM (+yi)-ltA

**ulayulta* /Lat. Congestion/ (B.Kh.) < *ulayi*- ‘to get red-hot, to become red, redder’ (Lessing 870a)

Khal. (+i)-lt

ulailt ‘zastoj, priliv krovi; giperemija’ /Lat. Congestion/ (ET 41)

Bur. (+i)-ltA

ulailta ‘pokrasenie koži’ (B.Kh.)

3.2.4.2. LM (+yi)-mA

Function: To form nouns designating fitness or possibility of an action. This is a compound suffix in NV +yi- (see under 3.2.3.7.) and VN -mA (GWM §165).²⁰ E.g.: *büüme* ‘realisable, practicable’ < *büü*- ‘to be[come] formed or fulfilled’; *gayiqama* ‘wonderful, astonishing’ < *gayiqa*- ‘to be astonished’; *bučaluma* ‘boiling, boiled’ < *bučal*- ‘to boil, boil over; to be at a boil’; *nugurama* ‘sticky, thick’ < *nugura*- ‘to be become sticky, viscous’

LM (+yi)-mA

**zayima* ‘otdajuščij beliznoju’ (B.Kh.); *ulayima* ‘red, red-hot’ (Lessing 870b)

Bur. (+i)-mA

saima ‘otdajuščij beliznoju’: cf. *saima sahan* ‘belejuščij sneg’ (BurRS 383a)

Ord. (+ä)-mA

ulāma ‘devenu rouge (*par l’action du feu*)’ (Mostaert 1941, p. 730b)

3.2.4.3. LM (+yi)-mAl

Function: To form nouns designating qualities. This is a compound suffix in NV +yi- (see under 3.2.3.7.), VN -mAl (GWM §168). According to Ramstedt, this compound suffix derived from the Common-Altaic VN -m suffix (Ramstedt 1952, §58). E.g.: *bíčimel* ‘written’ < *bíči*- ‘to write’; *darumal* ‘printed’ < *daru*- ‘to press, to print’; *nekelmel* ‘woven’ < *neke*- ‘to weave’; *jírumal* ‘painted, multicolour’ < *jíru*- ‘to paint’

LM (+yi)-mAl

ulayimal ‘reddish’: cf. *ulayimal ködege* ‘krotkohvostaja gorlica’ (*name of animal*) (NT 96–97, p. 190), *ulayimal anggina* ‘angina katarral’naja’ (*name of disease*) (ANT 7)

²⁰ According to Ramstedt, this compound suffix derived from the VN -m suffix (Ramstedt 1952, §58).

Khal. (+i)-mAl

ulaimal 'reddish': cf. *ulaimal xödög* 'krotkohvostaja gorlica' (NT 96–97, p. 190), *ulaimal angin* 'angina katarral'naja' (ANT 7)

3.2.4.4. LM (+IA)-nggi

Function: NN: A compound suffix which consists of the NV +IA- (see under 3.2.3.3.) and VN -nggi. The suffix -nggi is productive in Kalmuck (Szabó 1943, §145) and Buriat (Sanžeev 1962, 120). E.g.: *qatangi* 'lean, meagre, emaciated, exhausted, spent' < *qata-* 'to dry, dry up'; *yadanggi* 'indigent, poor, miserable' < *yada-* 'to have no strength or power'; Bur. *aingi* 'puglivyj' < *ai-*'bojat'sja'; *uhatangi* 'vlažnyj' < *uhata-* 'stanovit'sja vlažnym'

LM (+IA)-nggi

**qaralanggi* 'darkened' (B.Kh.); **siralanggi* 'yellowed; gone yellow' (B.Kh.)

Bur. (+IA)-nggi

xarlangi 'potemnevšij, počernevšij' (BurRS 556a); *šarlangi* 'poželtevšij (o list jah)' (BurRS 722b)

3.2.4.5. LM -nggir

Function: VN (Dondokov 1964, p. 92). E.g.: *yadanggir* 'indigent, poor, miserable' < *yada-* 'to have no strength or power'; *qatanggir* 'lean, meagre, emaciated' < *qata-* 'to dry, dry up'; Bur. *šatangir* 'obgorelyj' < *šata-* 'goret'; *elen gir* 'potertyj, ponošennyj' < *ele-* 'iznašivat'sja'

LM -nggir

čangkir 'belyj': cf. *čangkir galu* 'belyj gus' /Lat. Anser coerulescens/ (NT 96–97, p. 19); *čengkir* ~ *čenggir* 'light blue, bluish' (Lessing 172b); *ulanggir* 'reddish' (Lessing 871b); cf. *ulanggir niud* 'nazvanie ryby v rode snjatkov' (Kowalewski 394a)

Khal.-nxAr/ +ngir

canxir 'belyj': cf. *canxir galu* 'belyj gus' /Lat. Anser coerulescens/ (NT 96–97, p. 19); *cexir* 'svetlo-goluboj, svetlo-sinij, svetlo-lazurnyj' (Luw. 621b); *ulangir* 'reddish' (Lessing 871b); cf. *ulängir niud* 'zubastaja korjuška' /Lat. Osmerus eperlanus dentex/ (NT 96–97, p. 127)

Bur.-nxir

senxir 'svetlo-goluboj, svetlo-sinij (o more, nebe)': cf. *senxir sagān ünegen* 'goluboj pesec' (BurRS 403b)

Kalm.-ñkr/ -ñgir

tsäñkr 'weißlich, blaß, milchfarbig' (KWb 425a); *ulñgir* 'rot': cf. *ulñgir niud* 'rote Augen' (KWb 449a)

Ord. -ñ^kxer/ -ñger

tš iñ^kxer ~ *tš iñger* 'blanchâtre, bleu se rapprochant du blanc' (Mostaert 1941, p. 707a)

3.2.4.6. LM (+yi)-r

Function: VN. This is a compound suffix in NV +yi- (see under 3.2.3.7.) and VN -r (GWM §178). cf.: *amur* 'rest, peace' < *amu-* 'to rest'; *belčir* 'embouchure' < *belči-* 'inundate'

with colour names it forms the name of a plant:

čayir 'vistarija korotkokistevaja' /Lat. Wistaria brachybotrys/ (NT 89–90, p. 117); *modun* 'dikij trostnik, iz kotorogo delajut knutovišča' (Kowalewski 2077a)

Khal. (+i)-r

cair 'id.'

with colour names it forms the name of a metal:

LM (+yi)-r
čayir 'zinc, tin' (Lessing 161a)

Khal. (+i)-r
cair 'cink' (Luw. 603a)

Bur. (+i)-r
sair 'alljuminium, cink' (BurRS 383a)

Kalm. +r
tsär 'Weißmetall, Zink' (KWb 425b)

3.2.5. Suffixes forming deverbal verbs

3.2.5.1. LM (+yi)-bAljA- /-GAljA-

Function: To express lasting actions. This is a compound suffix in NV +yi- (see under 3.2.3.7.) and VV -bAljA- (GWM §238). E.g.: MNT *sičabalju-* 'kriechen' (Hae-nisch 1939, p. 139) [MNT 21]; *anibalja-* 'to twinkle' < *ani-* 'to close one's eyes'; *inibelje-* 'to laugh, to smile' < *iniyę-* 'to laugh, chuckle'; *sanaǵalja-* 'to reflect on' < *sana-* 'to think'

LM (+yi)-bAljA- /-GAljA-
čayibalja- 'to appear white in the distance; to look whitish (of distant objects)' (Lessing 160b); *ulabalja-* 'krasnet', byt' krasnym; pokrasnet'" (Kowalewski 397b)

Khal. (+i)-bAljA-/wAljA-
caiwalja- 'kazat' sja belym, blesnut' (o rybe) (Luw. 602b); *ulbalja-* 'mel'kat' (o čem-libo krasnom); krasnet' i mlet'" (Luw. 452b)

Ord. +wAldži-
ulawaldži- ~ *ulagalđi-* ~ *ulaga tš-i-* 'jeter des lueurs rouges' (Mostaert 1941, p. 728b; 730a)

Kalm. +wAlž^A- /+GAljA
ul'galž^A 'ein wenig erröten (vor Scham)' (KWb 448b); *ul'walž^A-* 'erröten (vor Scham)' (KWb 449a)

3.2.5.2. LM (+yi)-GAnA-

Function: Repetitive action to express rhythmic motions. A compound suffix which consists of the NV *+yi-* (see under 3.2.3.7.) and VV *-GAnA-* (Kullmann – Tserenpil 1996, p. 135; Dondukov 1964, p. 136; see also under 3.2.1.7.). E.g.: *alčágana-* ‘to walk with legs apart, straddle’ < *alčayi-* ‘for the legs to be spread apart’; *büllegene-* ‘to stare’ < *bülleyi-* ‘to stare in terror’; *böndögene-* ‘for a round object to move’ < *böndöyi-* ‘to be rounded’; *darbigana-* ‘to have a spicy or sharp taste’ < *darbi-* ‘to become joyfully excited at the sight of a noisy crowd’

LM (+yi)-GAnA-

**čayibagána-* ‘to shine, sparkle, to silver’ < **čayibayi-* ‘to show up white’
(B.Kh.)

Bur. (+i)-gAnA-

saibagana- ‘belet’sja, sverkat’, blestet*, serebit’sja’ (BurRS 383a)

3.2.5.3. LM (+yi) ±tU-rA-

Function: A compound suffix which consists of the NV *+yi-* (see under 3.2.3.7.), the verbal suffix *±tU-* and VV *rA-*, meaning ‘to become something’. Trans. (Szabó 1943, §100). E.g.: *angtura-* ‘sich spalten, rissig werden’ < *ang* ‘Loch, Riß, Ritze, Spalt, Tal zwischen Bergen, Kluft’; *alangtura-* ‘verdutzt werden, nichts begreifen, nicht glauben können, zweifeln’ < *alang* ‘verwundert, zweifelnd, unentschlossen’

LM (+yi)-tU-rA-

ulayitura- ‘glühend machen, glühend sein’ (KWb 448b)

Kalm. -tr-

ulātr- ‘id.’

3.2.5.4. LM (+yi)-IGA-

Function: Causative: to make intransitive verbs transitive, transitive primary stems factitive (GWM §228; Ramstedt 1952, §85). This is a compound suffix in NV *+yi-* (see under 3.2.3.7.) and VV *-IGA-*. E.g.: *ságulga-* ‘to set’ < *ságú-* ‘to sit down’; *baǵulgá-* ‘to lower, to let down’ < *baǵú-* ‘to descend’; *kilge-* ‘to cause to do, to let do’ < *ki-* ‘to do’; *bayilǵa-* ‘to let be’ < *bayi-* ‘to be’

LM (+yi)-IGA-

ulayilǵa- ‘to make red or red-hot (*face*)’ (Lessing 870b) < *ulayi-* ‘to get red-hot, to become red, redder’ (Lessing 870b)

Khal. (+i)-lgA-

ulailga- ‘delat’ krasnym; pristydit’, zastavit’ pokrasnet’ (Luw. 451b)

Bur. (+i)-lgA-

ulailga- ‘delat’ krasnym, pokryvat’ rumjanami, rumjanit’ (*lico*); nakaljat’, ras-kaljat’ (*šezezo*); *peren.* zastavljat’ krasnet’ kogo-libo’ (BurRS 467a)

Ord. (+á)-lgA-

ulálgá- ‘chauffer au rouge, chauffer (*fer*)’ (Mostaert 1941, p. 730a)

3.2.5.5. LM -ljA-

Function: Repetitive action: To express rhythmic motions; Intrans. (GWM §239; Kullmann – Tserenpil 1996, p. 135). E.g.: *nayíulgá-* ‘to bob up and down’ < *nayigu-* ‘to swing’; *önngelje-* ‘to keep looking, to envy’ < *önngeyi-* ‘to encroach upon, to lean forward in order to see’; *bulatla-* ‘to keep sticking out’ < *bulayi-* ‘to stick out’

LM -ljA-

ulatja- ‘to look or flash red’ (Lessing 871a) < *ulayi-*

Khal. -ljA-

ulatja- ‘rdet’, krasnet’, plamenet’, sverkat’ (*ob ogne*); *peren.* pokryvat’sja rumjancem (*lico ot gneva*) (Luw. 452a)

Bur. -lza-

ulalza- ‘rdet’, krasnet’ (*o znamenah, ob ognjah*) (BurRS 467b); *xüxelze-* ‘sinet’ (*o nebe*) (BurRS 636b)

Kalm. -lzA-

ullz- ‘rot sein, sich röten, erröten’ (KWb 448b)

3.3. Suffixes with use restricted to colour names

3.3.1. Suffixes forming denominational nouns

3.3.1.1. LM+bA

with colour names it forms the name of an animal:

garba ‘kind of fresh-water fish (Ch. *sung-hua-yü* ‘the Songari river’s fish’) (Lessing 935b); ‘nazvanie kakoj-to rečnoj rybki’ (Kowalewski 845b)

Khal. +wĀ

xarwā ‘gol mörönd tördög, maš jijigxen bolöd örgön, xelber xaitagai adil negen juil jagas’ (Cewel 1966, p. 663b)

Kalm. +wA

xarwa ‘eine Fischart (*junge Bleihe?*)’ (KWb 171a)

3.3.1.2. LM +bAs

with colour names it forms names of natural phenomena:

ulabas (Sečenéčogu 1988, p. 406a)

Khal. +bAs

ulbas ‘vspyška ot krasnogo sveta, ognja’ (Luw. 452b); cf. Khal. *ulbas ulbas xix* ‘fel-felizzik (*fény, tűz*)’ [to glow] (Kara 1998, p. 491b)

3.3.1.3. LM+bUčAr

In Szabó’s opinion, this suffix forms adjectives from adjectives (Szabó 1943, §193), but in the Buriat language it forms nouns from adjectives.

with colour names it forms the name of an animal:

**garabučar* 'eagle' (B.Kh.); **sirabučar* 'yellowish' (B.Kh.)

Bur. +bsAr

xarabsar 'orel' (BurRS 550a)

Kalm. +wtsr

šarwtsr 'gelblich' (Szabó 1943, §193)

3.3.1.4. LM+čAGAi

with colour names it forms the name of an animal:

MNT +čiKAi

garčiqai 'brauner Falke' (Haenisch 1939, p. 61) [MNT 25, 26, 27, 28, 29, 31]

Leiden +čAKAi

garčaqai 'Falke' (Poppe 1928, p. 63)

Nuzhatu-'l-kulüb +čIKA

garčiqa 'Faucon' (Pelliot 1931, p. 571)

Houa-yi yi-ju +čihAi

xareixai 'Falke' (Haenisch 1957, nr. 190)

Muq. +čIGAI

xarčigai 'jastreb' (Poppe 1938, p. 406b)

Zhiyuan Yiyu +čA[i]KA

garča[i]qa 'Falco' (Kara 1990, p. 316)

LM+čAGAi

garča[gi]a(i) 'jastreb, lesnoj jastreb' /Lat. Accipiter/; *čagan q.* 'lun', belyj lun''

(Kowalewski 850a)

Khal. +čAi /-čAgA

xarcgai 'id.' (Luw. 518a) ~ *xarcaga* [kite, hawk] (Kara 1998, p. 563a)

Bur. +sAgA(i)

xarsaga 'id.': *bulžamūrai* x. 'perepeljatnik', *hoiršo* x. 'teterevyatnik', *xyüröšgei* x. 'pustel'ga' (BurRS 556a); cf. *xarcaga* 'Selenga Falke, Habicht' (Castrén 1857: 109b); *xüxesegei* 'Bohan trjasoguzka' (BurRS 636b)

Kalm. +t's'GA

xarts^aǵd ~ *xartsxā* 'Habicht' (KWb 170b)

3.3.1.5. LM+čU

Function: To form nouns designating groups (GWM §115).

with colour names it forms proper names:

MNT +čU

Kököčü 'a beszüttök táborában talált kisfiú, később ezredes; Szenggüm lovásza' (Ligeti 1962a, p. 226) [MNT 119, 138, 180, 188, 202, 214, 243, 244]

with colour names it forms the name of an animal:

LM+čU

kökecü 'zimorodok': *noğobır* k. 'ošeijnikovyj zimorodok'; *qalığın* k. 'sene-gal'skij zimorodok', *köke* k. 'goluboj zimorodok' (NT 96–97, p. 65); *ulağaču* 'nazvanie ljutogo, požirajuščego ljudej zverja, pohožego na volka s krasnoj golovoj, myšinymi glazami, golosom svin'i, vodaščegosja v uščel'jah gor'

(NT 96–97, p. 224)

Khal. +č

xōxōč 'zimorodok' /Lat. Halsyon/: *nogōwtor* x. 'ošeijnikovyj zimorodok', *xa-liun* x. 'senegal'skij zimorodok', *xōč* x. 'sinij zimorodok' (NT 96–97, p. 65); *ulagacū* 'nazvanie ljutogo, požirajuščego ljudej zverja, pohožegona volka s krasnoj golovoj, myšinymi glazami, golosom svin'i, vodaščegosja v uščel'jah gor'

(NT 96–97, p. 224)

with colour names it forms names of plants:

LM+čU

siraču 'gamboge (yellow pigment from wood); rattan fruit; Carcinia morilla' (Lessing 715a); cf. 'dubovaja tolča, želtjak, kraska iz drevesnoj kory' (Kowalewski 1522a); *kökecü čeçeg* 'kommelina obyknovenaja' /Lat. Commellina communis/ (NT 89–90, p. 197)

Khal. +č /-c

xōxōč *ceçeg* 'kommelina obyknovenaja' /Lat. Commelina communis/ (NT 89–90; 197); *šarc* 'yaljarsan cars modni dursñi dotđod dax' šar öngin ed, ar'sig šar öngör budaxad xereglene; noxoin xušuni mod' (Cewel 1966, p. 840b)

with colour names it denotes human characteristics:

MNT +čU

qaraču 'einfaches Volk' (Haenisch 60) [MNT 111]

Houa-yi yi-ju +čU

xaraču 'les gens du peuple, les gens du bas peuple' (Lewicki 44)

LM+čU

boroču 'ordinary man' (GWM §115); *qaraču* 'common people, commoner' (Lessing 932b)

Khal. +č

xarc 'ist. prostoljudin' (Luw. 517b)

Ord. +t's'i

xara'ts'i (l'āžži biši k'ün) 'quelqu'un qui n'est pas noble, roturier' (Mostaert 1941, p. 339a)

3.3.1.6. MNT+dU

with colour names it forms the name of an animal:

quladu 'korşun-myšelov' (Kozin 1941, p. 597) [MNT 200]

3.3.1.7. LM+GANči < +GAnA+či

This is a compound suffix in NN +*GAnA* (see under 3.2.1.7.) and NN +či (see under 3.2.1.2.)

with colour names it forms the name of an animal:

**qulaganači* (B.Kh.); cf. Hung. *egerészölyv* [buzzard]

Bur. +gAnšA

xulganša: ülen x. ‘filin domovoj (iz semejstva sov)’ (BurRS 600a)

3.3.1.8. LM+GA+GAsUn

This is a compound suffix in NN +*GA* and NN +*GAsUn* (GWM §151).

with colour names it forms the name of an animal:

borgagusun ‘Mücke’ (KWb 52a) (or **borgogusun*)

Bur. +gOhOn

borgöhon ‘zap. moška, moškara’ (BurRS 105b); cf. *borgös* ‘Selenga gnat’ (B.Kh.)

Kalm. +gÜsn

borgüsn ‘(große) Mücke’ (KWb 52a)

with colour names it forms names of plants:

**gargagazsun* ‘guelder rose, snowball-tree’ (B.Kh.)

Bur. +gÄhAn

xargähän ‘kalina’ (BurRS 554a)

3.3.1.9. LM+Gčin

Function: To form nouns designating colours and names of female animals (GWM §120).

with colour names it forms names of animals:

MNT +gči(n)

alači qonin ‘pestraja oveča’ (Kozin 1941, p. 580) [MNT 124, 170]; *garači* ‘schwarz’ (Haenisch 1939, p. 60) [MNT 170]; *qulačin* ‘mare (of same type)’ (Street 1957, p. 54; Rachewiltz 1972, 1929) [MNT 87]; *gongqočci* ‘gelbe (braune) Schafe’ (Haenisch 1939, p. 66) [MNT 124]; *boročin* ‘junger Vogel’ (Haenisch 1939, p. 19) [MNT 3, 25]

Istanbul +gči

garačin ‘noir’ (Ligeti 1962b, p. 43)

LM +Gčin

(a) examples when this suffix denotes female animals:

alačin ‘motley, variegated, parti-coloured, piebald (*applied to the colours of a female only*)’ (Lessing 27a); *boričin* ‘seraja, sivaja (*o masti samok životnyh*)’ (Kowalewski 1219b); *čabidači(n)* ‘reddish-yellow with white tail and mane (*of a mare only*)’ (Lessing 155b); *kökečin* ‘goluboseraja (*o kobylye*)’ (Kowalewski 2628a); *ölögčin* ‘female (*mostly of carnivorous animals*), bitch’

(Lessing 634a); *qaligučči* ‘isabella mare’ (Lessing 919b); *qaračin* ‘černaja, voronaja’ (Kowalewski 836b); *qulagči* ‘female form of the *qula*’ (Lessing 984a); *siračin* ‘želtaja (*o masti samok životnyh*)’ (Kowalewski 1522a); *sirgačin* ‘dzerenova samka, saiga’ (Kowalewski 1529a); cf. ‘dikaja koza, stepnaja koza; solovaja kobyly’ (Kowalewski 1529b); *kirengčin* ‘černoburaja (*kobyly*)’ (Kowalewski 2637a)

(b) examples when the suffix denotes names of animals in general:

garaččin ‘gornaja ovsjanika’ /Lat. Emberiza cia./; *gadan-u* q. ‘skalistaja ovsjanika’ /Lat. Emberiza buchanani/ (NT 96–97, p. 61), q. *doti* ‘bol’sajii konjuga’ /Lat. Aethiopsar cristatellus/ ~ ‘ryževostij černyj kakadu’ /Lat. Calyptorhynchus magnificus/ (NT 96–97, p. 47), q. *qariyačai* ‘skalistaja lastočka’ /Lat. Ptonoprogne rupestris/ ~ ‘gornaja lastočka’ /Lat. Riparia rupestris/ (NT 96–97, p. 61) ~ ‘černaja lastočka’ (Kowalewski 836b), *boro* q. ‘trjasoguzka’ /Lat. Motacilla chinensis/ (NT 96–97, p. 68)

Khal. +gči(n)

(a) *alačč* ‘pestraja, pegaja (*o masti samok životnyh*)’ (Luw. 28b); *borogč(in)* ‘seraja, sivaja (*o masti samok životnyh*)’ (Luw. 78a); *cagagč(in)* ‘belaja (*o masti samok životnyh*)’ (Luw. 600b); *caw dageč(in)* ‘igrenevaja (*o masti samok životnyh*)’ (Luw. 600a); *ölögčin* ‘samka plotojadnyh životnyh; suka’ (Luw. 319b); *šaragčin* ‘želtaja (*o masti samok životnyh*)’ (Luw. 646b); *šargagčin* ‘samka dzereny, antilopy’ (Luw. 646b); *ulágeč(in)* ‘krasnaja, ryžaja (*o masti samok životnyh*)’ (Luw. 450b); *uxágč* ‘ryžaja, krasnaja, kauraja’ (Luw. 470a); *xaliugč* ‘bulanaja (*o masti samok životnyh*)’ (Luw. 504a); *xaragč(in)* ‘černaja (*o masti samok domašnij životnyh*)’ (Luw. 514a); *xövögčin* ‘seraja, sivaja (*o masti samok životnyh*)’ (Luw. 557a); *xulagč* ‘savrasaja (*o kobylyce*)’ (Luw. 562b); *jér-degč* ‘ryžaja (*o masti kobylyce*)’ (Luw. 215b)

(b) *xaragčin* ‘gornaja ovsjanika’ /Lat. Emberiza cia./; *xadni* x. ‘skalistaja ovsjanika’ /Lat. Emberiza buchanani/; x. *xaricai* ‘skalistaja lastočka’ /Lat. Ptonoprogne rupestris/; ‘gornaja lastočka’ /Lat. Riparia rupestris/ (NT 96–97, p. 61), *bor* x. ‘trjasoguzka’ /Lat. Motacilla chinensis/ (NT 96–97, p. 68); *šaragč* ‘byaljúxai’ ‘ivolga’ (NT 78–79–80, p. 267)

Bur. +gšXn

(a) *alačan* ‘pestraja, pestruša, pegaja (*o masti samok životnyh*)’ (BurRS 39b); *borogšč(n)* ‘seraja (*ili sivaja*) kobyly’ (BurRS 106a); *sazgşa(n)* ‘belaja (*o masti samki*)’ (BurRS 380b); *sabidagšan* ‘igrenaja kobylyca’ (BurRS 379b); *ülegšen* ‘samka (*životnogo*)’ (BurRS 502a); *šaragşa(n)* ‘želtaja, solovaja (*o masti samki*)’ (BurRS 721a); *šarggşa(n)* ‘solovaja (*o masti kobylyce*)’ (BurRS 722b); *ulágšan* ‘ryžaja (*o masti samki*)’ (BurRS 466a); *xaragşa(n)* ‘karakovaja, voronaja mast’ lošadi, černaja (*o masti samki*)’ (BurRS 550b); *xulagşa(n)* ‘savrasaja (*o kobylyce*)’ (BurRS 599b); *zérdegšen* ‘ryžaja (*o masti kobylyce*)’ (BurRS 275b)

(b) *xaragšan*: *xonin* x. ‘Oka vodjanoy vorobej’ (BurRS 550b); *xuba* x. ‘Khori besšernaja belka osen’ju’ (BurRS 550b); *xunil* x. ‘Oka., Zakamna oljapka, vodjanoy vorobej’ (Rassadin 1996, p. 205)

Ord. +G'tš'i(n)

(a) examples when this suffix denotes female animals:

alaG'tš'i 'ayant une robe noire ou brune ou d'une autre couleur avec de grandes taches blanches (*bestiaux femelles*)' (Mostaert 1941, p. 12b); *borog'tš'i* 'de couleur grise (*bestiaux femelles*)' (Mostaert 1941, p. 81a); *borog'tš'in* 'la femelle du faisan, faicane' (Mostaert 1941, p. 81a); *džerDeG'tš'i* 'féminin de *DžerDe* [robe de cheval: roux avec queue et crinière d'à peu près la même couleur]' (Mostaert 1941, p. 192a); *ölöG'tš'in* 'chienne; femelle (se dit de certains animaux); injure à l'adresse d'une femme ou d'une jeune fille; aussi mot de tendresse employé par les parents ou grands-parents pour désigner leur fille ou petite fille quand elles sont encore jeunes enfants' (Mostaert 1941, p. 531b); *sargaG'tš'i* 'féminin de *sarga* isabelle'; *sargaG'tš'in* 'gazelle femelle' (Mostaert 1941, p. 609b); *tšagatš'i* 'féminin de *tšagán* blanc' (Mostaert 1941, p. 690b); *ulág'tš'i* 'féminin de *ulán*' (Mostaert 1941, p. 728b); *gó*xóG'tš'i* 'féminin de *gó*xó*' (Mostaert 1941, p. 269a); *xaraG'tš'i* 'féminin de *xara*' (Mostaert 1941, p. 338a); *xulaG'tš'i* 'féminin de *xula*' (Mostaert 1941, p. 366a)

(b) names of clans:

tšagatš'i 'nom de clan' (Mostaert 1941, p. 690b); *ulág'tš'in* 'nom de clan' (Mostaert 1941, p. 728b); *gó*xóG'tš'in* 'nom de clan' (Mostaert 1941, p. 269a)

Kalm. +ktšn

kür'kišn 'dunkelbraune (Stute)' (KWb 247b); *xaraktšn* 'schwarz': x. *gǔn* 'schwarze Stute' (KWb 169b); *öf'kišn* 'graugesprenkelt, graufarbig'; *šar-gáktšn* 'weibliche Saiga-antilope; isabellfarbige Stute' (KWb 350a); *šar'kišn* 'die Gelbe (fem.)': š. *teměn* 'eine gelbe Kamelkuh'; š. *gǔn* 'gelbe Stute' (KWb 350b); *tsagáktšn* 'weiß (von weiblichen Tieren)': *tsagáktšn* *gǔn* 'weiße Stute' (KWb 419a)

Durbut +Kčin

šarakčin 'dzeren bez rogov (samka)' (Rudnev 1911, p. 157a)

Mngr. +GSD'ži

BoroGSD'ži 'poule' (Mostaert – De Smedt 1933, p. 29)

3.3.1.10. LM+gil

with colour names it forms the name of a plant:

qargil 'a tree with leaves resembling those of an apple-tree and dark reddish bark which is used as a decorative covering' (Lessing 936b)

Khal. +gil

xargil 'loh serebristyj' /Lat. Elaeagnus argentea Purmtn/ (NT 89–90, p. 118)

Ord. +gil

xargil 'nazvanie dereva, rastuščego na barhanah' (Rudnev 1911, p. 140b); 'nom d'un arbuste' /Lat. Rhamnus erythroxylon/ (Mostaert 1941, p. 339b)

3.3.1.11. LM+giy-A

with colour names it forms names of natural phenomena:

borgiy-a ' friable soil with poor vegetation' (Lessing 121a)

Khal. +giX
borgio 'ryhlaja počva so skudnoj rastitel'nost'ju' (Luw. 77b)

3.3.1.12. LM +(G)U

with colour names it forms the name of a plant:

qarau 'üsözög (gomba) /Lat. Ustilaginales/' [black-rust] (Kara 1998, p. 563a)

Khal. +Ü
xarü 'golovnjka hlebnaja' (Luw. 517b; Kara 1998, p. 563a)

with colour names it forms names of natural phenomena:

qarau 'jégré szört föld útol' [earth sprinkled on ice, serving as a road] (Kara 1998, p. 563a)

Khal. +Ü
xarü 'zemlja, nasypannaja na doroge po l'du' (Luw. 517b; Kara 1998, p. 563a)

3.3.1.13. LM+KA

Function: NN (Dondukov 1964, p. 27): e.g.: *alqa* 'šag' < *ala* 'promežnost'

with colour names it forms the name of an animal:

LM+KA

**qarqa* 'rat' (B.Kh.)

Bur. +xA
xarxa 'Selenga krysa' (BurRS 557b)

3.3.1.14. LM+KAli

with colour names it forms the name of an animal:

**qarqali* < **qaragali* 'thrush, blackbird' (B.Kh.)

Bur. +xAli
xarxali 'zap. čekan (ptica iz semejstva drozdovyh)': *nădaša* x. 'čekan-pljusas', *xara tolgoitoi* x. 'čekan černogolovyj', *xargin* x. 'čekan-poputčik' (BurRS 557b)

3.3.1.15. LM +ki

Function: In Mongolian languages there are many suffixes +ki. Poppe, in his paper on the nominal word formation of the Mongolian language, cites a suffix which forms adjectives with a local function (Poppe 1927, p. 108), e.g. *olaniki(n)* 'der größte Teil' < *olan* 'viel'. Hambis mentions in his grammar of the Written Mongolian that the suffix +ki also functions as a Nomen Agentis (Hambis 1945, p. 6), e.g.: *ayisi* 'la craite' < *ayisiki* 'le sorcier, le magicien'. In my opinion, the following example shows

a third function of the *+ki* suffix, which is difficult to define because examples with this suffix are few. It may be the parallel of the Tungus *+ki* suffix, which forms names of animals and is quite common (cf. tung. *horoki* ~ *horo* 'Waldhahn'; *turaki* ~ *tura* 'Krähe'; *inaki* ~ *ina* 'Hund' (Ramstedt 1952, §100).

with colour names it forms the name of an animal:

*borki*²¹ 'staryj barsuk' (Kowalewski 1223b)

Khal. +xi

borxi 'staryj, vzroslyj barsuk; tarbagán' (NT 96–97, p. 109)

3.3.1.16. LM+kirA

with colour names it forms the name of an animal:

*garkir-a*²² 'grey grane' (Lessing 940a); *kóke q.* 'žuravl'-krasavka' /Lat. Anthroponoides virgo/, *bičiqan q.* 'seryj žuravl' /Lat. Grus grus liffordi/ (NT 96–97, p. 16)

Khal. +xirĀ

xarxitā 'seryj žuravl' /Lat. Grus grus/; *xōx x.* 'žuravl'-krasavka' /Lat. Anthroponoides virgo/, *byacxan x.* 'seryj žuravl' /Lat. Grus grus liffordi/ (NT 96–97, p. 16)

Bur. +xirA

xarxitā 'Oka, Zakamna caplja' (Rassadin 1996, p. 202)

3.3.1.17. LM+KUIAi /+KAIai

with colour names it forms the name of an animal:

čaqulai ~ *čaqalai* 'sea gull' (Lessing 167a); *mörön-ü č.* 'sizaja čajka' /Lat. Larus canus/, *dalai-yin č.* 'morskaja čajka' /Lat. Larus marinus/ (NT 96–97, p. 174)

Khal. +xIai

caxlai 'čajka' (Luw. 607a) ~ 'zapadnosibirskaja sizaja čajka' /Lat. Larus canus/ (NT 96–97, p. 33); *mörnī c.* 'sizaja čajka' /Lat. Larus canus/, *dalain c.* 'morskaja čajka' /Lat. Larus marinus/ (NT 96–97, p. 174)

Bur. +xAli

saxali 'čajka': *dalain s.* 'morskaja čajka' (BurRS 386b)

Kalm. +xala~ xalĀ

tsaxalā ~*saxalā* 'irgendein Vogel: Reiher (?) Seeschwalbe (?)' (KWb 420a)

²¹ Lessing gives the word *borki* 'old badger' Khal. *bor'x*. This Khalkha word is not found in modern dictionaries, instead they give the word, *burxi* 'surok-samec' (Luw. 88b). According to Kara, the written form of this word is *burki* (Kara 1998, p. 78a). Unfortunately, the data in Kowalewski's dictionary cannot be transcribed precisely, therefore, the etymology of this word is uncertain.

²² A word with uncertain etymology. It is possible that it is not related to the colour name *qara*. Another possible etymon of this word is: **garkira+GA*, cf. Khal. *xirxitē* 'vodopad' (Luw. 577b), which goes back to the form **kirkirege* cf. *kürkir-e* 'waterfall, cascade, cataract' (Lessing 506b).

Ord. +xAlā

džaxalā 'nom d'un oiseau aquatique; nom d'un oiseau qui prend des lièvres' (Mostaert 1941, p. 180a)

with colour names it forms names of diseases:

LM+KUIAi

čaqulai 'herpes, ringworm' (Lessing 167a)

Khal. +xIai

caxlai 'med. lišaj' (Luw. 607a)

Bur. +xAlAi

saxalai 'zatverdenie, ogrublenie koži ot obvetrivanija' (BurRS 386b)

Kalm. +G^Alä

tsag^alä 'Räude, rus.skotskij lišaj' (KWb 419b)

Ord. +xAlā

džaxalā 'callosités qui se forment à différents endroits du corps de certains animaux et qui en font tomber les poils' (Mostaert 1941, p. 180a)

3.3.1.18. LM +IGA(n)

with colour names it forms names of natural phenomena:

**cagalga(n)* 'White month (Mongolian New Year's feast)' (B.Kh.); **qara-lga(n)* 'bad, foul weather' (B.Kh.)

Bur. +lgAn

sagalgā(n) 'prazdnik pervogo vesennego mesjaca' (BurRS 380b); *xaralga(n)* 'nenast'e, hmuraja, pasmurnaja pogoda' (BurRS 551a)

3.3.1.19. LM+lin

with colour names it forms the name of a plant:

čagalin 'oreh vodjanoy' /Lat. Trapa L./ (NT 89–90, p. 166)

Khal. +lin

cagālin 'id.: c. galūn tavag' 'hiazospermum moločnycetkovyj' /Lat. Chiazo-spermum lactiflorum kar. et kir/ (NT 61, p. 92)

with colour names it forms the name of a stone:

LM+lin

noğogalin 'malachite' (Lessing 588b)

Khal. +lin

nogölin 'mednaja zelen' (*kraska i cvet*)' (Luw. 269a)

Bur. +lin

nogölin 'malahit; mednaja zelen' (*kraska i cvet*)' (BurRS 328b)

3.3.1.20. LM +ljA

with colour names it forms the name of a plant:

borolja 'növ. köves, kavicos szárapuszstai, sivatagi fészkesvirágú nemzetség'
 /Lat. Ajania achilleoides/ [genus compositae on stony pebbly ground in the desert] (Kara 1998, p. 66b)

Khal. +lj

borolj 'id.'

3.3.1.21. LM +ljAi

Function: To form names of plants from nouns denoting colours and other characteristics of objects (Poppe 1981, p. 387). E.g.: Bur. *malālzái* 'cvetok sarany' <*malān* 'lysý'

with colour names it forms names of plants:

LM +ljAi

čaǵaljai 'margitvirág' /Lat. Chrysanthemum/ [chrysanthemum] (Kara 1998, p. 651a); *ulaǵaljai* 'a kind of lily' /Lat. Lilium tenuifolium/ (Lessing 869b)

Khal. +ljAi /ljJa

cagájai 'margitvirág' /Lat. Chrysanthemum/ (Kara 1998, p. 651a) ~ 'nivjanik, popovnik' /Lat. Leucanthemum DC/; *sibirin c.* 'nivjanik sibirskij' /Lat. Leucanthemum sibiricum DC/ (NT 59–60, p. 37); *yagájai* 'brajja' /Lat. Braya Sternb. et Hoppe/; *yagán y.* 'brajja rozovaja' /Lat. Braya rosea Bge/ (NT 59–60, p. 12); *ulájai* 'keskenylevelű líhom' /Lat. Lilium tenuifolium/ [lily] (Kara 1998, p. 489a)

Bur. +lzAi

ulážzai 'rupsztivšasja sarana' (BurRS 466a)

with colour names it forms names of animals:

LM +ljAi

**boroljai* 'lark' (B.Kh.); **noǵoǵaljai* 'siskin' (B.Kh.)

Khal. +jOj

boroljoi 'zavoronok polevoj' (NT 78–79–80, p. 235); *nogoljoi* 'čiž' (NT 78–79–80, p. 244)

3.3.1.22. LM +mAli

with colour names it forms the name of a plant:

kürmeli 'sedge, carex' (Lessing 506b)

Khal.+mAl

xürmel 'osoka' (Luw. 577a)

Kalm. +ml

kürml 'irgendeine Pflanze' (KWb 248a)

3.3.1.23. LM +mAng

**siramang* 'one whose face is clear or yellow and whose hair is blond' (B.Kh.)

Ord. +mAn

śarmań 'qui a le teint clair ou jaune et les cheveux tirant sur le blond, qui a le teint clair' (Mostaert 1941, p. 610a)

Khal. +mAn

śarman xóxó^ə 'kukuška malaja, širokokrykaja' (NT 78–79–80, p. 267)

3.3.1.24. MNT +mbAi

with colour names it forms the name of an animal:

qarambai 'osobaja poroda dikih černyh utok' (Kozin 1941, p. 595) [MNT 200]

3.3.1.25. LM+ng

e.g.: *dalang* 'holka lošadi' <*dalu* 'łopatka'

LM+ng

čang 'Weißheit, weiße Farbe; Milchprodukte' (KWb 421b)

Kalm. +ñ

tsań 'id.'

with colour names it forms the name of an animal:

LM+ng

borong 'dikaja koška' (Kowalewski 1214b)

with colour names it forms the name of a plant:

MNT +ng

öleń 'frisches Gras' (Haenisch 1939, p. 122) [MNT 255]

Muq. +ng

öleng 'trava' (Poppe 1938, p. 275b)

LM +ng

öleng 'soft grass, thick grass' (Lessing 633b)

Khal. +ñ

ölön 'osoka'; ö. *saxal* 'lugovoj hvošč' (Luw. 320a)

Bur. +ñ

üleń 'beskil'nica tonkocvetnaja'; ü. *xyāg* 'vejnik Langsdorfa', ü. *übhen* 'osoka' (BurRS 502b)

Kalm. +ñ

ölñ 'saftiges Gras, Wiese' (KWb 295a)

Ord. +ñ

ölön 'herbes épaisse constituées par les feuilles du *Deresii* (*Lasiagrostis splendens*); nom d'endroit'; *ulān ö.* 'nom d'une espèce de junc' (Mostaert 1941, p. 531b)

with colour names it forms names of natural phenomena:

- LM +ng
 čang ‘hoarfrost’ (Lessing 164a)
 Khal. +ñ
 cañ ‘izmoroz’, inej’ (Luw. 604a)
 Bur. +ñ
 señ ‘id.’ (BurRS 403a)
 Kalm. +ñ
 tsañ ‘Reif, Frost’ (KWb 421b)

3.3.1.26. LM +nUd

with colour names it forms names of animals:

- garanud ‘čepračnyj šakal’; jegerdeniūd ‘ryžij volk’ (NT 96–97, p. 102); si-ramud ‘šakal’ (Kowalewski 1520a)
 Khal. +nUd
 šaranūd ‘šakal, krasnyj volk’ /Lat. Cuon alpinus/; xaranūd ‘čepračnyj šakal’ /Lat. Canis niger/; jērdniūd ‘ryžij volk’ /Lat. Canis mesomelas/ (NT 96–97, p. 102)
 Kalm. +nūd
 šar^čnūd ‘die Gelben (ein Stamm od. Geschlecht unter den Kalmücken)’ (KWb 351a)
 Ord. +nŪt
 džerDenūt ‘chevaux roux dont la queue et la crinière sont à peu près de la même couleur’ (Mostaert 1941, p. 192b)

with colour names it forms names of diseases:

- LM +nŪd
 ulağanud ‘kor’ (Kowalewski 397a)
 Khal. +nŪd
 ulānid ‘kanyaró’ [measles] (Kara 1998, p. 490a; ANT 57)
 Ord. +nŪt
 ulānūt ‘rougeole’ (Mostaert 1941, p. 729b)
 Kalm. +nŪd
 ulanūd ‘die Masern, Röteln’ (KWb 448a)

with colour names it denotes human characteristics:

- Ord. +nŪt
 Boronūt ‘les gris (chevaux); nom de clan’ (Mostaert 1941, p. 81b); gö^čxōnūt ‘gris; nom de clan’ (Mostaert 1941, p. 269b); xaranūt ‘noirs; nom de clan’ (Mostaert 1941, p. 338b); šaranūt ‘nom de clan’ (Mostaert 1941, p. 609a); šarganūt ‘id.’ (Mostaert 1941, p. 609b); tšagánūt ‘id.’ (Mostaert 1941, p. 692a); ulānūt ‘roux (boeufs), rouans (chevaux); nom de clan’ (Mostaert 1941, p. 729b)

3.3.1.27. LM +kir+mA

This is a compound suffix in NN +kir (see under 3.3.2.5.) and NN +mA

- with colour names it forms the name of a plant:*
 čákirm-a ‘orchid’ (Lessing 162a) ← *čakirmača (B.Kh.)
 Khal.+xirmĀ
 caxirmā ‘orhideja’ (Luw. 607a)
 Ord. +^čxirmak
 dža^čxirmak ‘iris ensata Thunb. (d’après Potanin)’ (Mostaert 1941, p. 181a)

3.3.1.28. LM +rU

with colour names it forms the name of an animal:

- Zhiyuan Yiyu +r
 hular ‘Tetraogallus’ (Kara 1990, p. 299)
 LM +rU
 ularu ‘gluhoj teterev’ (Kowalewski 401b) ~ ‘gornaja indejka’ /Lat. Tetraogallus/ ~ ‘kavkazskij teterev’ /Lat. Lyrurus mlokosiewiczi/; altan nidüüt u. ‘kol’ čatjy fazan’ /Lat. Phasianus torquatus/ ~ ‘šalfejnyj teterev’ (NT 96–97, p. 36)
 Khal. +r
 ular ‘gornaja indejka’ /Lat. Tetraogallus/ (NT 96–97, p. 36): altan nüdet u. ‘id.’

3.3.1.29. LM +s

with colour names it forms the name of a metal:

- LM +s
 čas ‘weißes Messing, Weißmetall; Zink’ (KWb 423a)
 Kalm. +s
 tsas ‘id.’

3.3.1.30. LM +s+KAn

Function: NN. This is a compound suffix in NN +s and NN +KAn (see under 3.2.2.4.)

- with colour names it forms the name of a plant:*
 sirasqan jims ‘oreh dumbejskij’ /Lat. Juglans manshurica Maxim./ (NT 89–90, p. 159)
 Khal. +xAn
 šarsxan jims ‘xaw jagas met xawtgai xelbertei, xušganı idenı adil amttai, jellej urgadag negen jüil jims’ (Cewel 1966, p. 840a)

3.3.2. Suffixes forming adjectives

3.3.2.1. LM+bir, +bUr

Function: To form nouns designating slight shades of colours²³ (GWM §109)

Zhiyuan Yiyu +bi[r]

hulabifr 'reddish yellow' (Kara 1990, p. 299)

LM+bir, +bUr

čágabir ~ *čágábur* 'belovatyj, dovol'no belyj, svetlyj, blednyj' (Kowalewski 2084a); *čayibur* 'belovatyj, blednyj (svet, cvet); svetlyj'; cf. *čayibur nogog-a* 'kapusta', *čayibur altan* 'blednoe zoloto' (Kowalewski 2075b); *nogobir* 'izzelenaya, zelenovatyj'; cf. *nogobir kókečü* 'nazvanie nekotoroj ptički, sinica?' (Kowalewski 680a); *nogobur* 'temnozelenyj' (Kowalewski 680a); *sírabir* 'svetlo-zeltyj' (Kowalewski 1520b); cf. *sírabir čágagai* 'želtovatyj orel-berkut' /Lat. Asquila chrysaetus japonica/ (NT 96–97, p. 169); *ulağabur* 'krasnovatyj, malinovyj'; cf. *ulağabur modun* 'nazvanie dereva iz roda maloroslyh dubov' (Kowalewski 397a), *ulağabur padub gorodčatij* /Lat. Oex crenata Thunb./ (NT 89–90, p. 116); *ulabur* ~ *ulabir* 'krasnovatyj, krasnejuščijjsja'; cf. *ulabur argui* 'petuški cvetki' /Lat. iris Sibirica/ (Kowalewski 397b), *ulabir sibağun* 'krasnonogij ibis' /Lat. Nipponia nippon/ (NT 96–97, p. 54); *qarabir* 'izěerna, s černovatym otlivom, černogo losnjaščegosja cveta' (Kowalewski 833a); cf. *qarabir sibağun* 'al'pijskaja galka' /Lat. Pyrrhocorax graculus/ (NT 96–97, p. 189); *kókebir* 'sinevatyj, golubovatyj' (Kowalewski 2625a); cf. *dalai-yin kókebir tagtag-a* 'kamennyyj (skalistyyj) golub' /Lat. Columba rupestris/ (NT 96–97, p. 190); *yağabur* 'rosy' (Lessing 423a)

Khal. +wXr, +bXr

caiwar 'belovatyj, svetlyj, blednyj' (Luw. 602b); cf. *caiwar nogō* 'kapusta kitajskaja' /Lat. Brassica chinensis/ (NT 89–90, p. 21); *nogōwör* 'zelenovatyj' (Luw. 269a); cf. *nogōwör degli* 'kvakva' (NT 78–79–80, p. 244); *šarwir* 'želtovatyj' (Luw. 646b); cf. *šarwir cágagai* 'želtovatyj orel-berkut' /Lat. Asquila chrysaetus japonica/ (NT 96–97, p. 169); *ulāwar* 'krasnovatyj' (Damdinšüren 1982, 232b); cf. *ulāwar xōndeı* 'belobrovnik' (NT 78–79–80, p. 252), *ulāwar šuwū* 'čečevisca' (NT 78–79–80, p. 252), *ulāwar* 'padub gorodčatij' /Lat. Oex crenata Thunb./ (NT 89–90, p. 116); *ulbar* 'krasnovatyj' (Luw. 452b); cf. *ulbar šuwū* 'krasnonogij ibis' /Lat. Nipponia nippon/ (NT 96–97, p. 54); *ulbar gal sül* 'gorivostka krasnospinnaja' (NT 78–79–80, p. 253); *ulbar argui* 'čistej bajkal'skij' /Lat. Stachys baicalensis Fisch./ (NT 89–90, p. 155); *xarwir* 'černovatyj'; cf. *xarwir šuwū* 'al'pijskaja galka' /Lat. Pyrrhocorax graculus/ (NT 96–97, p. 189); *xōxwör* 'sinevatyj'; cf. *xōxwör tagtā* 'golub' siziýj' (NT 78–79–80, p. 260); *dalaın xōxwör tagtā* 'kamennyyj (skalistyyj) golub' /Lat. Columba rupestris/ (NT 96–97, p. 190);

²³ In Buriat this suffix also occurs in other semantic fields. E.g. *xüiteber* 'xolodnovatyj' < *xüiten* 'xolodno, xolodnyj'; *alyabar* 'slegka rezvyyj, šalovlivyj' < *alyā* 'šalost', šutka'; *hulabar* 'slabovatyj' < *hula* 'slabyj'.

Bur. +bXr

nogobor 'zelenovatyj' (BurRS 328b); *saibar* 'svetlyj' (BurRS 383a); *ulabar* 'krasnovatyj' (e.g. u. *haxal* 'ryževataja boroda') (BurRS 467a)

Ord. +wUr/+wOr

tsagāwur 'blanchâtre' (Mostaert 1941, p. 692a); *ulawur* 'rougeâtre' (Mostaert 1941, p. 730a); *nogōwör* 'verdâtre' (Mostaert 1941, p. 495a); *šarawur* 'jaunâtre' (Mostaert 1941, p. 609a); *xaravur* 'noirâtre' (Mostaert 1941, p. 339a); *Gō⁴xōd-wör* 'bleuâtre' (Mostaert 1941, p. 269b)

Kalm. +wr

xōwr 'ziemlich blaßgelb, isabellfarbig' (KWb 193a); *kökwr* 'blauend, bläulich' (KWb 237b); *nogāwr* 'etwas grün; blaugrün' (KWb 278b); *šar^awr* 'gelblich, etwas gelbgefärbt' (KWb 351b); *tsagāwr* 'weißlich, ziemlich weiß, etwas weiß' (KWb 419b); *tsāwr* 'weißlich, bleich' (KWb 425b); *ulāwr* 'rötlich' (KWb 448b)

3.3.2.2. LM +btUr

Function: To form nouns designating slight shades of colours (GWM §111; Dondukov 1964, p. 71).²⁴

Muq. +mtUr

hulāmtur bora (*morin*) 'krasnovato-seryj (*kon*)' (Poppe 1938, p. 187a)

Zhiyuan Yiyu -biU[r]

hulābu[r] 'reddish yellow' (Kara 1990, p. 299)

LM +btUr

alabur 'plus ou moins bigarré' (Mostaert 1941, p. 11b); *borobtur* 'serovatyj, neskol'ko seryj' (Kowalewski 1218b); *čágabur* 'belovatyj, belyj, blestaččij' (Kowalewski 2084a); cf. *čágabur gičigen-e* 'lapčatka belovataja' /Lat. Potentilla dealbata Bge./ (NT 59–60, p. 30); *nogobtur* 'svetlo-zelenyj' (Kowalewski 680a); cf. *nogobtur kókečü* 'ošejnivkyj zimorodok' /Lat. Halcyon pileata/ (NT 96–97, p. 65); *sírabur* 'izželta belyj, želtovatyj' (Kowalewski 1520b); cf. *sírabur samja* 'zolotistaja marmozetka' /Lat. Calithrix chrysoleuca/ (NT 96–97, p. 106); *ulabur* 'krasnovatyj, svetlo-krasnyj' (Kowalewski 398a); *qa-rabur* 'izžerna černovatyj, temnyj' (Kowalewski 833a); *kókebtür* 's golubym otlivom, sinevatyj' (Kowalewski 2625a); cf. *kókebtür boğsurg-a* 'rogatij žavoronok' /Lat. Eremophila alpestris/ (NT 96–97, p. 62), *kókebtür gübsiyagai* 'zarazija sinevataja' /Lat. Orobanche coerulescens Steph./ (NT 59–60, p. 21); *kürebütür* 'smuglovatyj, nemnogo temno-rusyj (o čeloveke)' (Kowalewski 2637a); *yağabur* 'pinkish' (Lessing 423a); cf. *yağabur urtu budarğana* 'rozovatoplodnaja soljanka' /Lat. Salsola rosacea/ (NT 59–60, p. 52)

Khal. +wtXr

borowtor 'serovatyj' (Luw. 78a); *cagāwtar* 'belovatyj' (Luw. 600b); cf. *ca-gāwtar gičgene* 'lapčatka belovataja' /Lat. Potentilla dealbata Bge./ (NT 59–

²⁴ Cf.: Bur. *xalübtar* 'dostatočno žarkij' < *xalūn* 'gorjačij'; *gašübtur* 'neskol'ko gor'kova-tij' < *gašün* 'gor'kij'.

60, p. 30); *nogōwtor* ‘zelenovatyj’ (Luw. 269a): cf. *nogōwtor xōxōč* ‘ošejni-kovyj zimorodok’ /Lat. Halcyon pileata/ (NT 96–97, p. 65); *nogōwtor dūč ūwūn* ‘penočka zelenaja’ (NT 78–79–80, p. 244); *šarawtar* ‘želtovatyj’ (Luw. 646a); cf. *šaravtar samj* ‘zolotistaja marmozetka’ /Lat. Calithrix chrysoleuca/ (NT 96–97, p. 106); *ulāwtar* ‘krasnovatyj’ (Luw. 450b); *xarawtar* ‘černovatyj’ (Luw. 513b); *xōxōwtōr* ‘sinevatyj’ (Luw. 557a): cf. *xōxōwtōr bogširgo* ‘rogatyj žavoronok’ /Lat. Eremophilus alpestris/ (NT 96–97, p. 62), *xōxōwtōr guwšākai* ‘zaraziha sinevataja’ /Lat. Orobanche coeruleascens Steph./ (NT 59–60, p. 21); *xürewter* ‘koričnevatyj’: cf. *xürewter tagtā* ‘golub’ buryj’ (NT 78–79–80, p. 262); *yagāwtar* ‘rozovatyj’ (Luw. 690a); cf. *yagāwtar ürt budar-gana* ‘rozovatoplodnaja soljanka’ /Lat. Salsola rosacea/ (NT 59–60, p. 52)

Bur. +biXr, +lxXr

borobtor ‘serovatyj; dovol’no smuglyj, prostovatyj (o čeloveke)’ (BurRS 106a); *sagābiar* ‘belovatyj’ (BurRS 380b); *nogōbtor*: cf. *Bohan nogoltor* ‘zelenovatyj’ (BurRS 328b); *šarabtar* ‘želtovatyj, ryzevatyj’ (o cvetah) (BurRS 721a); *ulābtar* ‘krasnovatyj’ (o ne pospevzej klubnike B.Kh.) (BurRS 465b); *xalyūbtar* ‘igrenij, igrenevyj’ (o masti) (BurRS 541a); *xarabtar* ‘temnovatyj, černovatyj’ (o glazah, ne pospevshj jagadah B.Kh.) (BurRS 550a); *xaraltar* ~ *xaltar* ‘svetlo-gnedoj (o lošadi); s ryžemi polosami na nogah i mordje (o sobake, lísice) (BurRS 539a); *xüreibter* ‘sinevatyj’ (o ne pospevzej černike B.Kh.) (BurRS 636a); *xüribter* ‘koričnevatyj’ (BurRS 626b); *yagābtar* ‘rozovatyj’ (BurRS 795a)

Ord. +b'́t'Wr, +l'́t'Wr

alab'́t'ur ‘plus ou moins bigarré’ (Mastaert 1941, p. 11b); *Borob'́t'or* ‘brunâtre’ ~ *Borolt'or* (Mastaert 1941, p. 81a); *tš'agāb'́t'ur* ‘blanchâtre’ (Mastaert 1941, p. 690b); *xaraB'́t'ur* ~ *xarab'́t'ar* ‘noirâtre’ (Mastaert 1941, p. 337b) ~ *xarali'ur* (Mastaert 1941, p. 338a); *šarab'́t'ur* ‘jaunâtre’ (Mastaert 1941, p. 608b); *cō'kxib'́t'ör* ‘bleutâtre’ (Mastaert 1941, p. 269a); *nogōb'́t'or* ‘verdâtre’ (Mastaert 1941, p. 495a); *ulab'́t'ur* ‘rougeâtre’ (Mastaert 1941, p. 728b)

Kalm. +ptr

al'ptr ‘etwas bunt’ (KWb 8a); *bor'ptr* ‘graulich, etwas grau’ (KWb 52a); *tsa-gáptr* ‘etwas weiß, weißlich, blaß’ (KWb 419b); *kök'ptr* ‘bläulich’ (KWb 237a); *nogáptr* ‘grünlich; hellgrün, schwach grün’ (KWb 278b); *xar'ptr* ‘schwärzlich’ (KWb 170a); *šar'ptr* ‘gelblich, hellgelb’ (KWb 351a); *uláptr* ‘rötlich’ (KWb 448a); cf. *ul'ptr* ‘rötlich, sich rötend’ (KWb 449a)

Gorlos +ptr

xüxiptür ‘sinevatyj’ (Rudnev 1911, p. 152a)

3.3.2.3. LM +btUr+KA

Function: To form nouns designating slight shades of colour: diminutive. This is a compound suffix in NN +btUr (see under 3.3.2.2.) and NN +KA (see under 3.2.2.4.)

LM +btUr+KA

čágabturgan ‘belovatyj, blednobelyj’ (Kowalewski 2084b); *noğobturgan* ‘svetlo-zelenovatyj’ (Kowalewski 680b); *sirabturgan* ‘želtovaten’kij, izželta belovatyj’ (Kowalewski 1520b); *ulabturgan* ‘izkrasna, krasnovaten’kij, rozovyj’ (Kowalewski 398a); *qarabturgan* ‘černovaten’kij, černovatyj’ (Kowalewski 833b); *kökebtürken* ‘neskol’ko sinij’ (Kowalewski 2625a)

Khal. +wtXr+xXn

borowtorxon ‘greyish’ (B.Kh.); *cagāwtarxan* ‘whitish’ (B.Kh.); *nogōwtorxon* ‘greenish’ (B.Kh.); *šarawtarxan* ‘yellowish’ (B.Kh.); *ulāwtarxan* ‘reddish’ (B.Kh.); *xarawtarxan* ‘blackish’ (B.Kh.); *xōxōwtōrxon* ‘bluish’ (B.Kh.); *xürewterxen* ‘brownish’ (B.Kh.); *yagāwtarxan* ‘pinkish’ (B.Kh.)

Bur. +btXr+xXn

borobtorxon ‘greyish’ (B.Kh.); *sagābtarxan* ‘whitish’ (B.Kh.); *nogōbtorxon* ‘greenish’ (B.Kh.); *šarabtarxan* ‘želtovaten’kij’ (BurRS 721a); *ulābtarxan* ‘reddish’ (B.Kh.); *xarabtarxan* ‘černovaten’kij’ (BurRS 550a); *xüxeberterxen* ‘bluish’ (B.Kh.); *xüribterxen* ‘brownish’ (B.Kh.); *yagābtarxan* ‘pinkish’ (B.Kh.)

Kalm. +ptr+xAn

ulāptrxan ‘etwas rötlich’ (KWb 448a); *bor'ptrxan* ‘etwas grau’ (KWb 52a)

3.3.2.4. LM +dÜ

čayibardū ‘belovatyj, blednovatyj’: cf. *čayibardū mogoi-yin idegen* ‘očitok blednovatyj’ /Lat. Sedum pallescens Freyn./ (NT 59–60, p. 41); *kürengdū* ‘barnás’ [brownish] (Kara 1998, p. 629a)

Khal. +dÜ

caíwardū ‘belovatyj, blednovatyj’: cf. *caíwardū mogoin idē* ‘očitok blednovatyj’ /Lat. Sedum pallescens Freyn./ (NT 59–60, p. 41); *xürendū* ‘koričnevatyj’ (o pole posle vspaški, pahoty B.Kh.) (Luw. 577b; Kara 1998, p. 629a)

3.3.2.5. LM +GA

MNT +KA

širqa ‘gesprenkelt, meliert’ (Haenisch 1939, p. 142)

Muq. +GA

širqa (morin) ‘solovaja (lošad)’ (Poppe 1938, p. 336a)

LM +GA

širqa ‘light bay’ (Lessing 716b)

Khal. +gA

šarga ‘solovojy (o masti); palevijy (o cvete)’ (Luw. 646b); cf. *šarga xairuldai* ‘zaviruska blednaja’ (NT 78–79–80, p. 267); *šarga ergü bor* ‘kozodoj bulanyj’ (NT 78–79–80, p. 267)

Bur. +gA

šarga ‘solovojy (o masti); palevijy (o cvete); laskovijy (e.g.: *üdin šarga naran* ‘poludennoe solnyško’)’ (BurRS 722a)

Ord. +gA

šarga ‘couleur isabelle (*robe de cheval*); cheval isabelle’ (Mostaert 1941, p. 609b)

Kalm. +gA

šargā ~ šarxa ‘gelblich, isabellfarbig; hellgelb’ (KWb 350a)

3.3.2.6. LM +GAI (> +GUI)

Zhiyuan Yiyu +KAl

širqal muri ‘horse of sand colour’ (Kara 1990, p. 323)

LM +GUI

sirgal ~ šarǵul ‘bay (*colour of a horse*)’ (Lessing 717a); ‘lošad’ belaja s krasnovatymi krapinami’ (Kowalewski 1530a)

Khal. +gA1

šargal ‘cagānd ulāwtar šar xol’cson öngö’ (Cewel 1966, p. 839b); cf. *šargal ulān xurgan jasā* ‘mak oranžovo-krasnyj’ /Lat. Papaver rubroaurantiacum/ (NT 61, p. 56), *šargal balč šuwū* ‘ščurka zolotistaja’, *šargal sūwē cagān ržanka zolotistaja*’ (NT 78–79–80, p. 267)

Bur. +gA1

šargal ‘solovyj, belesyj, palevyj (*o zolotistoj pšenice, belesyh resnicah glaz*)’ (BurRS 722b)

Dagur. +GAI

šargal ‘solovyj’ (Popov 1930, p. 101a)

Kalm. +GAI

šargal ‘gelb, strohfarben, isabellfarbig’ (KWb 350a); *šarxal* ‘strohfarben, gelblich’ (KWb 350b)

Ord. +gUI

šargul ‘robe de cheval: blanc avec yeux et sabots noirs, isabelle très pâle’ (Mostaert 1941, p. 610a)

3.3.2.7. LM +gis

with colour names it denotes human characteristics:

qargis ‘viciousness, malice, cruelty, ferocity, brutality; tyrant, tyranny; reactionary’ (Lessing 936b)

Khal. +gis

xargis ‘žestokij, ljutij, svirepyj, zloj; despottičnyj; reakcionnyj’ (Luw. 515b)

Bur. +xis

xarxis ‘reakcionnyj’ (BurRS 557b)

Ord. +gis

xargis ‘cruel, féroce, brutal, qui est sans compassion; malheur qui aurait dû arriver à un autre’ (Mostaert 1941, p. 339b)

3.3.2.8. LM +GU

MNT +U

qara ‘u ‘schwarzer’ (Haenisch 1939, p. 60)

LM +GU

qaraǵu ‘fukar, fösvény’ [miserly, avaricious, mean, niggardly] (Kara 1998, p. 563a)

Khal. +Ū

xarū ‘skupoj’ (Luw. 517b)

Bur. +Ū

xarū ‘id.’ (BurRS 556b)

Ord. + Ū

xarū ‘force, vigueur’ (Mostaert 1941, p. 341a)

Kalm. + Ū

xarū ‘geizig, filzig, zu viel das Seinige hütend od. sparend; dunkel, verlöschen’ (KWb 171a)

3.3.2.9. LM +jili

with colour names it forms the name of a plant:

sirajill modun ‘pueraria volosistaja’ /Lat. Pueraria hirsuta/ (NT 89–90, p. 179)

Khal. +jil

sarjil modon ‘id.’

3.3.2.10. LM +KAmAi

with colour names it forms the name of an animal:

qarqamai noğosun ‘ptica, rod utki’ (Kowalewski 844a)

Khal. +xmAi

xarxmai nugas ‘mandarinka’ /Lat. Anas galericulata/ (NT 96–97, p. 43)

3.3.2.11. LM +ki-GAr

Function: NN: Compound suffix which consists of the NV +kX- and VN -GAr (Dondukov 1964, p. 74)²⁵

**zakīgar* ‘colourless’ (B.Kh.); *čengkeger* ‘light blue, bluish’ (Lessing 172a)

Bur. +xigXr

saxigar ‘bescvetno-belyj’: cf. s. *sagān* ‘belyj-prebelyj, belosnežnyj, oslepi-tel’noj belizny’ < *saxi-* ‘sijat’’ (BurRS 387a); *senxiger* ‘svetlo-goluboj’ (BurRS 403b)

²⁵ Cf. *tabqaǵar* ‘flat-topped, flat’ < *tabqayi-* ‘to be flat’; *tebkeger* ‘quadrangular’ < *tebkeyi-* ‘to be(come) angular or square’; Bur. *lünxeger* ‘glubokij, ob’emistyj’ (*o posude, bočke*) < *lünx±-* ‘byt’ ob’emistyj i глубоким’.

3.3.2.12. LM +lbi

Function: To form nouns designating slight shades of colour (Dondukov 1964, p. 90).
 *borolbi 'greyish' (B.Kh.), *kókelbi 'bluish' (B.Kh.)
 Bur. +lbi /+l'bA
 borolbi 'Tugnuj slegka serovatyi'; xüxelbi 'sinevatyi' (Dondukov 1964, p. 90)
 ~ xüxel 'be' 'sinevatyi, sizovatyi : x. xixed 'sinevatey soski u volčicy', x. tala 'bescvetnaja step'; redko serovatyi, seryj' (BurRS 636b)

3.3.2.13. LM +lKAi

with colour names it denotes human characteristics:
 čágalqai 'jószandékú, jószívű, vajszívű' [well-intentioned, warm-hearted, tender-hearted] (Kara 1998, p. 651a)

Khal. +lxAi
 cagálxai 'id.'

3.3.2.14. LM +iki+mA

*čágalkima 'whitish' (B.Kh.)
 Bur. +lximA
 sagálxima 'belejuščij, belyj' (o svežih ščepkah) (BurRS 381a)

3.3.2.15. LM +mA+GAr

*qaramağar 'coarse' (B.Kh.); *siramağar 'one whose face is clear or yellow and whose hair is blond' (B.Kh.)
 Bur. +mAgAr
 xarmagar xorgoi 'Zakamna grubaja ryhlaja parča' (Rassadin 1996, p. 202)
 Ord. +mAgAr
 šarmagar 'qui a le teint clair ou jaune et les cheveux tirant sur le blond; qui a le teint clair' (Mostaert 1941, p. 610a)

3.3.2.16. LM +mA1

Function: To form nouns designating qualities.

MNT +mA1
 siramat 'gelb': s. altatan 'gelbgoldene' (Haenisch 1939, p. 141)
 LM +mA1
 siramat 'nemesfémmel befuttattott' [plated with noble metal] (Kara 1998, p. 703b)
 Khal. +mA1
 šarmal 'id.'
 Bur. +mA1
 šaramal 'požoločennyj' (o poželtevših osennih list'jah B.Kh.) (BurRS 721b)
 Ord. +mA1
 šaramal 'doré' (Mostaert 1941, p. 609a)

3.3.2.17. LM +mdUG

kökemdiğ 'sinevatyi, lazurevyj': cf. kökemdiğ modun 'kust ili stebel' indigo' (Kowalewski 2626b)

Khal. +mdOg
 xöxömdög 'sinevatyi' (Luw. 557a): cf. xöxömdög dört nugas 'sin'ga, černyj turpan'; xöxöndög degl 'volček obyknovennyj' (NT 78–79–80, p. 260)

3.3.2.18. LM +rA-l

Function: NN. A compound suffix which consists of the NV +rA- (see under 3.2.3.4.) and VN -l (GWM §159)
 kókerel 'sinee, goluboe, zelenoe' (Kowalewski 2628a)

3.3.2.19. LM +sin

with colour names it forms the name of a plant:
 altasin čečeg 'donnik zolotistyj' /Lat. Melilotus officinalis Lam./ (NT 89–90, p. 186)

Khal. +šin
 altšin ceceg 'id.'

3.3.2.20. LM +sUn

altasun 'zolotistyj': cf. altasun čečeg 'hamamelicvet japonskij' /Lat. Hamamelis japonica/ (NT 89–90, p. 188); sirasun 'želtovatyj': cf. sirasun biljūqai 'želtobruhaja amerikanskaja slavka' /Lat. Sciurus noveboracensis/ (NT 96–97, p. 198)

Khal. +sAn
 altsan 'zolotistyj': cf. altsan ceceg 'hamamelicvet japonskij' /Lat. Hamamelis japonica/ (NT 89–90, p. 188); širsan 'želtovatyj': cf. širsan byaljúkai 'želtobruhaja amerikanskaja slavka' /Lat. Sciurus noveboracensis/ (NT 96–97, p. 198)

3.3.3. Suffixes forming verbs from colour names

3.3.3.1. LM *(+yi)-+IA-či-

Function: Unexpected action; Intrans. This is a compound suffix in NV +yi- (see under 3.2.3.7.), NV ±l(A)- and VV *-či-> Bur. -šX- (Čeremisov 1951, p. 851)²⁶
 *qaralači- 'to grow dark, become dark, to darken' (B.Kh.); *ulayilači- 'to become red from malice' (B.Kh.)

Bur. +IAšA-
 xarlaša- 'potemnet', počernet' (BurRS 556a)

²⁶ Cf.: Bur. xabdaša- 'bystro raspuhnut' < xabda- 'puhnut'; untaša- 'bystro zasnut', usnut', < unta- 'spat'.

Ord. +ltš'i-
ulāltš'i- 'être rouges de colère' (Mostaert 1941, p. 730b)

3.3.4. Suffixes forming deverbal nouns

3.3.4.1. LM +bAlJ-A-GUr

Function: VN. This is a compound suffix in NV *+bAljA-* (see under 3.2.5.1.); and VN *-GUr* (GWM §155)²⁷
ulabaljágur 'krasnyj, svežij, zdrovyyj cvet (*lica*)' (Kowalewski 397b); cf.
ulabaljágur čečeg 'kamelija sasancka' /Lat. *Camellia sasanqua*/ (NT 89–90,
p. 193), *ulabaljágur mogoi-yin idegen* 'očitok purpurnyj' /Lat. *Sedum purpu-
reum L.* Schult./ (NT 59–60, p. 41)

Khal. +ljür

ulabaljür ceceg 'kamelija sasancka' /Lat. *Camellia sasanqua*/ (NT 89–90, p.
193), *ulabaljür mogoin idē* 'očitok purpurnyj' /Lat. *Sedum purpureum L.*
Schult./ (NT 59–60, p. 41)

3.3.4.2. LM +l-GUi

Function: VN. This is a compound suffix in NV *+l(A)-* (see under 3.2.3.3.) and VN *-
GUi*.

**borolgüi* 'ash-grey' (B.Kh.)

Bur. +lg̊i

borolg̊i 'pepel'nyj (*o cvete*)' (BurRS 106a)

3.3.4.3. LM (+yi)-bAGAr

Function: To form nouns designating slight shades of colour. This is a compound
suffix in NV *+yi-* (see under 3.2.3.7.) and VN *-bAGAr*.

čayibágur 'belovatyj, blednyj' (Kowalewski 2075a); **čeyibeger* 'pale blue,
sky-blue' (B.Kh.); **ulabágur* 'reddish' (B.Kh.)

Khal. (+i)-wgAr

caivgar 'belovatyj, svetlyj' (Luw. 602b)

Bur. (+i)-bAgAr

saibagar 'belyj; svetlyj; belobrysij, belesyj' (BurRS 383a); *sibeger* 'goluboj,
sinij (*o glazah, nebe*); sivyj (*o masti*)' (BurRS 388b); *ulbagar* 'neskol'ko kras-
novatyj (*o vekah*)' (BurRS 468a)

3.3.4.4. LM (+yi)-dAm

Function: VN. This is a compound suffix in NV *+yi-* (see under 3.2.3.7.) and VN
-dAm.

²⁷ Cf.: *ganağur* 'lance' <*qana-* 'to bleed someone'; *qaduğur* 'sarłó; kasza' [sickle, scythe]
<*qadu-* 'to mow'.

LM (+yi)-dAm
čayidam 'vse moločnoe, kak to: slivki, smetana, maslo i pr.' (Kowalewski
2067a); *čeyidem* 'a kind of kumiss' (Lessing 170b)

Khal. (+i)-dAm

cídem 'voda s molokom' (Luw. 607b)

Bur. (+i)-dAm

sídem 'zabelennaja voda (*pit'e, upotrebljavšeesja v žarkoe vremja*)' (BurRS
388b)

Kalm. (+i)-dm

tsádm '(ein wenig) Milch und (viel) Wasser als Getränk' (KWb 425a); *tsídm* ~
tsídm 'Gemisch von Wasser (als Trunk)' (KWb 443a)

3.3.5. Suffixes forming deverbal verbs

3.3.5.1. LM +d-KA-

Function: Causative from *+d(A)-*
čágadqa- 'to make white, whitewash; to bleach; to clear up; to prove some-
body's innocence, vindicate' (Lessing 157b); *ulayidqa-* 'to make red-hot; to
make red, redder' (Lessing 870b)

Khal. +t-gA-

cagátga- 'reabilitirovat', opravdyvat' (Luw. 601b); *ulaítga-* 'nakalivat'sja do-
krasna' (Luw. 451b)

Ord. +d-xa-

tíš agádx-a- 'éclaircir, tirer au clair' (Mostaert 1941, p. 690b); *uláDxa-* 'rendre
rouge, rougir au feu, chauffer (*fer*)' (Mostaert 1941, p. 730a)

Mngr. +Da-Ga-

alaGáDaGa- 'rendre bigarré' (Mostaert – De Smedt 1933, p. 4); *BoroDaGa-*
'rendre gris' (Mostaert – De Smedt 1933, p. 28); *tíš'igánDaGa-* 'rendre blanc,
blanchir' (Mostaert – De Smedt 1933, p. 447); *fülánDaGa-* 'rendre rouge,
rougir' (Mostaert – De Smedt 1933, p. 105); *xaraDaGa-* 'rendre noir'
(Mostaert – De Smedt 1933, p. 159); *kʰuGuoDaGa-* 'rendre bleu' (Mostaert –
De Smedt 1933, p. 209); *noGónDaGa-* 'rendre vert, du suivant' (Mostaert – De
Smedt 1933, p. 281); *šíraDaGa-* 'rendre jaune' (Mostaert – De Smedt 1933,
p. 398)

3.3.5.2. LM (+yi)-rA-

Function: Intrans. This is a compound suffix in NV *+yi-* (see under 3.2.3.7.) and VV
-rA- (see under 3.2.3.4.).

čayira- 'to become white; to fade; to become pale; to dawn' (Lessing 161a);

ulayira- 'turn red or look red; to go mad; to run amuck; to envy, become
jealous or greedy; to be writh; to become violent' (Lessing 870b)

- Khal. (+i)-rA-
caira- ‘belet’, *svetlet*, *blednet*’ (Luw. 603a); *ulaira-* ‘krasnet’, *vygljadit* ‘krasnym’ (Luw. 451b)
- Bur. (+i)-r(A)-
saira- ‘belet’, *belet’sja*; *stanovit’sja belym*, *priobretat’ belyj cvet koži* (*o novoroždennom*); *blednet’* (*o lice ot ispuga*); *svetlet’* (*o nebe, gorizonte*), *brezžit’*, *svetlet’* (*o zare*); *perestavat’ prekrasčat’sja* (*o dožde*); *otlegat’* (*o serdce*); *opravdyvat’sja*’ (BurRS 383a); *ulair-* ‘*stanovit’sja krasnym*, *alet’* (*o fruktah B.Kh.*); *stanovit’sja v rjady krasnyh, revolucionizirovat’sja*’ (BurRS 467b)

3.3.5.3. LM (+yi)-s-

Function: Intrans. This is a compound suffix in NV +yi- (see under 3.2.3.7.) and VV -s-.

- LM (+yi)-s-
ulayis- ‘vörösen izzik; átforrósodik’ [to glow red-hot; to become very hot] (Kara 1998, p. 490b)

- Khal. (+i)-s-
ulaisa- ‘nakaljat’sja dokrasna’ (Luw. 451b)

4. Words falsely connected with colour names

In the course of my research, I found many words which at the first sight appeared to be related to colour names, but closer analysis revealed that they were not. These are listed below for future reference:

boro:

- Bur. *borbilō* (BurR 105a) < Russian ‘vorobej’
 Bur. *borbogor* (BurRS 105b) ‘nevzračnyj; židen’kij, reden’kij (*o borode*)’ < *borboi-* ‘torčat’ vo vse storony, byt’ vsklokočennym’ (BurRS 105b)
 Bur. *borxogor* (BurRS 107a) ‘nevzračnyj, zahudalyj; sognutuj, s’ezivšijsja’ < *borxoi-* ‘imet’ žalkij ili potrepannyj vid’ (BurRS 107a)
 Khal. *bortogon ceceg ‘mertenziya’* (NT 59–60, p. 34) < *bortogo* ‘malen’koe derevyannoe vedro; cilindr’ (Luw. 78b)

čağan:

- MNT Ča’adai aqa ‘uncle Ča’adai’ (Rachewiltz 1972, line 11119); cf. LM Čağadai ‘Čagadai, Čingis-hanov syn’ (Kowalewski 2085a). This word was often connected with the colour name čağan. This proper name was mentioned for the first time in MNT, which also contains a denial of this etymology. There are two words meaning ‘white’ in the text of MNT: čaga’an and čağan, but ča’an, from which the name ča’adai may be derived, is not included. There have been many attempts to trace the etymology of this word, but none of them is convincing.

LM čayidam ‘weiße Erde, Salzsee; du laitage’ (Ligeti 1935, p. 218). The word cannot be connected with the colour name čağan, since, according to Kara, it is a loan-word in *tshva i’ dam* from the Tibetan language (Kara 1998, p. 653a). Cf. Khal. *caidam* ‘solončak, solončakovaja mestnost’ (Luw. 602b); Bur. *saidam* ‘solenyj (ili solončakoviy) vodoem; zabelennaja voda’ (BurRS 383a); Kalm. *tsädm* ‘weißlich (Erde, Gegend, Salzsteppe) (KWb 425a); Ord. *ts’ädam* ‘plaine humide à efflorescences de soude et où li croît du *Deresü*’ (Mostaert 1941, p. 698a).

ulagan:

- LM *ulbugar* ~ *ulbagar* ‘soft, tender, weak, flabby, limp; flimsy; wilted’ (Lessing 872a); Khal. *ulbagar* ‘slabyj, vjalyj; nekrepkij, redkij (*o tkani*)’ (Luw. 452b); Kalm. *ulw’gar* (KWb 449a) < *ulbayi-* ‘to be[come] soft, weak, limp; to waste away’; *ulbara-* ‘to become soft, tired out, exhausted; to be cooked or stewed, be overcooked’ (Lessing 872b)

qara:

- LM *qarbuğçi ebesü* ‘feather grass’ /Lat. *Stipa sibirica*/ (Lessing 936a); Khal. *xarwagč övs ‘kovyl’*’ (NT 89–90, p. 97) < *qarbu-* ‘to shoot (*an arrow or fire-arms*)’

- Ibn Muh. *qarǵa* ‘voron’ (Poppe 1938, p. 444b). Very likely an onomatopoeic word. cf. Old Turkic *qarǵa* ‘voron; vorona’ (DTS 426a)

- Bur. *xariu* (BurRS 556a) < Russian ‘*krajjuha (hleba)*’

- Bur. *xarša* ‘plaha; doska’ (BurR 558a)

- LM *qaram* ‘jealous; possessive, stingy, greedy’ (Lessing 934a); Khal. *xaram* (Luw. 514a); Bur. *xaram* (BurR 551b) < *qara-* ‘to look at, glance, watch’ (Lessing 932a); the suffix -m is a VN (GWM § 164).

quva:

- Bargu xúalañ ‘goluboj kamen’, upotrebljaemyj in vide ukrašenija (*v pričeske*)’ (Rudnev 1911, p. 148a) < Chinese *huā* ‘cvetok, cvety’ (KitRS 260b), *lán* ‘sinij’ (KitRS 364a)

köke:

- Bur. *xüixer* ‘sera’ (BurR 636b); Khal. *xüixer* (Luw. 580a); LM *kükür* ‘sulphur’ (Lessing 499a) < Pers. *gūgar* (Budaev 1992, p. 95)

- Ibn Muh. *kögörči* ‘golub’’ (Poppe 1938, p. 440b) < Old Turkic *kögürčgǔn* ‘pigeon, dove’ (ED 713b) < *kök* ‘a grey bird’

küreng:

- Khal. *xürd* ‘mol’; cf. LM *körid* ‘kožed’ (NT 96–97, p. 153)
 LM *küren-e* ‘skunk, polecat; weasel’ (Lessing 504b); Khal. *xürne* ‘horek’ (Luw. 577a); Kalm. *kürn* ‘*Itlis*’ (KWb 248a) < Old Turkic *küzen* ‘polecat’ (ED 761b). Doerfer suggests that it may be a very early Mongolian loan-word in Turkic (TMEN 1, p. 328).

sira:

LM *sirq-a* 'wound; sore; injury' (Lessing 719a); Khal. *šarx* 'rana, jazva' (Luw. 647a); Bur. *šarxa* 'id.' (BurRS 723a); Kalm. *šarxa* 'id.' (KWb 350a) Khal. *šanxar nugas* 'želtonosaj krjakva' (NT 96–97, p. 42); cf. LM *šangur galagu* 'a kind of goose' < Chinese *ch'a-yen* (Lessing 752a) Bur. *šaramal [mjaxan]* 'požarennoe, žarkoe' (BurRS 721b) < *sira-* 'to roast, broil, fry; to scorch, burn (*of the sun*); to gild' (Lessing 714b) Bur. *šasar* 'želtaja šapka (*golovnoj ubor lam*)' (BurRS 733b); cf. LM *šaser* 'yellow cap' (Lessing 753a) < Tibetan *zhva ser* Bur. *šasargana* 'oblepiha' (B.Kh.- yellowish berry) (BurRS 734a); cf. LM *čačarğana* ~ *čičarğana* ~ *čaćirğana* 'Hippophae rhamnooides' (Lessing 175b). The LM form of this word proves that it cannot be connected with *sira*.

5. Summary

In analysing word formation according to Mongolian colour names, I tried to present the rich variety of the suffixes that may be added to colour names. I found 49 suffixes that are used with colour names and other lexical groups, and 59 suffixes the use of which is restricted to colour names. This latter group is comprised of the following sub-groups:

1. 9 suffixes may be used with any colour name in any Mongolian language: NN +čU, +Gčin, +ng, +nUd, NA +bir/+bUr, +btUr, +btUr+KA, VV +d-KA-, (+yi)-rA-;
2. 14 suffixes may be used with only one colour name, in any language: NN +bA, +gil, +(G)U, +kirA, +kULAi, +kir+mA, +rU, NA +GA, +GAl, +gis, +GU, +mAl, NV (+yi)-dAm;
3. 15 suffixes occur in only one language with one or two colour names: NN +bAs, +bUčAr, +čAGAi, MNT +dU, +GAñci, +KA, +KALi, +IGA(n), MNT +mbA, NA +ki-GAr, +ibi, +lkI+mA, +rA-L, NV (+yi)-dA-či-, VN +l-GUi
4. 21 suffixes occur in one or two modern languages and LM with more than two colour names: NN +GA+GAsUn, +giy-A, +ki, +lin, +ljA, +fjA, +mAli, +mAng, +s, +s+KA, NA +dU, +jili, +KAñAi, +lKAi, +mAGAr, +mdUG, +sin, +sUn, VN +baljA-GUr, (+yi)-BAGAr, VV (+yi)-s-

The LM dictionaries were my source of data. However, not every word could be found in them, in which case, a reconstructed form is given. I found mostly words formed with suffixes added to basic colour names, which does not mean that other forms with object colour names do not exist in the colloquial language. The investigation concerning the Khalkha language was made relatively easy by the fact that there are many thematical dictionaries with special, rarely used words (NT). In the case of the other languages, no attempt has ever been made to compile such dictionaries.

Further research on this subject involves fieldwork, the collection of special terms used by various professions in the different Mongolian nations.

Although many words connected with colour names in the Siberian-Turkic languages are loan-words from Mongolian, their examination is beyond the scope of the present paper.

*

The results of my investigation prove that in the Mongolian language there is a group of suffixes that show special affinity to a semantic field of the lexicon, namely to colour names. At the same time, the analysis of this semantic field and the analysis of the function and occurrence of these suffixes reveal a difference in their productivity in the course of history. This difference in productivity makes research on the productivity of the language possible.
